Advances in Business Statistics, Methods and Data Collection Ger Snijkers,Mojca Bavdaz,Stefan Bender,Jacqui Jones,Steve MacFeely,Joseph W Sakshaug,Katherine J Thompson,Arnout van Delden,2023-02-22 **ADVANCES IN BUSINESS STATISTICS, METHODS AND DATA COLLECTION** Advances in Business Statistics, Methods and Data Collection delivers insights into the latest state of play in producing establishment statistics, obtained from businesses, farms and institutions. Presenting materials and reflecting discussions from the 6th International Conference on Establishment Statistics (ICES-VI), this edited volume provides a broad overview of methodology underlying current establishment statistics from every aspect of the production life cycle while spotlighting innovative and impactful advancements in the development, conduct, and evaluation of modern establishment statistics programs. Highlights include: Practical discussions on agile, timely, and accurate measurement of rapidly evolving economic phenomena such as globalization, new computer technologies, and the informal sector. Comprehensive explorations of administrative and new data sources and technologies, covering big (organic) data sources and methods for data integration, linking, machine learning and visualization. Detailed compilations of statistical programs' responses to wide-ranging data collection and production challenges, among others caused by the Covid-19 pandemic. In-depth examinations of business survey questionnaire design, computerization, pretesting methods, experimentation, and paradata. Methodical presentations of conventional and emerging procedures in survey statistics techniques for establishment statistics, encompassing probability sampling designs and sample coordination, non-probability sampling, missing data treatments, small area estimation and Bayesian methods. Providing a broad overview of most up-to-date science, this book challenges the status quo and prepares researchers for current and future challenges in establishment statistics and methods. Perfect for survey researchers, government statisticians, National Bank employees, economists, and undergraduate and graduate students in survey research and economics, Advances in Business Statistics, Methods and Data Collection will also earn a place in the toolkit of researchers working –with data– in industries across a variety of fields.

Electronic Government and Electronic Participation E. Tambouris,H.J. Scholl,M.F.W.H.A. Janssen,2015-08-24 Electronic government and electronic participation continue to transform the public sector and society worldwide and are constantly being transformed themselves by emerging information and communication technologies. This book presents papers from the 14th International Federation for Information Processing's EGOV conference (IFIP EGOV 2015), and its sister conference, the 7th Electronic Participation (ePart) conference, held in Thessaloniki, Greece, in August and September 2015 with the support and sponsorship of the University of Macedonia. Through the years, both of these conferences have established themselves as leading scientific events in their field, providing a forum for scholars to present and discuss their work. Included here are 31 accepted ongoing research papers, grouped under the following headings: eParticipation; policy modeling; open government and smart cities; general e-government; and e-government services; as well as 6 Ph.D. colloquium papers, 5 accepted posters and 3 workshops. With their combination of scientific credibility and rigor and with high relevance to practice, the papers presented here will be of interest to all those whose work involves electronic government and electronic participation.

Anti-fragile ICT Systems Kjell Jørgen Hole,2016-03-22 This book introduces a novel approach to the design and operation of large ICT systems. It views the technical solutions and their stakeholders as complex adaptive systems and argues that traditional risk analyses cannot predict all future incidents with major impacts. To avoid unacceptable events, it is necessary to establish and operate anti-fragile ICT systems that limit the impact of all incidents, and which learn from small-impact incidents how to function increasingly well in changing environments. The book applies four design principles and one operational principle to achieve anti-fragility for different classes of incidents. It discusses how systems can achieve high availability, prevent malware epidemics, and detect anomalies. Analyses of Netflix's media streaming solution, Norwegian telecom infrastructures, e-government platforms, and Numenta's anomaly detection software show that cloud computing is essential to achieving anti-fragility for classes of events with negative impacts.

Rule of law and public digitalisation: – pilot project Motzfeldt, Hanne Marie,Waage, Frederik,2021-02-04 Available online: <https://pub.norden.org/temanord2021-502/> The Nordic Council of Ministers has noted the call from the UN to take measures in order to secure the fundamental values of rule of law and democracy in relation to public digitalisation and to consider the growing influence of the tech industry on public administration in the digital welfare states. The shared Nordic values of democracy, rule of law and trust between citizens and authorities, should be carried further into the digital age. Therefore, the Nordic Council of Ministers has initiated a pilot project that identify relevant themes and initiatives on the basis of input and information from public authorities and supervisory bodies in Norway, Sweden, The Faeroe Islands, Finland and Denmark. The team behind the report assesses that there is a need to: - strengthen the exchange of knowledge regarding investigations, reflections and case law of supervisory bodies in the Nordic and Baltic countries - identify and analyse the legal framework related to constitutional law and human rights for public sector digitisation, and to evaluate whether present administrative law provides sufficient support for compliance within these parameters - study the effects of digitisation on governance, control and liability structures in the field of public administration, possibly including the court administration - investigate the direction of the legislative development, clarify the underlying considerations and interests and assess this development in light of the values of legal certainty and rule of law - integrate legal research as an element of projects related to public digitisation within Nordic research programmes The Nordic Council of Ministers will now consider how it can

support using the opportunities offered by digitisation so that they safeguard the shared Nordic values.

