Princes, Priests and Warlords Alexander Degrade,2000-10 CLARREN sits fighting back tears

as a priest plucks out one strand of hair for every year of her life. When he finishes, she starts to rub the sore spots on her head, only to have the priest slap her hand away, warning that she is inviting witchcraft. As he finishes he warns Clarren to have her hair cut so that it does not go beyond her knee and to watch that what is cut away is burned immediately in a fire so that no one may use it to cast a spell on her. Before departing he warns her among other things to take care no one in her household destroys a cobweb, and to avoid black dogs, cats and hens. What has brought Clarren to such measures? She's getting married. She is taken from a very sheltered life to be a political pawn, where she is suppose to influence powerful people, as she is caught up in a power play for the throne from double-crosses to the return of an heir, long thought dead. Princes promise her loyalty, priests warn her of displeasing the gods, and warlords vie for more territory. Clarren must decide who she can trust.

Amek Gambar Peter Lee, 2020

Six Lost Years Amek Adler, 2017-05-15 How much longer could we last? sixteen-year-old Amek Adler laments, after arriving at yet one more concentration camp in the spring of 1945. From the Lodz and Warsaw ghettos to the Radom forced labour camp, and from the Natzweiler concentration camp to Dachau, Amek has witnessed too much destruction and tragedy to bear any more suffering. To hold onto hope for his survival, he dreams of the life he had with his parents and three brothers, reminiscing about holidays, social events and dinners; he dreams of a life without pain and

starvation; and he dreams of the future. When Amek is finally liberated, he is determined to embrace all the opportunities that freedom offers.

How Do We Know This? Jay M. Harris, 2012-02-01

This book is a study of rabbinic legal interpretation (midrash) in Judaism's rabbinic, medieval, and modern periods. It shows how the rise of Reform, Conservative, and Orthodox Judaism in the modern period is tied to distinct attitudes toward the classical Jewish heritage, and specifically, toward rabbinic midrash halakah. What has gone unnoticed until now is the extent to which the fragmentation of modern Judaism is related to the interpretative foundations of classical Judaism. As this book demonstrates, spokespersons for any form of Judaism that engaged modernity on any level had to explain the basis for their rejection or continued acceptance of the authority of rabbinically developed law. Inevitably and invariably, this need led them to address anew what were long-standing questions regarding the ancient interpretations of biblical law. Were they compelling? Were they reasonable? Were they still relevant? Each form of Judaism fashioned its own response to these challenges, and each argued forcefully against the responses of the other denominations. Jay M. Harris describes the fragmentation of modern Judaism in terms of each denomination's relationship to classical Judaism's system of interpretation in part two of this book.

The Disposition of Ashes: Volume Two K. M. Frontain, 2016-11-20 The Ulmeniran army is on the march for home, and with it rides Herfod, the

mortal avatar of an inscrutable god who has defied the comprehension of the pantheon for aeons beyond count. Ufrid, uncrowned king of Ulmenir, is well aware of what he takes to bed each night, but it hasn't been easy, and life isn't getting easier. His brother has returned from travels afar with a god in tow, a satyr who may well know who and what Herfod is. Worse yet, there is a secret watcher in the heavens, and he seems disapproving of the current path Herfod has chosen to take in life.

Jewish Law and Contemporary Issues J. David Bleich, Arthur J. Jacobson, 2015-09-18 Organized as a series of authoritative discussions, this book presents the application of Jewish law - or Halakhah - to contemporary social and political issues. Beginning with the principle of divine revelation, it describes the contents and canons of interpretation of Jewish law. Though divinely received, the law must still be interpreted and 'completed' by human minds, often leading to the conundrum of divergent but equally authentic interpretations. Examining topics from divorce to war and from rabbinic confidentiality to cloning, this book carefully delineates the issues presented in each case, showing the various positions taken by rabbinic scholars, clarifying areas of divergence, and analyzing reasons for disagreement. Written by widely recognized scholars of both Jewish and secular law, this book will be an invaluable source for all who seek authoritative guidance in understanding traditional Jewish law and practice.

