Your Guide to Succeed in University Aly Madhavji,2013-08-27 How to succeed in university or college? Every student wants to know; every student tries to discover his/her own strategies to succeed - some work, some don't. Becoming successful in university sometimes feels like trial and error - with potentially serious consequences for failures. The goal of this guide - Your Guide to Succeed in University - is to help students in university and college to become confident, well-rounded and successful in their overall education experience. This guide aims to equip you - the students - with the necessary tools for success in university and college. This guide will help students with topics such as building a solid foundation in the first few weeks, efficient techniques for studying and preparing for exams, getting involved, finding the right mentors, networking, job searching with potential employers and preparing for a successful career. --- Extended description Do you ever wonder why most alumni or adults say, University was the best years of my life? Regardless of what age you start university, when you finish, you should look back and share that similar feeling. University is about learning to explore, discovering who you are and who you want to be, and creating the foundation for a lifetime of successes. University is the place where I learnt to make the most of opportunities and became who I wanted to be. It made me aware that just attending

university isn't a silver bullet to success, not unless you take control. The university experience will provide endless possibilities and opportunities, but it's up to you to take the first step. You will face a roller coaster of emotions. You'll feel excited and scared, challenged and stimulated, but when all is said and done, YOU determine how you want to look back on this experience. Starting university can be the most sensational experience of your life, but it can also be the most overwhelming. In fact, it can be downright scary if you do not equip yourself with a plan on how to navigate through university. That is why I wrote this guide. My goal is to not only share my experience and lessons learned, but, to channel this into a helpful guide that may help you adapt rapidly and efficiently navigate your university to ensure that you can make the most of the experience. This guide will not define success for you. You define success and you can start by creating personal goals. Take some time and think about where you want to be in a couple of years, when you graduate, and 10 years from now. You could have educational goals, career goals, salary aspirations, a list of activities to learn, family and other types of goals. Try writing these goals down and revisit them every couple months to see how you're doing. By taking the first step of writing them down, it shows that you are committed to making these goals a reality. This guide will discuss topics ranging from what you'll experience in your first few weeks of university, to how to find a mentor, to networking and post-graduation. At the end, there is a summary of the main takeaways and the top 10 themes. This guide will help you get through the tough times and excel in the good times of university to achieve your definition of success; it may even become your survival guide.

The Only Black Student Lull Mengesha,2009 The Only Black Student is a book that evolved progressively from casual group and one on one discussions into written form during the latter years of Lull's undergraduate experience. On campus, Lull worked as a student ambassador for the Office of Minority Affairs. Additionally, he provided guidance to college-bound high school students who feared that they would not succeed socially and academically at a Predominantly White Institution. Many had only interacted with people of similar economic and ethnic backgrounds before entering a PWI. Compiling input from his mentors, mentees, and peers over the course of three years, he completed and published his first edition of The Only Black Student. Lull never considered himself a writer, but was driven by the desire to inscribe the wisdom to others that he wished someone had shared with him when his academic journey began.
