American Green: The Obsessive Quest for the Perfect Lawn Ted Steinberg, 2006-03-17 “Ted Steinberg proves once again that he is a master storyteller as well as our foremost environmental historian.”—Mike Davis The rise of the perfect lawn represents one of the most profound transformations in the history of the American landscape. Landscaping with Trees in the Midwest Scott A. Zanon, 2014-08-15 Trees not only add beauty and value to property but also enhance the physical environment by providing shade, reflecting heat, and blocking wind. Choosing the right trees for the right location and conditions, however, is not always easy: each species has its own requirements for sunlight, water, drainage, and protection. Landscaping with Trees in the Midwest: A Guide for Residential and Commercial Properties describes sixty-five desirable tree species, their characteristics, and their uses. More than 325 color photographs illustrate the appearance of each species through the seasons—including height, shape, bark, flowers, and fall colors—as well as other factors that influence selection and siting in order to help the landscape professional or homeowner make informed choices. This guidebook also considers trees as a factor in overall environmental health and gives special consideration to

the effects of the emerald ash borer, which continues to wreak havoc in wooded areas of the Midwest, offering replacement alternatives for vulnerable areas. In addition to the text and photos, the book includes a table of growth rates and sizes, a map of hardiness zones, and other valuable reference tools.

Cracking the Code to Profit Ryan J. Sciamanna, 2018-01-25 What is Cracking the Code to Profit? Cracking the Code to Profit is the complete, start to finish blueprint for building a REAL BUSINESS in the lawn care and landscaping industry. The author, Ryan Sciamanna, shares all his knowledge on how he went from a solo operator to six crews in three years. Who is the book for? Cracking the Code to Profit is for anyone thinking about starting a lawn care business to companies trying to break through the \$200k to \$300k gross revenue barrier. If you would like to, but are not already, making \$100k per year as the owner of your lawn care company, you will benefit from reading this book. Why Ryan wrote the book: In 2016 Ryan narrowed his lawn care companies service offering down to lawn mowing and lawn treatments only. Prior to that, his company was a full-service lawn and landscape service provider offering all of the typical services including mulching, pruning, cleanups, leaf removals, hardscapes, landscape design and installation, and snow removal. He made the change in his business model to increase profit margins and reduce the amount of time required of him as the owner of the business. Naturally, he needed to find referral partners for his lawn care customers because they still had other lawn and landscape needs his company no longer performed. He contacted several other lawn and landscape business owners in his area and told them he wanted to send them referrals for the work his company no longer performed and only asked they don't 'steal' his customers for the services they were still providing. After shooting off the first several referrals, Ryan quickly realized that a lot of these companies needed help and until they improved their business operations, referring his clients to them was only making him look bad! He has since stopped referring work with the exception of a couple companies that proved they would provide his customers quality work at fair prices and actually be reliable. Ryan says, I think most lawn care business owners started their business just like I did...they enjoyed the work and were good at it, so they said, why not work for myself. In the beginning, it usually goes pretty smooth, but as they add more and more customers and eventually need to hire employees, they get in over their heads. I did the same thing, but quickly educated myself on how to run an actual business and not just be self-employed. He organized all of his knowledge into Cracking the Code to Profit in hopes it will save new business owners years of frustration. Ryan read a similar 'book' before he started his business that his father had bought for him online. It was actually just a word document that someone had written on starting a lawn care business and his dad printed it off for him. It cost his father \$79.95 for that! Ryan still has that 'book' and even though it was overpriced, terrible quality and a lot of the information was not good, he still credits that book towards helping him get his business off the ground. What you can expect from Cracking the Code to Profit - How to Start a Lawn Care Business: The book flows in chronological order from starting your business to your exit strategy. Ryan put every detail he could recall from his own experience. You can see the book chapters in the book preview. After each chapter, action steps are included so you know exactly what you need to do. At the end of the book, you will find the resource section for continued learning and execution. You can expect to have a much better understanding of how to start and grow your lawn care business in a healthy, profitable way. Ryan's contact info is also included in the book. He would love to hear from you after you finish it!

Pennsylvania Naturally Geoffrey L. Mehl,2016-03-16 Pennsylvania Naturally describes all the habitat types, all the soils and all the native plants -- but it's also a toolkit of knowledge about geography, geology and ecology especially for gardeners. It provides dozens of starter lists to use as foundations for design and includes the perfect list of plants for rain gardens. The book describes sustainable landscaping as much more than environmental responsibility. Gardens are more lush, more productive, easier to maintain and less expensive. Instead of controlling the land, we collaborate with it to design a garden that suits our taste and give us pleasure. Gorgeous gardens are possible on any scale, no matter what our resources - and we contribute to the health of the planet. Instead of trial-and-error, we plan, design and create landscapes with confidence and success. For the first time, we can garden with certainty about our soil, the habitat we have, the plants that will work. Along the way, we broaden our horizons about the astonishing variety of landscape opportunities in Pennsylvania and gain an appreciation for the complex ecology that makes the entire state a marvelous place to garden.
