*The Roulette Supernova System (RSS15)* Stephen Tabone,2020-01-22 The Roulette Supernova System (RSS15) / Flat Betting 15 Numbers into Profit - For use on European or American Roulette Wheels / The automatized skill of The Roulette Supernova System RSS15 is capable of outperforming the cleverest of computer programmes and the seasoned professional roulette bettor. It is the ultimate roulette predicting system. For use on European or American Roulette Wheels. / I am very excited to write about my new Roulette System. If you are looking for a roulette system that actually works, i.e. one that is able to make a profit during a Roulette session (certain amount of games/spins) most of the time, then look no further. This is it! The Roulette Supernova System (RSS15) works on single, double and triple zero 'live' wheels. When I write live, I mean human dealer-initiated games that are truly random and where games are conducted in regulated casinos, not online, non-random algorithms or manipulated air wheels.After developing and testing RSS15, I discovered an anomaly. Now, when I observe live roulette wheels in casinos, I began to see roulette as all very easy and predictable. In using RSS15, I now consider a wheel as being small and the games in motion not so complex in terms of being able to generate profits.For more than 20 years I have studied bet selection options on the table layout in relation to previous outcomes. I have observed sequences of outcomes and considered the probabilities of one and more numbers appearing in any one session of play pertaining to a limited number of games. I have analysed many hundreds of thousands of live and random computer-generated outcomes. I have played and watched countless players bet in various casinos, considering why we chose the number/s we do and on what basis we believe those number/s have a chance of occurring moreover in most instances before the dealer has even spun the ball.No doubt you would have realized too that Roulette is a hard game to beat. I thought so too until I started to look at what drives the game. And by this, I mean the dealer, ball, wheel relationship. You see most people who play Roulette focus on their numbers, their lucky numbers, or where the dolly marker is placed on the table betting layout from spin to spin or go against or going with streaks of even chances or any of the 2-to-1 pay-out betting option odds. On the whole players are struggling to maintain not only a profitable advantage but are fighting to keep their bankrolls alive. It is like trying to keep a patient alive on life support while the vampire dealers, the casino bosses and demon house edge conspire to suck the blood from the poor souls. There are two main elements to winning when playing Roulette. The first is knowing when to stop and the second is knowing how to get to the profitable side of stopping. To know how to achieve both in order to win as an Advantage Player and Pro Roulette player, you need a proven Roulette System that will deliver. One that is able to hold its own on 'any live Roulette wheel' and you will need to learn when you should take profits and end a session and why this is important. I cover all these aspects in this book as I explain what my roulette system is, how and why it works and how to apply it in practice. Roulette Odds and Profits Catalin Barboianu,2008 Continuing his series of books on the mathematics of gambling, the author shows how a simple-rule game such as roulette is suited to a complex mathematical model whose applications generate improved betting systems that take into account a player's personal playing criteria. The book is both practical and theoretical, but is mainly devoted to the application of theory. About two-thirds of the content is lists of categories and sub-categories of improved betting systems, along with all the parameters that might stand as the main objective criteria in a personal strategy - odds, profits and losses. The work contains new and original material not published before. The mathematical chapter describes complex bets, the profit function, the equivalence between bets and all their properties. All theoretical results are accompanied by suggestive concrete examples and can be followed by anyone with a minimal mathematical background because they involve only basic algebraic skills and set theory basics. The reader may also choose to skip the math and go directly to the sections containing applications, where he or she can pick desired numerical results from tables. The book offers no new so-called winning strategies, although it discusses them from a mathematical point of view. It does, however, offer improved betting systems and helps to organize a player's choices in roulette betting, according to mathematical facts and personal strategies. It is a must-have roulette handbook to be studied before placing your bets on the turn of either a European or American roulette wheel.

Roulettechess Randall S. Marshall,2009-12-06 Roulettechess is a unique roulette textbook with over a hundred American and French flexible game strategies, including basic roulette playing instructions. The strategies are designed to show players how to reduce risk by selecting offensive and defensive numbers for the same spin of the wheel. A player can select a return on various offensive and defensive combinations. A preferred strategy, as selected by a player, might be based on wheel coverage, risk, simplicity of layout, return on wager, manageability of strategy, flexibility, mixture of offensive and defensive numbers, location of offensive and defensive number on the layout, a player's time constraints, and approximately one hundred dollars to play American Roulette. An equivalent amount is required to play French Roulette. Some strategies have suggestions on how to change the coverage by substituting one or two numbers. The front of the book has wheel coverage diagrams, used as an index for 130 drawings that follow. The book frontage also has interesting Wager and Time Table Guides which simply show how a player, with only eighty one dollars (\$81.00) can play 21 American Roulette Games at \$21.00 each game, have only defensive wins of \$17.00, and have \$21.00 left at the end of playing the 21 games.

Roulette Strategy - Dozens and Columns Using CONTROL Johnny Depot,2012-10-31 Roulette Strategy -Dozens & Columns using C.O.N.T.R.O.L. teaches the gambler an

effective and winning system when playing american roulette. Many casino players are lured to the roulette wheel, but have no idea on how to attack casino roulette. Most players over-bet and make bad decisions like betting on favorite numbers, birthdays and many other foolish things. If you want to play with the roulette odds in your favor, then you need to have a plan. My book provides a complete plan and the best part is it works for casino roulette and internet roulette. It doesn't matter if you like to take a trip to the local casino, go to vegas or play roulette online since our roulette strategy works everywhere. The fact of the matter is that most roulette players lose money. I know, since I used to be one of them. I realized that if I wanted to have a chance at beating the roulette wheel, I needed to change my thinking. I needed to quit dreaming about the wheel barrow full of money I was going to win and start concentrating on how little I would lose. My roulette strategy needed to be simple, but my approach need to change. That's when I invented C.O.N.T.R.O.L. I knew how to play american roulette, but I had no concept of how to bet. C.O.N.T.R.O.L. gave me the answers I needed by answering the important questions like how much money do I bring to play roulette, which plays do I make (no matter if I was playing casino roulette or internet roulette) and how much do I bet. In today's era you can log into your computer and play roulette online twenty four hours a day, seven days a week. You need to have some kind of control (no pun intended) to keep yourself from going broke too fast. C.O.N.T.R.O.L. completes my roulette strategy and teaches mw how to make the most money when things are going good and more importantly when to stop and cut my losses down when things are going bad.
