Amp It Up Frank Sloodman,2022-01-13 Wall Street Journal, USA Today, and Publishers Weekly Bestseller The secret to leading growth is your mindset Snowflake CEO Frank Sloodman is one of the tech world's most accomplished executives in enterprise growth, having led Snowflake to the largest software IPO ever after leading ServiceNow and Data Domain to exponential growth and the public market before that. In Amp It Up: Leading for Hypergrowth by Raising Expectations, Increasing Urgency, and Elevating Intensity, he shares his leadership approach for the first time. Amp It Up delivers an authoritative look at what it takes to transform an organization for maximum growth and scale. Sloodman shows that most leaders have significant room to improve their organization's performance without making expensive changes to their talent, structure, or fundamental business model—and they don't need to bring in an army of consultants to do it. What they do need is to align people around what matters and execute with urgency and intensity every day. Leading for unprecedented growth means declaring war on mediocrity, breaking the status quo, and making conflicted choices daily, all with a relentless focus on the mission. Amp It Up provides the first principles to guide that change, and the tactical advice for organizing a company around them. Perfect for executives, entrepreneurs, founders, managers, and leaders of all kinds, Amp It Up is a must-read resource for anyone who seeks to unleash the growth potential of a company and scale it to heights they never thought possible.

The Riau Islands Francis E Hutchinson,Siwage Dharma Negara,2021-07-22 To Singapore's immediate south, Indonesia's Riau Islands has a population of 2 million and a land area of 8,200 sq kilometers scattered across some 2,000 islands. The better-known islands include Batam, the province's economic motor; Bintan, the area's cultural heartland and site of the provincial capital, Tanjungpinang; and Karimun, a ship-building hub strategically located near the Straits of Malacca. Leveraging on its proximity to Singapore, the Riau Islands—and particularly Batam—has been a key part of Indonesia's strategy to develop its manufacturing sector since the 1990s. In addition to generating a large number of formal sector jobs and earning foreign exchange, this reorientation opened the way for a number of far-reaching political and social developments. Key among them has been: large-scale migration from other parts of the country; the secession of the Riau Islands from the larger Riau Province; and the creation of a new provincial government. Building on earlier work by the ISEAS – Yusof Ishak Institute on the SIJORI Cross-Border Region, spanning Singapore, the Malaysian state of Johor, and the Riau Islands, and a second volume looking specifically at Johor, the third volume in this series explores the key challenges facing this fledgling Indonesian province.

Social Context Reform Paul Thomas,Brad J. Porfilio,Julie Gorlewski,Paul R. Carr,2014-06-20 Currently, both the status quo of public education and the No Excuses Reform policies are identical. The reform offers a popular and compelling narrative based on the meritocracy and rugged individualism myths that are supposed to define American idealism. This volume will refute this ideology by proposing Social Context Reform, a term coined by Paul Thomas which argues for educational change within a larger plan to reform social inequity—such as access to health care, food, higher employment, better wages and job security. Since the accountability era in the early 1980s, policy, public discourse, media coverage, and scholarly works have focused primarily on reforming schools themselves. Here, the evidence that school-only reform does not work is combined with a bold argument to expand the discourse and policy surrounding education reform to include how social, school, and classroom reform must work in unison to achieve goals of democracy, equity, and opportunity both in and through public education. This volume will include a wide variety of essays from leading critical scholars addressing the complex elements of social context reform, all of which address the need to re-conceptualize accountability and to seek equity and opportunity in social and education reform.

Dynamic Matter Jennifer Linhart Wood,2022-05-03 Dynamic Matter investigates the life histories of Renaissance objects. Eschewing the critical tendency to study how objects relate to human needs and desires, this work foregrounds the objects themselves, demonstrating their potential to transform their environments as they travel across time and space. Integrating early modern material theories with recent critical approaches in Actor-Network Theory and object-oriented ontology, this volume extends Aristotle's theory of *dynamis*—which conceptualizes matter as potentiality—and applies it to objects featured in early modern texts such as Edmund Spenser's *The Faerie Queene*, Robert Hooke's *Micrographia*, and William Shakespeare's *The Tempest*. Individual chapters explore the *dynamis* of matter by examining its manifestations in particular forms: combs are inscribed with words and brushed through human hair; feathers are incorporated into garments and artwork; Prince Rupert's glasswork drops explode; a whale becomes animated by the power of a magical bracelet; and books are drowned. These case studies highlight the potentiality matter itself possesses and that which it activates in other matter. A theorization of objects grounded in Renaissance materialist thought, *Dynamic Matter* examines the richness of things themselves; the larger, multiple, and changing networks in which things circulate; and the networks created by these transformative objects. In addition to the editor, the contributors to this volume include Anna Riehl Bertolet, Erika Mary Boeckeler, Naomi Howell, Emily E. F. Philbrick, Josie Schoel, Maria Shmygol, Edward McLean Test, Abbie Weinberg, and Sarah F. Williams.