SME Policy Index: Western Balkans and Turkey 2022 Assessing the Implementation of the Small Business Act for Europe OECD,2022-07-08 Small and medium-sized enterprises (SMEs) are essential drivers of sustainable economic growth in the Western Balkans and Turkey, where they make up 99% of all firms, generate 65% value added and account for 75% of employment. Nevertheless, SMEs across the region continue to face obstacles such as difficulties accessing financing, low levels of digital uptake, regulatory barriers and relatively low participation in international trade.

Nordic digital identification (eID) Hansteen, Kjell,Ølnes, Jon,Alvik, Tor,2016-02-10 This publication presents the survey results and policy recommendations of a Nordic study of national eID-systems. The countries that have been studied are Denmark, Finland, Iceland, Norway and Sweden. The aim of the study is to facilitate and lay a foundation for discussions about the similarities and differences in legal, organisational, technical and data approaches taken by the different countries. The survey data has been gathered with the assistance of the members of a project reference group. The data has been analysed and structured into a number of highlighted issues (chapter 1). The highlighted issues have been in turn used as baseline for a set of recommendations (chapter 9). The Nordic Council of Ministers has provided funding and facilitated the staffing of the reference group. The Norwegian Agency for Public Management and e-Government, Difi, has been the project owner and provided project resources.

Designing and Conducting Business Surveys Ger Snijkers,Gustav Haraldsen,Jacqui Jones,Diane Willimack,2013-08-05 Designing and Conducting Business Surveys provides a coherent overview of the business survey process, from start to finish. It uniquely integrates an understanding of how businesses operate, a total survey error approach to data quality that focuses specifically on business surveys, and sound project management principles. The book brings together what is currently known about planning, designing, and conducting business surveys, with producing and disseminating statistics or other research results from the collected data. This knowledge draws upon a variety of disciplines such as survey methodology, organizational sciences, sociology, psychology, and statistical methods. The contents of the book formulate a comprehensive guide to scholarly material previously dispersed among books, journal articles, and conference papers. This book provides guidelines that will help the reader make educated trade-off decisions that minimize survey errors, costs, and response burden, while being attentive to survey data quality. Major topics include: • Determining the survey content, considering user needs, the business context, and total survey quality • Planning the survey as a project • Sampling frames, procedures, and methods • Questionnaire design and testing for self-administered paper, web, and mixed-mode surveys • Survey communication design to obtain responses and facilitate the business response process • Conducting and managing the survey using paradata and project management tools • Data processing, including capture, editing, and imputation, and dissemination of statistical outputs Designing and Conducting Business Surveys is an indispensable resource for anyone involved in designing and/or conducting business or organizational surveys at statistical institutes, central banks, survey organizations, etc.; producing statistics or other research results from business surveys at universities, research organizations, etc.; or using data produced from business surveys. The book also lays a foundation for new areas of research in business surveys.

Electronic Government Marijn Janssen,Hans Jochen Scholl,Maria A. Wimmer,Frank Edward Bannister,2014-08-11 This book constitutes the refereed proceedings of the 13th IFIP WG 8.5 International Conference on Electronic Government, EGOV 2014, held in Dublin, Ireland, in September 2014. The 26 revised full papers presented were carefully reviewed and selected from 70 submissions. The papers have been organized in the following topical sections: foundations; services and interoperability; policy and stakeholders; open data; and design and values.

Digital Transformation in Norwegian Enterprises Patrick Mikalef,Elena Parmiggiani,2022-06-16 This open access book presents a number of case studies on digital transformation in Norway, one of the fore-runners in the digital progress index established by the European Commission in 2020. They explore the process of adoption, diffusion and value generation from digital technologies, and how the use of different digital solutions has enabled Norwegian enterprises to digitally transform their operations and business models. The book starts with an introductory chapter summarizing a vast body of literature in order to synthesize what is already known about digital transformation before exploring the Norwegian context in more detail. Then a series of case studies from the private and public sector in Norway is presented. They document a process perspective which describes the sequence of events during and after adoption of digital solutions, as well as the types of business value that were realized. Through these single studies, the process of digital transformation is illustrated, a number of key findings highlighted, and eventually theoretical and practical recommendations based on these cases emphasized. The book closes with a brief overview of some emerging technologies, and comments on how they are likely to change different sectors. Digital transformation has been one of the priority areas for the Norwegian government over the past years and puts Norwegian enterprises upfront in adopting novel technologies and utilizing them for achieving organizational goals. This experience accumulated over the years makes the Norwegian context a particularly interesting one in understanding how private and public organizations make use of new digital solutions, what lessons can be learnt during the process, and what are some of the key success and failure factors. This way the book is written for practitioners who are currently involved in digital transformation projects in their organizations, researchers of information systems and management, as well as master students in degrees of informatics and technology management.

Styreguiden Vidar Andersen,Erik Bjørløw Dye,Stian Simonsen,2015-12-12 Styreguiden er spesielt rettet mot personer som sitter i styrer i dag, og som gjerne vil tilegne seg kunnskap og kompetanse om hvordan de kan øke profesjonaliteten i styret og få bedre og mer effektive styremøter. Boken skal være mest mulig brukervennlig, og det skal være lett å finne frem til forslag til dokumenter og maler for generalforsamlingen, styret og administrasjonen.
