*Operation Paperclip* Annie Jacobsen,2014-02-11 The explosive story of America's secret post-WWII science programs, from the author of the New York Times bestseller *Area 51* In the chaos following World War II, the U.S. government faced many difficult decisions, including what to do with the Third Reich's scientific minds. These were the brains behind the Nazis' once-indomitable war machine. So began Operation Paperclip, a decades-long, covert project to bring Hitler's scientists and their families to the United States. Many of these men were accused of war crimes, and others had stood trial at Nuremberg; one was convicted of mass murder and slavery. They were also directly responsible for major advances in rocketry, medical treatments, and the U.S. space program. Was Operation Paperclip a moral outrage, or did it help America win the Cold War? Drawing on exclusive interviews with dozens of Paperclip family members, colleagues, and interrogators, and with access to German archival documents (including previously unseen papers made available by direct descendants of the Third Reich's ranking members), files obtained through the Freedom of Information Act, and dossiers discovered in government archives and at Harvard University, Annie Jacobsen follows more than a dozen German scientists through their postwar lives and into a startling, complex, nefarious, and jealously guarded government secret of the twentieth century. In this definitive, controversial look at one of America's most strategic, and disturbing, government programs, Jacobsen shows just how dark government can get in the name of national security.

*The Automobile* Gérard Lavergne,1902

*Aerodynamics of Road Vehicles* Thomas Christian Schuetz,2015-12-30 The detailed presentation of fundamental aerodynamics principles that influence and improve vehicle design have made *Aerodynamics of Road Vehicles* the engineer's "source" for information. This fifth edition features updated and expanded information beyond that which was presented in previous releases. Completely new content covers lateral stability, safety and comfort, wind noise, high performance vehicles, helmets, engine cooling, and computational fluid dynamics. A proven, successful engineering design approach is presented that includes:

- Fundamentals of fluid mechanics related to vehicle aerodynamics
- Essential experimental results that are the ground rules of fluid mechanics
- Design strategies for individual experimental results
- General design solutions from combined experimental results

The aerodynamics of passenger cars, commercial vehicles, motorcycles, sports cars, and race cars is dealt with in detail, inclusive of systems, testing techniques, measuring and numerical aerodynamics methods and simulations that significantly contribute to vehicle development. *Aerodynamics of Road Vehicles* is an excellent reference tool and an indispensable source for the industry's vehicle engineers, designers, and researchers, as well as for enthusiasts, students, and those working in academia or government regulatory agencies.

Automobile Topics ,1930

Errett Lobban Griffith Borgeson,2005-08-21 E.L. Cord was first and foremost a salesman, both of products and of himself. In 1924, after achieving great success as an automobile distributor, Cord became the man with enough talent and panache to lead the Auburn Automobile Company out of its slumber. By 1929, Auburn sales had increased 15-fold and Cord was the head of an empire. His Cord Corporation owned Lycoming Mfg. Co. (engines), Limousine Body Co. and Central Mfg. Co. (auto bodies), Century Airlines, and Duesenberg, among others. Cord's philosophy of automobile design (and salesmanship) might be summed up in two words: Novelty Sells. Though mechanically ordinary, his Auburn models, with outstanding styling and clever paint combinations, were hot sellers. Cord oversaw the introduction of the fabulous Model J Duesenberg, a car whose combination of size, cost, performance, and style was and is unmatched in American automotive history. His most novel car was the rakish Cord L-29, the first American production car to feature front-wheel drive. All this and more is told of America's true renaissance man, E.L. Cord, in the original and complete biography of the man behind the Auburn, Cord and Duesenberg lines. The luxurious presentation includes 280 over-sized pages containing more than 500 rare illustrations, photographs and documents.

**Auto Motor Journal** Stanley Spooner,1906

*Automobiles of the World* Joseph H. Wherry,1968

*André Lefebvre, and the Cars He Created at Voisin and Citroën* Gijsbert-Paul Berk,2011-11-01 Together with his colleagues at Citroën, André Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-

Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.
