Marketing Destinations and Venues for Conferences, Conventions and Business Events Tony Rogers, Rob Davidson, 2015-11-19 Marketing Destinations and Venues for Conferences, Conventions and Business Events introduces students to key areas of marketing and promotion that are essential if destinations are to compete successfully in the rapidly expanding global business event sector. It achieves this by looking at issues surrounding business event marketing, strategic planning, destination and venue selling strategies and future challenges. The 2nd Edition has also been updated to include: New content on: destination marketing organisations' and venues' use of technology, use and impact of social media, sponsorship and partnership issues, economic changes as well as their responses to demand for sustainable meetings locations Updated and new case studies on growth areas and emerging markets e.g. Middle East, Asia, Eastern Europe/Russia, Africa and South America, but also to include material on mature markets, destinations and venue operators A genuinely international focus in terms of content and examples New review and discussion questions and, where appropriate, learning outcomes New online resource package for students and lecturers including: weblinks, power point slides and project questions (coming soon). Accessible, global and informative, this is essential reading for all future business event and conference managers.

Preventing Terrorist Attacks at Sea Robin Bowley, 2022-12-23 Over recent decades, it has been widely recognised that terrorist attacks at sea could result in major casualties and cause significant disruptions to the free flow of international shipping. After discussing the overlaps and distinctions between piracy and maritime terrorism, this book considers how the International Ship and Port Facility Security Code, and other vessel identification and tracking measures in the 1974 International Convention for the Safety of Life at Sea, would be likely to reduce the risk of terrorist attacks at sea. It explains how the 1982 United Nations Convention on the Law of the Sea is less than clear on the powers of states to protect offshore installations, submarine cables and pipelines from interference by terrorists. In light of these uncertainties, it considers how the 2005 Protocol to the Convention for the Suppression of Unlawful Acts Against Maritime Navigation, the doctrine of necessity and states' inherent self-defence rights might apply in the maritime security context. A significant contribution of the book is the formulation of the Maritime Terrorism Threat Matrix, which provides a structured framework for examining how maritime terrorism incidents have occurred, and might occur in the future. The book also examines the relevant national maritime security legislation for preventing maritime terrorist attacks in the United Kingdom and in Australia. The book concludes by formulating guidelines for the unilateral interdiction of suspected terrorist vessels in exceptional circumstances, and recommending priorities for governments and international maritime industries to focus on in order to reduce the risk for terrorist attacks at sea. It will be of interest to those working in the areas of Law and Terrorism, Law of the Sea, Maritime Law and Insurance and International Law.

Maritime Men of the Asia-Pacific Diane Kirkby, 2022-09-15 Winner of the Australia and New Zealand Law and History Society (ANZLHS) Prize for 2023 Maritime workers occupy a central place in global labour history. This new and compelling account from Australia, shows seafaring and waterside unions engaged in a shared history of activism for legally regulated wages and safe liveable conditions for all who go to sea. Maritime Men of the Asia-Pacific provides a corrective to studies which overlook this region's significance as a provider of the world's maritime labour force and where unions have a rich history of reaching across their differences to forge connections in solidarity. From the 'militant young Australian' Harry Bridges whose progressive unionism transformed the San Francisco waterfront, to Australia's successful implementation of the Maritime Labour Convention 2006, this

is a story of vision and leadership on the international stage. Unionists who saw themselves as internationalists were also operating within a national and imperial framework where conflicting interests and differences of race and ideology had to be overcome. Union activists in India, China and Japan struggled against indentured labour and 'coolie' standards. They linked with their fellow-unionists in pursuing an ideal of international labour rights against the power of shipowners and anti-union governments. This is a complex story of endurance, cooperation and conflict and its empowering legacy.

Environmental Security in the Arctic Ocean Paul Arthur Berkman, Alexander N. Vylegzhanin, 2012-11-29 This seminal book results from a NATO Advanced Research Workshop at the University of Cambridge with Russian co-directorship, enabling the first formal dialogue between NATO and Russia about security issues in the Arctic Ocean. Involving interdisciplinary participation with experts from 17 nations, including all of the Arctic states, this workshop itself reflects progress in Arctic cooperation and collaboration. Interests now are awakening globally to take advantage of extensive energy, shipping, fishing and tourism opportunities in the Arctic Ocean as it is being transformed from a permanent sea-ice cap to a seasonally ice-free sea. This environmental state-change is introducing inherent risks of political, economic and cultural instabilities that are centralized among the Arctic states and indigenous peoples with repercussions globally. Responding with urgency, environmental security is presented as an integrated approach for assessing and responding to the risks as well as the opportunities generated by an environmental state-change. In this book – diverse perspectives on environmental security in the Arctic Ocean are shared in chapters from high-level diplomats, parliamentarians and government officials of Arctic and non-Arctic states; leaders of Arctic indigenous peoples organizations; international law advisors from Arctic states as well as the United Nations; directors of inter-governmental organizations and non-governmental organizations; managers of multi-national corporations; political scientists, historians and economists; along with Earth system scientists and oceanographers. Building on the “common arctic issues” of “sustainable development and environmental protection” established by the Arctic Council – environmental security offers an holistic approach to assess opportunities and risks as well as develop infrastructure responses with law of the sea as the key “international legal framework” to “promote the peaceful uses” of the Arctic Ocean. With vision for future generations, environmental security is a path to balance national interests and common interests in the Arctic Ocean for the lasting benefit of all.

