More than Medicine Robert M. Kaplan,2019-02-01 American science produces the best medical treatments in the world. Yet U.S. citizens lag behind in life expectancy and quality of life. Robert Kaplan marshals extensive data to make the case that U.S. health care priorities are sorely misplaced—invested in attacking disease, not in solving social problems that engender disease in the first place.

Crossing the Quality Chasm Institute of Medicine,Committee on Quality of Health Care in America,2001-07-19 Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

The Birth of Grapevine Health Lisa K. Fitzpatrick,2023-09-18 The COVID-19 pandemic has taught the world many things, but one of the most crucial is the need to communicate tailored health information through trusted messengers effectively. The Birth of Grapevine Health chronicles the experiences of one physician, Dr. Lisa Fitzpatrick, a CDC-trained medical epidemiologist on a mission to deliver trusted health information to the Black community through Grapevine Health, a community and health outreach organization she started with the aim to improve patient engagement and health literacy in underserved communities through the digital delivery of tailored health messages. Fitzpatrick reveals why she began building an organization that, in 2020, appeared tailored for the COVID-19 pandemic long before that crisis unfolded across the globe. Frustrated by the lack of progress in addressing health inequity, Dr. Lisa moved into an under-resourced community to become proximal enough to better understand health inequity and the structural and policy changes needed to address it. She weaves her professional experiences with storytelling and lessons learned into a call to action for healthcare leaders, decisionmakers, and funders to move beyond data collection and shift toward action to focus on health

prevention, move our health support further upstream and, ultimately, improve health outcomes for underserved communities. The Birth of Grapevine Health is part memoir, part health equity playbook, and offers a roadmap to actions needed to achieve health equity. At a time when health equity conversations seem ubiquitous, what sets The Birth of Grapevine Health apart is its embrace and integration of community voice. This book delivers deep insights and, at times, uncomfortable advice through the eyes of Black and brown patients and their communities about what it will take to achieve health equity.
