Modelling and Implementation of Complex Systems Salim Chikhi, Abdelmalek Amine, Allaoua Chaoui, Djamel Eddine Saidouni, Mohamed Khireddine Kolladi, 2020-09-05 This proceedings book gives a new vision and real progress towards more difficult problems resolution. In trying to solve the problems we face every day in the complex world we are living, we are constantly developing artificial systems and increasingly complex middleware. Indeed, the research works contained in this book address a large spread of nowadays topics like IoT architectures, communication and routing protocols, smart systems, software defined networks (SDNs), natural language processing (NLP), social media, health systems, machine intelligence and data science, soft computing and optimization, and software technology. This book, which is a selective collection of research papers accepted by the international program committee of the 6th International Symposium on Modelling and Implementation of Complex Systems (MISC 2020), considers intelligence (CI) more as a way of thinking about problems. It includes a mix of old efficient (Fuzzy, NN, GA) and modern AI techniques (deep learning and CNN). The whole complex systems research community finds in this book an appropriate way to approach problems that have no algorithmic solution and finds many well-formulated technical challenges.

Financial Technology and the Law Doron Goldbarsht, Louis de Koker, 2022-02-04 Blockchains and cryptocurrencies, open banking, virtual assets, and artificial intelligence have become the buzzword of this decade. This book focuses on these 'disruptive' financial technologies that provide alternatives to the traditional financial services typically offered by regulated financial institutions. Financial technologies are characterized by the innovative ways in which they initiate, support or extend

traditional financial services or offer alternative financial pathways and products. However, these financial technologies also pose money laundering and terrorist and proliferation financing as well as cyber security risks that require mitigation. This edited volume addresses a range of regulatory and enforcement challenges related to financial technology and financial crime. The book responds to the United Nations' Sustainable Development Goals, in particular in relation to economic development, employment, national security, law enforcement and social well-being. Fostering responsible financial innovation promotes long-term economic growth, inclusion, and improved living standards. This book explores how to promote financial innovation while mitigating risks in a way that ensures financial prosperity and social inclusion.

Taxing Consumption in the Digital Age Katharina

Artinger, 2020-10-16 Die Digitalisierung hat enorme Auswirkungen auf die Grundidee der Mehrwertsteuer: den Austausch von Leistungen für Konsumzwecke. Die Dissertation konzentriert sich auf den Austausch von scheinbar kostenlosen Online-Dienstleistungen und die Zustimmung der Kunden zur Verwertung ihrer persönlichen Daten. Diese können der Mehrwertsteuer unterliegen, wobei die Bemessungsgrundlage auf Grundlage der Anbieterkosten berechnet werden muss. Die Ergebnisse basieren auf einer Analyse der EU-Mehrwertsteuer als Verbrauchsteuer im Vergleich zu anderen theoretischen Konsummodellen. Auch andere digitale Geschäftsmodelle, wie die Sharing Economy oder Bitcoins, können unter die Idee der EU-Mehrwertsteuer als Verbrauchsteuer subsumiert werden. Anti-Monopoly Law and Practice in China H. Stephen

Harris, Peter J. Wang, Mark A. Cohen, Yizhe Zhang, Sebastien J Evrard, 2011-07-05 The China Anti-Monopoly Law (AML), which became effective August 1, 2008, is the first comprehensive competition law enacted by China. The AML prohibits a broad array of agreements between competitors and commercial counterparties, as well as competitive conduct by single firms that may harm the competitive process. In addition, it establishes a mandatory administrative review procedure for mergers and acquisitions between companies meeting certain sales thresholds, globally or in China. Beyond these fundamental provisions, the AML prohibits certain types of administrative abuses believed to be prevalent in China and establishes a complex set of administrative agencies with broad powers to enforce the law.

Anti-Monopoly Law and Practice in China is the first comprehensive treatment of the AML and the practice of antitrust law under this new system. Each chapter on the substantive provisions of the law includes practical advice on approaches to meeting the challenge of complying with the law's requirements, including analysis of likely interpretations and applications of the AML based on precedents in related economic laws and actions by other administrative agencies. Where policy choices are uncertain, the text will explore probable developments in China based on comparable applications of competition laws in other jurisdictions.