Progress and Problems in Atmospheric Chemistry
John R Barker, 1995-12-26 Atmospheric chemistry is central to understanding global changes – ozone depletion, appearance of the polar ozone holes, and compositional changes which worsen the

greenhouse effect. Because of its importance, work is progressing on many fronts. This volume emphasizes the troposphere and stratosphere and has chapters on gas phase, condensed phase, and heterogeneous chemistry. Present progress is emphasized, and important future directions are also described. This book fills a need not satisfied by any others and will be popular for some years to come. It informs students and newcomers to the field of the many facets of atmospheric chemistry and can be used as a text for advanced students. It is also a valuable desk reference summarizing activities by quite a number of the most active research groups. Chapter 18 by Kolb et al. on heterogeneous chemistry is especially noteworthy because it represents a unique joint effort by several groups working on a very timely subject; they describe a conceptual framework and establish conventions which will be standard in future papers on this subject.

Contents: A Brief Introduction to Atmospheric Chemistry (J R Barker) Chemistry of Ozone in the Urban and Regional Atmosphere (J H Seinfeld) Depletion of Tropospheric Ozone during Arctic Spring: Field and Laboratory Studies of the Role of Hydrocarbons (H Niki) Inverse Methods in Atmospheric Chemistry (R Prinn & D Hartley) NO_x in the Non-Urban Troposphere (M A Carroll & A M Thompson) Laser Fluorescence Detection of Atmospheric Hydroxyl Radicals (D R Crosley) Photooxidation of Selected Carbonyl Compounds in Air: Methyl Ethyl Ketone, Methyl Vinyl Ketone, Methacrolein and Methylglyoxal (W H Raber & G K Moortgat) Free Radical Chemistry of the

Shadow of the Mountain (Shadow of the Mountain Book #1) Cliff Graham, 2015-04-28 Caleb and Joshua Roar to Life in this High-Impact Old Testament Saga Two men were brave enough to tell the truth about what awaited the Hebrews in Canaan. This is their story. From the slave pits of Egypt to the efforts of an eighty-five-year-old Caleb as he drives out the last of the giants, Shadow of the Mountain is a vivid portrait of two of God's chosen champions, and a meditation on masculine mentorship and the challenges and blessings of growing older. For the sake of his new God and his loyalty to his friend Joshua, Caleb will not spend his twilight years resting, but taking the battle

to the enemies of God's people until his dying breath. From his early days as a mercenary for Pharaoh in Egypt watching the Hebrews suffer under the yoke of slavery, all the way through a desperate fight with giants in the dark forests of the hill country, this is a story filled with epic battles, gritty intensity, and supernatural events that made Graham's Lion of War series a hit. Shadow of the Mountain is sure to ignite a love for the Old Testament in popular culture.

Infochemistry Konrad Szacilowski, 2012-04-25
Infochemistry: Information Processing at the Nanoscale, defines a new field of science, and describes the processes, systems and devices at the interface between chemistry and information sciences. The book is devoted to the application of molecular species and nanostructures to advanced information processing. It includes the design and synthesis of suitable materials and nanostructures, their characterization, and finally applications of molecular species and nanostructures for information storage and processing purposes. Divided into twelve chapters; the first three chapters serve as an introduction to the basic concepts of digital information processing, its development, limitations and finally introduces some alternative concepts for prospective technologies. Chapters four and five discuss traditional low-dimensional metals and semiconductors and carbon nanostructures respectively, while further chapters discuss Photoelectrochemical photocurrent switching and related phenomena and self-organization and self-assembly. Chapters eight, nine and ten discuss

information processing at the molecular level, and eleven describes information processing in natural systems. The book concludes with a discussion of the future prospects for the field. Further topics: Traditional electronic device development is rapidly approaching a limit, so molecular scale information processing is critical in order to meet increasing demand for high computational power Characterizes chemical systems not according to their chemical nature, but according to their role as prospective information technology elements Covers the application of molecular species and nanostructures as molecular scale logic gates, switches, memories, and complex computing devices This book will be of particular interest to researchers in nanoelectronics, organic electronics, optoelectronics, chemistry and materials science.
