Designing Web Navigation James Kalbach, 2007-08-28 Thoroughly rewritten for today's web environment, this bestselling book offers a fresh look at a fundamental topic of web site development: navigation design. Amid all the changes to the Web in the past decade, and all the hype about Web 2.0 and various rich interactive technologies, the basic problems of creating a good web navigation system remain. Designing Web Navigation demonstrates that good navigation is not about technology—it's about the ways people find information, and how you guide them. Ideal for beginning to intermediate web designers, managers, other non-designers, and web development pros looking for another perspective, Designing Web Navigation offers basic design principles, development techniques and practical advice, with real-world examples and essential concepts seamlessly folded in. How does your web site serve your business objectives? How does it meet a user's needs? You'll learn that navigation design touches most other aspects of web site development. This book: Provides the foundations of web navigation and offers a framework for navigation design Paints a broad picture of web navigation and basic human information behavior Demonstrates how navigation reflects brand and affects site credibility Helps you understand the problem you're trying to solve before you set out to design Thoroughly reviews the mechanisms and different types of navigation Explores information scent and information shape Explains persuasive architecture and other design concepts Covers special contexts, such as navigation design for web applications Includes an entire chapter on tagging While Designing Web Navigation focuses on creating navigation systems for large, information-rich sites serving a business purpose, the principles and techniques in the book also apply to small sites. Well researched and cited, this book serves as an excellent reference on the topic, as well as a superb teaching guide. Each chapter ends with suggested reading and a set of questions that offer exercises for experiencing the concepts in action.

*Map Reading and Land Navigation* Department of the Army, 2015-12-31 The field manual provides a standardized source document for Army-wide reference on map reading and land navigation. It applies to every soldier in the army regardless of service branch, MOS, or rank. This manual also contains both doctrine and training guidance on map reading and land navigation. Part One addresses map reading and Part Two, land navigation. The appendices include an introduction to orienteering and a discussion of several devices that can assist the soldier in land navigation. For soldiers, hunters, climbers, and hikers alike, this is the definitive guide to map reading and navigation.

*Places of Invention* Arthur P. Molella, Anna Karvellas, 2015-06-30 The companion book to an upcoming museum exhibition of the same name, Places of Invention seeks to answer timely questions about the nature of invention and innovation: What is it about some places that sparks invention and innovation? Is it simply being at the right place at the right time, or is it more than that? How does “place”—whether physical, social, or cultural—support, constrain, and shape innovation? Why does invention flourish in one spot but struggle in another, even very similar location? In short: Why there? Why then? Places of Invention frames current and historic conversation on the relationship between place and creativity, citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History's Lemelson Center for the Study of Invention and Innovation. The book is built around six place case studies: Hartford, CT, late 1800s; Hollywood, CA, 1930s; Medical Alley, MN, 1950s; Bronx, NY, 1970s; Silicon Valley, CA, 1970s-1980s; and Fort Collins, CO, 2010s. Interspersed with these case studies are dispatches from three “learning labs” detailing Smithsonian Affiliate museums' work using Places of Invention as a model for documenting local invention and innovation. Written by exhibition curators, each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people, ready resources, and inspiring surroundings. Like the locations it explores, Places of Invention shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond.

*Transit Maps of the World* Mark Ovenden, 2015-11-03 A completely updated and expanded edition of the cult bestseller, featuring subway, light rail, and streetcar maps from New York to Nizhny Novgorod. *Transit Maps of the World* is the first and only comprehensive collection of historical and current maps of every rapid-transit system on earth. In glorious, colorful graphics, Mark Ovenden traces the cartographic history of mass transit—including rare and historic maps, diagrams, and photographs, some available for the first time since their original publication. Now expanded with thirty-six more pages, 250 city maps revised from previous editions, and listings given from almost a thousand systems in total, this is the graphic designer's new bible, the transport enthusiast's dream collection, and a coffee-table essential for everyone who's ever traveled in a city.

Visualizing the Street Pedram Dibazar, Judith Naeff, 2018 *Visualizing the Street* investigates the social and cultural significance of new developments at the intersection of visual culture and urban space.

*The Randstad* Wil Zonneveld, Vincent Nadin, 2020-12-29 The Randstad metropolitan region encompassing Amsterdam, The Hague, Rotterdam and Utrecht in the western Netherlands is regarded worldwide as a model of a 'successful' polycentric metropolis. It is widely cited as an example of how a region of interconnected small cities can effectively compete globally by providing complementary functions which together match the power of large monocentric cities. The methods of strategic spatial planning, regional design and strategic projects that are said to underpin this polycentric metropolis are used as models for practitioners and students around the world. But is this high reputation deserved? Does the Randstad really function as a polycentric metropolis? The operation of the Randstad as a polycentric networked region is controversial both in terms of the actual strength of relations between its component parts, and the value of promoting polycentricity in policy. What are the costs and benefits of a Randstad metropolis? Does polycentricity improve the performance of the region in economic, social and environmental terms? How has the polycentric metropolis evolved and what part is played by its delta location? Has spatial planning made a difference in the form and operation of the region today? How will this spatial configuration fare in the face of the climate crisis and need to create healthy cities and regions? Is there benefit in pursuing the idea of a polycentric metropolis in government policy and action, and how? These questions are of critical interest within the Netherlands but experience in the Randstad offers valuable insights to many other complex urban regions around the world. This book will provide a critical analysis of the Randstad and lessons for strategic planning in other metropolitan regions.
