Monsters John Michael Greer,2011-09-08 Of course that monster hiding under your bed when you were little didn't really exist. Vampires, werewolves, zombies, demons—they're simply figments of our imagination, right? After all, their existence has never been scientifically proven. But there is one giant problem with such an easy dismissal of these creepy creatures: people keep encountering them. Join occult scholar John Michael Greer for a harrowing journey into the reality of the impossible. Combining folklore, Western magical philosophy, and actual field experience, *Monsters: An Investigator's Guide to Magical Beings* is required reading for both active and armchair monster hunters. Between these covers you'll find a chilling collection of fiendish facts and folklore, including: Why true vampires are the least attractive—and most destructive—of all monsters The five different kinds of ghosts Magical origins of the werewolf legends How to survive a chimera encounter (Jersey Devil, chupacabra, Mothman) The hidden connections between faery lore and UFOs Where dragons are found today How to investigate a monster sighting Natural and ritual magic techniques for dealing with hostile monsters This 10th anniversary edition of the quintessential guide to magical beings features a new preface, new chapters on chimeras and

zombies, and updates on werewolves, dragons, and the fae.

**Horror Dogs** Brian Patrick Duggan,2023-07-31 How did beloved movie dogs become man-killers like Cujo and his cinematic pack-mates? For the first time, here is the fascinating history of canines in horror movies and why our best friends were (and are still) painted as malevolent. Stretching back into Classical

mythology, treacherous hounds are found only sporadically in art and literature until the appearance of cinema's first horror dog, Sherlock Holmes' Hound of the Baskervilles. The story intensifies through World War II's K-9 Corps to the 1970s animal horror films, which broke social taboos about the good dog on screen and deliberately vilified certain breeds--sometimes even fluffy lapdogs. With behind-the-scenes insights from writers, directors, actors, and dog trainers, here are the flickering hounds of silent films through talkies and Technicolor, to the latest computer-generated brutes--the supernatural, rabid, laboratory-made, alien, feral, and trained killers. Cave Canem (Beware the Dog)--or as one seminal film warned, They're not pets anymore.
