Cellular Automata and Discrete Complex Systems Jan M. Baetens,Martin Kutrib,2018-06-15

This volume constitutes the thoroughly refereed proceedings of the 24th IFIP WG 1.5 International Workshop on Cellular Automata and Discrete Complex Systems, AUTOMATA 2018, held in Ghent, Belgium, in June 2018. The 10 regular papers presented in this book were carefully reviewed and selected from a total of 16 submissions. The papers highlight the major advances in the field and the development of new tools, support the development of theory and applications of CA and DCS and identify and study within an inter- and multidisciplinary context, the important fundamental aspects, concepts, notions and problems concerning CA and DCS.

Mesoscopic Physics of Complex Materials T.S. Chow,2012-12-06 A cross-disciplinary study of the physical properties of complex fluids, solids, and interfaces as a function of their mesoscopic structures, with emphasis on nonequilibrium phenomena. The book introduces readers to the methods of non-equilibrium statistical mechanics as applied to complex materials, but always connects theories with experiments. It shows the underlying connections between topics as diverse as critical phenomena in colloidal dynamics, glassy state relaxation and deformation, reinforced polymer composites, molecular level mixing in nanocomposites, and rough surfaces and interfaces. At the same time, each chapter is designed to be independent from the others so that the book can serve as a reference work as well as a text. It is not designed to review all the recent work in mesoscopic physics, which spans many disciplines, but rather attempts to establish a general framework for understanding and developing new materials that can not be designed by the trial and error methods. A familiarity with the basics of statistical mechanics and condensed matter physics is assumed.

Advances In Information Storage Systems: Selected Papers From The International Conference On Micromechatronics For Information And Precision Equipment (MIPE '97) (Volumes 9 & 10) Bharat Bhushan,Kyosuke Ono,1999-01-04 Advances in Information Storage Systems (AISS), volumes 9 & 10, are special volumes which contain selected papers regarding not only information storage but also information equipment in general and related technologies. The papers were presented at the International Conference on Micromechatronics for Information and Precision Equipment (MIPE '97). MIPE '97 was held in Tokyo, Japan, from 20 to 23 July 1997, as one of the memorial events of the Centennial Grand Congress of the Japan Society of Mechanical Engineers. Information and precision equipment is fast-changing high technology, and is necessary for the development of an international multimedia society and essential for the innovation of conventional machines as well as the creation of new sophisticated machines for future medical, biological and cosmic industries in the 21st century. Information and precision equipment can improve their performances by analyzing, designing, fabricating, controlling and then utilizing a smaller and smaller world in space and time. Micromechatronics is not only a major interdisciplinary engineering but also the principle of innovation in such machines. In the light of this, the scope of MIPE '97 ranged from the micromechanics and micromechatronics of information storage, input/output devices, and precision

equipment to microtechnologies related to information equipment. The papers in AISS special volumes are mainly related to information storage, particularly magnetic recording storage. But some of them are related to printer, paper-feeding-mechanism and micromachine technologies, which will directly or indirectly contribute future information devices. The papers contained in this series are of international archival quality and are refereed according to rigorous journal standards. Volume 9 contains papers on the mechanics and tribology of magnetic recording storage systems (mainly hard disk drives), while papers on the micromechatronics of the head-positioning system in magnetic disk storage are compiled in Volume 10 together with papers on optical disk storage and others.

Slider Pete Hautman, 2017-09-12 Competitive eating vies with family expectations in a funny, heartfelt novel for middle-grade readers by National Book Award winner Pete Hautman. David can eat an entire sixteen-inch pepperoni pizza in four minutes and thirty-six seconds. Not bad. But he knows he can do better. In fact, he'll have to do better: he's going to compete in the Super Pignorino Bowl, the world's greatest pizza-eating contest, and he has to win it, because he borrowed his mom's credit card and accidentally put \$2,000 on it. So he really needs that prize money. Like, yesterday. As if training to be a competitive eater weren't enough, he's also got to keep an eye on his little brother, Mal (who, if the family believed in labels, would be labeled autistic, but they don't, so they just label him Mal). And don't even get started on the new weirdness going on between his two best friends, Cyn and HeyMan. Master talent Pete Hautman has whipped up a rich narrative shot through with equal parts humor and tenderness, and the result is a middle-grade novel too delicious to put down.