Places of Refuge for Ships Aldo E. Chircop, Olof Lindén, 2006 Written by scholars and practitioners, this work consists of 20 multidisciplinary chapters addressing the law, policy and management aspects of the problem of places of refuge for ships in need of assistance. Specific chapters focus on the experiences and approaches of Australia, Belgium, Canada, Denmark, Germany, United Kingdom and United States.

Transport Law in Australia John Livermore, 2023-08-20 John Livermore's succinct monograph provides a useful overview of Australian transport law, as of July 2017... This is a readable and useful publication which provides a good summary of Australian transport law. Simon Baughen, Professor of

Shipping Law, Swansea University /Artho Cyraith Llongau. Extract from full review of the 3rd edition in Journal of International Maritime Law, January 2020

Transport Law in Australia is a clear and well researched resource covering all modes of transport. It should be the first port of call for logistic professionals, transport lawyers and students when seeking to understand the legalities of transport in Australia. Russell Wiese, Director CTG Law

This updated edition of Transport Law in Australia describes the main sources of transport law, jurisdiction and courts, state immunity, and the legal role of transport intermediaries. The scope of the book is broad in that it encompasses maritime, road, rail, air, and multimodal transport law. Almost half the book is devoted to maritime and shipping law which, for an island nation with over 95% of its international trade carried by sea, is as important as it is unsurprising. Whilst works of this nature have the potential to be a 'dry' read, in this case the author has taken an approach which makes the book eminently readable and usable. The text is well supported by in-depth research and enhanced with comprehensive referencing, footnotes, tables of cases and statutes, as well as a selected bibliography. With Australian society and the economy vitally dependent on all modes of transport this book will be a valuable addition for many in the transport community. This includes transport operators, shippers and freight forwarders, transport regulators and lawyers, as well as academics, researchers and students engaged in the study of transport. The author's practical and masterful approach to the subject should go a long way to ensuring the success of Transport Law in Australia as well as being a valuable addition to the body of literature on this important topic. Barrie Lewarn, Professor, Australian Maritime College, National Centre for Ports and Shipping, University of Tasmania

Maritime Security Natalie Klein, Joanna Mossop, Donald R. Rothwell, 2009-10-16 This volume identifies those issues that affect Australia and New Zealand's maritime security, evaluating the issues from legal and political perspectives, as well as examining the issues within the broad framework of international law and politics. The book also addresses considerations in the Pacific, Asian and Antarctic regions.

Routledge Handbook of National and Regional Ocean Policies Biliana Cicin-Sain, David Vanderzwaag, Miriam C. Balgos, 2015-05-15 This comprehensive handbook, prepared by leading ocean policy academics and practitioners from around the world, presents in-depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross-cutting and integrated national and regional ocean policy. All chapters follow a common framework for policy analysis. While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean (such as shipping, fishing, oil and gas development), in the last two decades, the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated, ecosystem-based vision for the governance of ocean areas under their jurisdiction. This includes goals and procedures to harmonize existing uses and laws, to foster sustainable development of ocean areas, to protect biodiversity and vulnerable resources and ecosystems, and to coordinate the actions of the many government agencies that are typically involved in oceans affairs. The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992, 2002, and 2012 sustainable development summits. The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated, precautionary, and anticipatory. Overall, the book provides a definitive state-of-the-art review and analysis of national and regional ocean policies around the world.

The Doctor-Activist Ellen L. Bassuk, Rebecca W. Carman, 2013-11-11 This compelling book traces the lives of ten doctors who have devoted their

careers to helping disadvantaged patients while forwarding important social issues. An inspiring collection of dramatic autobiographical accounts, *The Doctor-Activist* shows how the exceptional humanity and idealism of these doctors helped to advance many struggles and movements, including civil rights, women's rights, world peace, environmental protection, and universal access to health care, among others. Considered together, their stories raise many of the salient issues and ethical questions that confront the doctor choosing, creating, and living the life of an activist.

Oil Spills First Principles B. Ornitzi, M. Champ, 2002-06-18 Marine oil spills are no longer considered unavoidable accidents resulting from adverse environmental conditions or functions of catastrophic events. More than 80% of all spills are the result of human error. The focus of the current legal, regulatory, and convention framework affecting the transportation of oil by ship reflects a recent change in public attitude, in which there is an insistence upon protection of the world's marine environments, particularly coastal ecosystems. The outcome of such global attention is the creation of significant legal and political motivators for a cultural shift by the oil shipping industry, from an evasion culture to a safety culture. The new safety culture connotes continuous improvement in ship operations and a willingness to adopt the evolving concepts of communication at all levels, better trained and qualified personnel on board ship, emphasis of safety from top down, and proactive institution of safety management systems. Mere compliance with international and national laws is no longer sufficient for future sustainable shipping. These changes and advancements in understanding the science and engineering of oil spills are the focus of this book on *Oil Spills First Principles*. They are Prevention, based upon adoption of the safety culture, and Best Response, utilizing scientific, technical and environmental data and information. Over the past 30 years, billions of US dollars have been spent in R&D planning, response and clean up of oil spills. All of these efforts have focused on achieving Best Response. The concept of time periods of Technology Windows-of-Opportunity for a given response and clean up technology has developed from the leadership and wisdom of researchers and responders from many nations using modeling of the weathering of spilled oil and technology effectiveness. The Windows-of-Opportunity strategy provides a scientific basis for policy and decision-making in oil spill planning, response, and training. A global paradigm shift is needed to more effectively utilize and expedite the application of lessons learned in both prevention and clean up. Recognition of economic, political, and legal benefits accruing from environmental protection is good for business and critical for sustainable shipping.
