Dare to Lead Brené Brown, 2018-10-09 #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries *Brené Brown: Atlas of the Heart*! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver,

more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Creative Ideas for Ministry with the Aged Sue Pickering, 2014-09-30 *Creative Ideas for Ministry with the Aged* is a wise, timely and practical handbook that meets the urgent need for resources for ministry among the elderly. Written out of the author's own experience as a chaplain to a residential care community, it is suitable for ministers who visit the elderly; chaplains, pastoral visitors and caregivers; and all who help train others in elderly pastoral care. Part 1 explores the key theological elements of ministry with the aged, focusing on themes such as the sacrament of the present moment. It asks what constitutes spiritual care and conversation with those whose minds and bodies are failing? Part 2 provides simple service outlines for 'reconnecting with old treasures'; and includes liturgies for communion services, services of the word and remembering special days. Parts 3 and 4 offer imaginative ideas for pastoral practices and spiritual activities using prayer, song, laughter, memory, touch, anointing and more to address questions of loss, letting go,

forgiveness, dying and resurrection.

Alien Hunter: The White House Whitley Strieber, 2016-04-05 Alien Hunter: The White House is the electrifying third installment in Whitley Strieber's Alien Hunter series The aliens have seen many worlds, but they know that Earth in particular is a jewel. They lust for its soaring mountains, its shining seas, its gorgeous forests, and majestic deserts. There is just one part of the planet that they don't want: us. Flynn Carroll knows that the aliens are a race of brilliance and extraordinary cruelty. And he knows that they have found a way to eliminate humanity: capture the mind of the president of the United States. Control him, and you control the most powerful man in the world. Though Carroll is determined to stop the aliens from achieving their goal, the president remains ignorant of the danger that he and the rest of the planet are in. Real Estate Valuation Theory Manya M. Mooya, 2016-03-17 This monograph critically reviews and updates real estate valuation theory, which is based on neoclassical economics, in light of developments in heterodox economic theory. Building on a comprehensive historical account of the evolution of value theory, the book uses new institutional economics theory and critical realism as lenses through which problems in standard valuation theory and practice are expatiated, and as the foundation for an alternative theory. The new theory is employed to explain major problems in real estate valuation that are beyond the capability of the standard theory, such as price bubbles in real estate markets, anchoring bias, client influence and valuation under uncertain market conditions.

Be.You.Tiful sunita k. mani, 2016-10-14 Wouldnt it be awesome if you could have a conversation with someone about anything no matter how tricky the topic and still not be judged? Growth and conversations go hand in hand. Both represent each other. In a classical conversation, our aspirations, our thoughts, our sense of responsibility can all shift because we begin to perceive life differently after meeting different people. This allows us to arrive at new interpretations and choices that truly make greater sense and impact. As we dwell in a technology-driven era, our conversations are endangered because we have abandoned face-to-face conversations in the name of mere connections. If you are wanting, struggling, trying to find a place where you can learn and have conversations (even the hard ones), if you are ready to deepen your awareness, develop emotional flexibility, or simply tease your curiosity, this book is for you. In the book Be.you.tiful, author and

counselor Sunita K. Mani offers practical guidelines on how to deal with everyday issues big or small, addiction, infatuation, career, body image, parents, friendships, and more. It contains chunks of conversations related to different aspects that define the life of a young adult. Divided into short crisp segments of dialogues pertaining to a concerned topic, Sunita journeys through the minds of youngsters. Sunita has helped many young adults search their souls and find their answers to complex problems and a way out of tricky situations. She presents Be.you.tiful to help young people build their self-confidence, dismantle inner obstacles, and find the courage to chase their passion.

The U.S. Technology Skills Gap Gary J. Beach, 2013-07-10 Is a widening “skills gap” in science and math education threatening America’s future? That is the seminal question addressed in The U.S. Technology Skills Gap, a comprehensive 104-year review of math and science education in America. Some claim this “skills gap” is “equivalent to a permanent national recession” while others cite how the gap threatens America’s future economic, workforce employability and national security. This much is sure: America’s math and science skills gap is, or should be, an issue of concern for every business and information technology executive in the United States and The U.S Technology Skills Gap is the how-to-get involved guidebook for those executives laying out in a compelling chronologic format: The history of the science and math skills gap in America Explanation of why decades of astute warnings were ignored Inspiring examples of private company efforts to supplement public education A pragmatic 10-step action plan designed to solve the problem And a tantalizing theory of an obscure Japanese physicist that suggests America’s days as the global scientific leader are numbered Engaging and indispensable, The U.S. Technology Skills

Gap is essential reading for those eager to see America remain a relevant global power in innovation and invention in the years ahead.

Strategic Communication for Sustainable Organizations Myria Allen, 2015-07-16 This is a seminal book for anyone who wants to understand, shape or study the communication surrounding sustainability in their interactions with colleagues, employees, supply chain partners and external stakeholders. It develops essential insights on the basis of an extensive review of relevant theories and research drawn from multiple disciplines. Interview data gathered from organization members who are currently communicating about sustainability in their cities, universities, nongovernmental organizations, small businesses and large for-profit organizations provide valuable insights from a practitioner's perspective. The interviewees represent organizations such as the Portland Trailblazers, Tyson Foods, the City and County of Denver and the Natural Resources Defense Council. Theory, research and interview comments combine in a reader-friendly way to provide practical insights and stimulate future research.

Doing Without Concepts Edouard Machery, 2009-02-27 In *Doing without Concepts*, Edouard Machery argues that the dominant psychological theories of concept fail to provide a coherent framework to organize our extensive empirical knowledge about concepts. Machery proposes that to develop such a framework, drastic conceptual changes are required.
