**May Day: Recovering Humor from a Stroke** Anna Marie Porter,2015-09-11 Less than two months past her fifty-third birthday Anna Marie Porter suffered a stroke caused by the rupture of a cerebral cavernous malformation. She was suddenly paralyzed on her right side, unable to use any of her appendages save three fingers In the wake of such a life-altering event--and faced with months of rehab--she found comfort in poking fun at her situation; humor became her survival mechanism. What's so funny about having a stroke? Not much unless you have a healthy sense of humor--or even an unhealthy one! And if you're going to take a death-defying leap into the world of serious illness, What good is sitting alone in your room? So she didn't. She invited her friends, family, and colleagues in to her virtual hospital room through an online blog. That blog became the basis for this book. May Day: Recovering Humor From a Stroke is sometimes poignant, often funny, and always an enlightening look into the world of recovering from a serious setback.

**Quinta Essentia - Part 1 (2nd Ed. )** Geoffrey Diemer, 2009-01-08 General Relativity states that matter generates curvature within the vacuum of space surrounding it, and that this curvature gives rise to inertial force and gravitational attraction amongst objects. The Electro-Gravi-Magnetics (EGM) method, described in the Quinta Essentia series, greatly enhances our understanding of the phenomenon of curvature. EGM is an

engineering tool which systematically reveals the common thread connecting GR, Quantum Mechanics and Electromagnetism. Via this connection, one may represent space-time curvature in quantitative terms. The unique universality of EGM makes it a highly valuable and versatile tool for use in varied fields of physics. It also provides a practical framework for investigating space-time metric engineering concepts such as the artificial modification of gravitational fields and faster-than-light propulsion mechanisms. Part One of the Quinta Essentia series presents the layman reader with a conceptual introduction to the EGM method.

*Stranglehold* Robert Rotenberg,2014-04-29 Ripped from the headlines, *Stranglehold* is bestselling author Robert Rotenberg's most shocking book yet, featuring Detective Ari Greene in the fight of his life. It is just after Labour Day and the city is kicking into gear. All eyes are on the hotly contested election for Toronto's next mayor and crime is the big issue. Greene is no stranger to the worst of what the city has to offer, but even he is unprepared for what happens next when he stumbles upon a horrific homicide. In one nightmare moment his world is flipped upside down. Soon Greene is pitted against his young protégé, Daniel Kennicott, who arrests him for first-degree murder. Tied down on house arrest as he awaits his trial, Greene has to find a way to clear his name, and also must face some very hard truths: that he didn't really know the people he believed in most; that there are unseen forces at work prepared to see him take the fall; and most of all, that he should never underestimate the price people will pay for love. Eerily reminiscent of the scandal surrounding the current Toronto mayor, *Stranglehold* is Rotenberg's fourth gripping mystery set on the streets and in the courtrooms of the city, capturing audiences with his masterful knowledge of the intricacies of the criminal

justice system and feel for the emotions that make people tick.

*Dig Dig Digging ABC* Margaret Mayo, 2017-08-22 Race through the alphabet in this action-packed A to Z of things that go. From ambulances and diggers to yachts and zooming rockets, Dig Dig Digging ABC is a bright and busy book packed with all the vehicles that children love

**Death at the Ballpark** Robert M. Gorman, David Weeks, 2015-10-13 When we think of baseball, we think of sunny days and leisurely outings at the ballpark--rarely do thoughts of death come to mind. Yet during the game's history, hundreds of players, coaches and spectators have died while playing or watching the National Pastime. In its second edition, this groundbreaking study provides the known details for 150 years of game-related deaths, identifies contributing factors and discusses resulting changes to game rules, protective equipment, crowd control and stadium structures and grounds. Topics covered include pitched and batted-ball fatalities, weather and field condition accidents, structural failures, fatalities from violent or risky behavior and deaths from natural causes.

Where There's Brass, There's Muck James Irvine, 2022-11-30 In the glorious May of 1998, the governors of the Tanswold School Trust are looking forward to a new era in which they are about to build a new dining hall for their independent school. However, the unbridled optimism soon turns to despondency as they realise that the bursar has been doing DIY stock-broking with a very large bequest which has provided security for the school. For the band of elderly socialites that form the governing body this is not just a disaster, but a scandal that attracts the attention of the fraud squad of the Middle Riding of Yorkshire Constabulary who open up a financial can of worms. And it's not just financial; the appalling standard of hygiene in the school dining hall leads to a serious outbreak of food-poisoning with heart-breaking consequences. The headmaster is placed under the spotlight and his management becomes more and more capricious as the spotlight is shone on

him. The remaining part of the summer term becomes more and more of a comedy of errors as he loses his grip. As for speech day...
