Negation and Polarity Danielle Forget, 1997-01-01 In the last decade, there has been a revival of interest regarding negation and polarity, with much cross-fertilization between semantic and syntactic approaches. The papers in the present volume address key issues regarding the syntax and semantics of negation and polarity, including both synchronic and diachronic perspectives. Central to the discussions are the distribution of negative markers and the structure of the clause, negative concord phenomena, licensing of polarity items, similarities between Neg-movement and wh-movement. The papers, by main contributors to the field, reflect different theoretical frameworks, including Principles and Parameters and Minimalist approaches, Head-Driven Phrase Structure Grammar, Formal Semantics, or approaches interested in pragmatics. The volume is of interest to syntacticians, semanticists, historical linguists, typologists, and philosophers.

Lectionary Preaching Workbook Russell F. Anderson, 2007 Bigger, stronger, better! This newly revised edition of Anderson's best-seller retains all of the great features that have made it an indispensable tool for busy pastors. Combining concise but insightful textual notes with a wide range of creative preaching ideas, each chapter provides plenty of starting points for developing stimulating sermons that make the scriptures come alive for the people in the pews. In addition to a convenient sermon planning template plus overviews of Matthew (the featured Gospel narrator in Cycle A) and each liturgical season, every week's material includes: a listing of applicable Revised Common, Roman Catholic, and Episcopal lectionary texts; a theme for the day; brief commentary on the Old Testament, New Testament, and Gospel lessons; a prayer for the day; theological reflections reflections exploring relationships between the texts; possible preaching approaches with suggested titles and sermon angles; additional illustrations to flesh out the message.

Design Ed Angela Elkordy, Ayn Keneman, 2022-08-24 Design Ed provides a foundation for the science of learning and shows how to apply design thinking strategies to drive engagement for digital age learners. Researchers in learning sciences are pioneering instructional technologies that have the capacity to revolutionize the educational system. By combining design thinking methodology with strong theoretical frameworks in the learning sciences, educators can improve learning to help students thrive. This book lays out the intersection between theory, design and reflective practice to help educators understand individual learner differences and the impact of context upon learning. With this foundation, you'll develop the skills you need to design powerful and effective learning experiences, particularly when using digital technologies. Topics covered include: • Educators as learning designers • Shaping experiences for digital age learning through digital media and digital environments • Design and format of educational interventions • The role of reflective practice and evaluating the impact on student learning Throughout the text, the authors emphasize the "why" behind the use of technology and the "how" to enact learning design for all digital age learners.

Practical Weight Management in Dogs and Cats Todd L. Towell, 2011-10-04 Practical Weight Management in Dogs and Cats is a comprehensive, clinical reference for the veterinary health team, providing the necessary tools to successfully manage pet obesity. Bringing together specialists in nutrition, internal medicine, critical care, and surgery and rehabilitation, the book provides an overview of prevention techniques, clinical management, and practical tips for implementing successful programs and educating owners. Covering topics ranging from taking a nutritional history and body condition scoring to calculating food dosage and client communication tips, this book is a resource for both veterinarians and veterinary technicians to address the growing problem of pet obesity. The book begins by explaining the clinical importance of obesity, then moves on to diagnosing and preventing obesity. The heart of the book is devoted to managing body weight, with chapters on nutritional, pharmacotherapeutic, and exercise strategies, and two unique chapters cover owner compliance and wellness programs. Practical Weight Management in Dogs and Cats offers a

collaborative approach to managing weight in pet dogs and cats.

The Belarusian Shtetl Irina Kopchenova,Mikhail Krutikov,2023 For centuries Jewish shtetls were an active part of Belarusian life; today, they are gone. The Belarusian Shtetl is a landmark volume which offers, for the first time in English, an illuminating look at the shtetls' histories, the lives lived and lost in them, and the memories, records, and physical traces of these communities that remain today. Since 2012, under the auspices of the Sefer Center for University Teaching of Jewish Civilization, teams of scholars and students from many different disciplines have returned to the sites of former Jewish shtetls in Belarus to reconstruct their past. These researchers have interviewed a wide range of both Jews and non-Jews to find and document traces of Shtetl history, to gain insights into community memories, and to discover surviving markers of identity and ethnic affiliation. In the process, they have also unearthed evidence from old cemeteries and prewar houses and the stories behind memorials erected for Holocaust victims. Drawing on the wealth of information these researchers have gathered, The Belarusian Shtetl creates compelling and richly textured portraits of the histories and everyday lives of each shtetl. Important for scholars and accessible to the public, these portraits set out to return the Jewish shtetls to their rightful places of prominence in the histories and legacies of Belarus--

