A Patient's Guide to Dental Implants William Becker,Thomas Balshi,Edmond Bedrossian, D.D.S.,2003-04-01 Do You Need Teeth Replacement? Are you missing a tooth? Several teeth? If so, perhaps you're like many individuals--you already wear a bridge or dentures or are considering them. But have you considered dental implants? They are permanent teeth that are inserted into the jawbone and function like natural teeth. They offer a more natural appearance and greater comfort than bridges or dentures. Although the trend toward dental implants is growing rapidly, you, like many consumers, may not fully understand how they work. The doctors who wrote this book recognized the need for consumer information. All specialists in dental implants, they provide answers to such questions as: - What are the benefits of dental implants? - Who is a candidate for dental implants? - How are the implants inserted? - Are the procedures painful? - How long do implants last? - Are there risks or possible complications? - How do you choose a qualified dentist or specialist? - What follow-up care is required? The Southern California Dental Patient Guidebook; Perfect Crowns and Smiles in One Day Steven Sutherland,2014-07-08 Dental Technology has come far in the past decade. This patient guide creates better understanding of the options available in crowns and cosmetic dentistry that remove most of the hassles of traditional dental procedures while improving patient satisfaction, giving better results and providing all the benefits of comfortable chewing and an attractive smile. Cosmetic crowns can now be made in as a little as one hour on the same day. Walk in, have a broken or damaged tooth repaired with a cosmetic ceramic that's 3X stronger than traditional porcelains used by many dentists, and walk out an hour later. Not long ago this was unimaginable. Now in practices like Torrance Dental Arts patients experience it on a daily basis and you can too. A tiny group of advanced dental practices in North America have also gone beyond this advancement and use a new protocol called Perfect Smile in One Day which allows an entirely new smile to be created and finished on the same day. New technologies combined in a unique way make this possible

including: \*Cerec; a digital technology that prints crowns 3X stronger than traditional cosmetic porcelains and prints on the spot in minutes instead of weeks like in a typical dental practice. \*The Digital Smile Preview System; a 100% painless way of showing unlimited previews of how new smiles will appear in the mouth before any irreversible treatment is performed. \*Try Before You Buy Veneers; an exclusive verification technology that allows the digital smile to be physically previewed (tried) in the mouth to verify that the digital preview looks the same in the real world. Dr. Steven J. Sutherland is the founder of Torrance Dental Arts located in South Bay Los Angeles. He's the Chief Clinical Instructor for the Painless Dental Alliance; dentistry's only dentist and dental hygiene organization specifically focused on dentistry and patient experiences that are free from physical pain. He teaches other doctors inside and outside his practice on new technologies advancing the art and science of dentistry. His extensive training and experience allows him to predictably treat patients with even the most challenging dental situations; in many cases in one day. Advanced learning and scientifically proven innovations are a constant for his team of skilled professionals. Beyond this technical expertise, their down to earth and easy to understand communication style makes even the most complex dentistry easy to understand.

**Dentistry in the United States** American Council on Education. Commission on the Survey of Dentistry in the United States,1960 Basically, the problem which this Commission was called upon to investigate is simple enough. It is the widespread incidence of dental and oral diseases in the United States. Americans have in the neighborhood of 700 million untreated cavities -- an average of nearly four each. By age fifty, nearly 50 percent of Americans have developed the periodontal (gum) ailments which among adults cause more tooth loss than is caused by decay; by age sixty-five, nearly 100 percent. Thousands of persons have other correctable oral disorders that go unnoticed and untreated. The problem becomes more than a statistical one: not that a vast amount of dental disease exists, but that the American society has the resources to combat this disease and is not using them to the fullest. - Introduction.
