**The Amazon** Mark J. Plotkin,2020-03-02 The Amazon is a land of superlatives. The complex

ecosystem covers an area about the size of the continental U.S. The Amazon River discharges 57 million gallons of water per second--in two hours, this would be enough to supply all of New York City's 7.5 million residents with water for a year. Its flora and fauna are abundant. Approximately one of every four flowering plant species on earth resides in the Amazon. A single Amazonian river may contain more fish species than all the rivers in Europe combined. It is home to the world's largest anteater, armadillo, freshwater turtle, and spider, as well as the largest rodent (which weighs over 200 lbs.), catfish (250 lbs.), and alligator (more than half a ton). The rainforest, which contains approximately 390 billion trees, plays a vital role in stabilizing the global climate by absorbing massive amounts of carbon dioxide--or releasing it into the atmosphere if the trees are destroyed. Severe droughts in both Brazil and Southeast Asia have been linked to Amazonian deforestation, as have changing rainfall patterns in the U.S., Europe, and China. The Amazon also serves as home to millions of people. Approximately seventy tribes of isolated and uncontacted people are concentrated in the western Amazon, completely dependent on the land and river. These isolated groups have been described as the most marginalized peoples in the western hemisphere, with no voice in the decisions made about their futures and the fate of their forests. In this addition to the What Everyone Needs to Know® series, ecologist and conservation expert, Mark J. Plotkin, who has spent 40 years studying Amazonia, its peoples, flora, and fauna. The Amazon offers an engaging overview of this irreplaceable ecosystem and the challenges it faces.

**Back to Eldorado** Richard Shallow, 2016-11-08 This book is a fast-paced story about the fabled Inca city of gold that has been lost somewhere deep in the Amazon jungles of Peru for five hundred years. Against his better judgement, Dr. Fred Myers returns to that green hell called the Amazon jungle. But, this time, he brings twelve men with him to assist him as they encounter the perils of the Amazon, which include six-foot electric eels that can render a horse paralyzed; vampire bats that attack without provocation; flesh-eating fish; large swarms of bugs attacking them every night as they swarm over the campsites, biting and stinging; and thousands of flies laying their larva in their open wounds. They have a run-in with cannibals and headhunters deep within the Amazon and even encounter treachery within their own group. Gold! Gold! Down through the ages, the search for lost gold treasures has motivated men to endure despicable dangers and hardships to discover riches beyond their wildest dreams. The two hundred Spanish conquistadors conquered ten million Incas and became rich. There have been many pirates that have buried their treasures such as Captain Morgan, who buried his treasure somewhere along the coast of Panama; Captain Kidd, who buried his treasure somewhere along the coast of Virginia; the Beale treasure, said to be worth 45 million dollars; several Spanish galleons carrying millions in gold and silver back to Spain from the Incas and the Aztecs that got caught up in hurricanes and were sunk somewhere in the Caribbean; the lost Dutchman gold mine in Arizona; lost Nazi gold of World War II; the California gold rush; and the Alaska gold rush, to name a few. This Indiana Jones-type of adventure brings to light many unanswered questions about how the Incas first arrived in Peru. Where did the white-skinned people from the mountainous regions of Northern Peru migrate from? Could they be the lost tribes of Juda?

Come with me now as our heroes once more attempt to destroy the aliens, once and for all, before they destroy earth.

**Heartbeat in the Amazon** Ken Filing, 2014-07-24 A young doctor and his wife find life in the village of a lost tribe in the Amazon Basin more of a challenge than they expected. They attempt to establish a mission and a clinic treating a tribe with centuries of ancient customs. Encounters [with] wild predators, flesh-eating fish, [and] a tribe of huge aggressive women only add to the difficult and exciting adventure facing them every day. Satisfaction comes when after a lifetime of struggle an Indian girl and her half-caste child, who was delivered by the doctor, become the next generation of missionaries.--Page 4 of cover.