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving (CPS) and related topics such as dynamic decision-making (DDM) and complex dynamic control (CDC) represent multifaceted psychological phenomena. In a broad sense, CPS encompasses learning, decision-making, and acting in complex and dynamic situations. Moreover, solutions to problems that people face in such situations are often generated in teams or groups. This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions. This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task (e.g. minimal complex system tests), which is a view taken by the psychometric community. The proposed approach taken here is that because CPS is multifaceted, multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other. Thus, this Research Topic is aimed at showcasing the latest work in the fields of CPS, as well as DDM and CDC that takes a holistic approach to investigating and theorizing about these abilities. The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS, DDM and CDC. This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another, what learning conditions result in transferable knowledge and skills, and how these features can be trained.

Fabrication of Complex Optical Components Ekkard Brinksmeier, Olthmann Riemer, Ralf M. Gläbe, 2012-09-14 High quality optical components for consumer products made of glass and plastic are mostly fabricated by replication. This highly developed production technology requires several consecutive, well-matched processing steps called a process chain covering all steps from mold design, advanced machining and coating of molds, up to the actual replication and final precision measurement of the quality of the optical components. Current market demands for leading edge optical applications require high precision and cost effective parts in large volumes. For meeting these demands it is necessary to develop high quality process chains and moreover, to crosslink all demands and interdependencies within these process chains. The Transregional Collaborative Research Center Process chains for the replication of complex optical elements at Bremen, Aachen and Stillwater worked extensively and thoroughly in this field from 2001 to 2012. This volume will present the latest scientific results for the complete process chain giving a profound insight into

present-day high-tech production.

Slider Girl Jack Crux,2019-04-07 This is the story of a most unusual relationship; Fala the Slider Girl and Bartek her Watcher. No mere chance has brought them together, it is their destiny. Although neither knows it, theirs is a love as deep as the oceans and as enduring as Gaia, our earth which birthed and protects them. But the time is coming when Gaia will be threatened by a far greater power. To resist, Gaia will need their courage, and she will demand they both sacrifice their all, including each other.

The Neyer/James Guide to Pitchers Bill James,Rob Neyer,2008-06-16 Preeminent baseball analyst Bill James and ESPN.com baseball columnist Rob Neyer compile information on pitches and their origins, nearly two thousand pitchers, and more in this comprehensive guide. Pitchers, the pitches they throw, and how they throw them—they're the stuff of constant scrutiny, but there's never been anything like a comprehensive source for such information...until now. Bill James and Rob Neyer spent over a decade compiling the centerpiece of this book, the Pitcher Census, which lists specific information for nearly two thousand pitchers, ranging throughout the history of professional baseball. Their guide also includes a dictionary describing virtually every known pitch, biographies of great pitchers who have been overlooked, and top ten lists for fastballs, spitballs, and everything in between. James and Neyer also weigh in on the debate over pitcher abuse and durability, offer a formula for predicting the Cy Young Award winner, and reveal James's Pitcher Codes. Learn about the origins and development of baseball's most important pitches and more knuckleballers and submariners than you ever thought existed! Baseball's action always starts with the pitchers. Studio Anywhere 2: Hard Light Nick Fancher,2017-01-20 In Studio Anywhere 2: Hard Light, photographer and author Nick Fancher builds on the success of his previous book (Studio Anywhere: A Photographer's Guide to Shooting in Unconventional Locations) as he continues to offer candid, practical, and valuable lessons on how to create successful and fresh photographs armed with only minimal gear, a resourceful mind, and a creative spirit. The heart and soul of Studio Anywhere 2: Hard Light resemble its predecessor, but this time Nick focuses his approach on hard light, demonstrating how to use it in innovative and flattering ways, working with subjects ranging from products to people. You'll learn: • How to work with both available light (e.g., the sun) and manufactured light (such as inexpensive small flash) • How to shape, bounce, and manipulate your unmodified flash to get the results you want • The importance of proper light placement and ambient balance • How to create dramatic, intentional photographs with hard light • DIY techniques for making your own gobos and photo hacks (such as with a reflector) • How to incorporate colored gels into your work to create expressive and innovative imagery • Post-processing tricks and techniques that Nick uses to achieve the final look of the image Included in the book are behind-the-scenes photos, lighting diagrams, and Lightroom settings for every scenario, so the reader can follow along from idea through the shoot and on to the final edit. There is also a feature throughout the book called "Making a Scene" where, upon being presented with an "empty" scene, you're challenged to figure out where you might place your subject and your light(s) in order to achieve a specific effect or result. At the back of the book, Nick shows you how he chose to tackle each scenario. The goal is to train yourself to look at the everyday, commonplace locations and scenarios you encounter and begin to see them full of photographic potential.