Microwave and Millimeter Wave Circuits and Systems Apostolos Georgiadis,Hendrik Rogier,Luca Roselli,Paolo Arcioni,2012-09-17 Microwave and Millimeter Wave Circuits and Systems: Emerging Design, Technologies and Applications provides a wide spectrum of current trends in the design of microwave and millimeter circuits and systems. In addition, the book identifies the state-of-the-art challenges in microwave and millimeter wave circuits systems design such as behavioral modeling of circuit components, software radio and digitally enhanced front-ends, new and promising technologies such as substrate-integrated-waveguide (SIW) and wearable electronic systems, and emerging applications such as tracking of moving targets using ultra-wideband radar, and new generation satellite navigation systems. Each chapter treats a selected problem and challenge within the field of Microwave and Millimeter wave circuits, and contains case studies and examples where appropriate. Key Features: Discusses modeling and design strategies for new appealing applications in the domain of microwave and millimeter wave circuits and systems Written by experts active in the Microwave and Millimeter Wave frequency range (industry and academia) Addresses modeling/design/applications both from the circuit as from the system perspective Covers the latest innovations in the respective fields Each chapter treats a selected problem and challenge within the field of Microwave and Millimeter wave circuits, and contains case studies and examples where appropriate This book serves as an excellent reference for engineers, researchers, research project managers and engineers working in R&D, professors, and post-graduates studying related courses. It will also be of interest to professionals working in product development and PhD students.

Lectures on the I Ching Richard Wilhelm, 2014-07-14 Wilhelm frequently wrote and lectured on the Book of Changes, supplying guidelines to its ideas and ways of thinking. Collected here are four lectures he gave between 1926 and 1929. The lectures are significant not only for what they reveal about Chinese tradition and culture, but also for their reflections of the scholarly and cultural milieu prevalent in Germany during that time. Originally published in 1979. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Trends in Renewable Energies Offshore C. Guedes Soares, 2022-10-26 Renewable energy resources offshore are a growing contributor to the total energy production in a growing number of countries. As a result the interest in the topic is increasing. Trends in Renewable Energies Offshore includes the papers presented at the 5th International Conference on Renewable Energies Offshore (RENEW 2022, Lisbon, Portugal, 8-10 November 2022), and covers recent developments and experiences gained in concept development, design and operation of such devices. The scope of the contributions is broad, covering all aspects of renewable energies offshore activities, including: • Resource assessment • Tidal Energy • Wave Energy • Wind Energy • Solar Energy • Renewable Energy Devices • Multiuse Platforms • Maintenance planning • Materials and structural design Trends in Renewable Energies Offshore will be of interest to academics and professionals involved or interested in applications of renewable energy resources offshore. The 'Proceedings in Marine Technology and Ocean Engineering' series is dedicated to the publication of proceedings of peer-reviewed international conferences dealing with various aspects of 'Marine Technology and Ocean Engineering'. The Series includes the proceedings of the following conferences: the International Maritime Association of the Mediterranean (IMAM) conferences, the Marine Structures (MARSTRUCT) conferences, the Renewable Energies Offshore (RENEW) conferences and the Maritime Technology (MARTECH) conferences. The 'Marine Technology and Ocean Engineering' series is also open to new conferences that cover topics on the sustainable exploration and exploitation of marine resources in various fields, such as maritime transport and ports, usage of the ocean including coastal areas, nautical activities, the exploration and exploitation of mineral resources, the protection of the marine environment and its resources, and risk analysis, safety and reliability. The aim of the series is to stimulate advanced education and training through the wide dissemination of the results of scientific research.
