Planning on visiting other destinations in Europe? Check out Fodor's Essential Italy, Fodor's Essential Spain, and Fodor's Essential France.

New Ways of Working Nathalie Mitev,Jeremy Aroles,Kathleen A. Stephenson,Julien Malaurent,2021-02-22 This volume focuses on new ways of working, and explores implications of these new practices with a particular emphasis on the place occupied by technology, materiality and bodies within contemporary working configurations. It draws together an international range of scholars to examine diverse subjects such as: the gig economy, social media as a work space, the role of materiality in living labs, managerial techniques and organizational legitimacy. Drawing on global perspectives, from France to Nigeria, this book presents a fascinating examination of the many new ways people are working, and relating to their work. Part of the esteemed Technology, Work and Globalization series, this book is valuable reading for scholars working on organizational studies, ethnography, technology management, and management more generally.

Smart Business Networks Peter H.M. Vervest,Eric van Heck,Ken Preiss,Louis-Francois Pau,2005-12-14 Scientists from management and strategy, information systems, engineering and telecommunications have discussed a novel concept: Smart Business Networks. They see the future as a developing web of people and organizations, bound together in a dynamic and unpredictable way, creating smart outcomes from quickly (re-)configuring links between

actors. The question is: What should be done to make the outcomes of such a network 'smart', that is, just a little better than that of your competitor? More agile, with less pain, with more return to all the members of the network, now and over time? The technical answer is to create a 'business operating system' that should run business processes on different organisational platforms. Business processes would become portable: The end-to-end management of processes running across many different organizations in many different forms would become possible. This book presents you the outcomes of an energizing and new direction in management science.

Berlin Like a Local DK Eyewitness, Marlén Jacobshagen, Alexander Rennie, Barbara Woolsey, 2024-05-02 Are you keen to explore a different side of Berlin? Like a Local is the book for you. This isn't your ordinary travel guide. You won't find the Reichstag Building or Charlottenburg Palace on these pages because that's not where Berliners hang out. Instead, you'll meet the locals at bustling flea markets, carefree clubs and peaceful urban gardens - and that's where this book takes you. Turn the pages to discover: - The small businesses and community strongholds that add character to this vibrant city, recommended by true locals - 6 themed walking tours dedicated to specific experiences such as vintage shopping and cocktail history - A beautiful gift book for anyone seeking to explore Berlin - Helpful what3word addresses so that you can pinpoint all the listed sights - A thoughtfully updated second edition, including new places to visit Compiled by three proud Berliners and revised and updated for 2024, this stylish travel guide is packed with Berlin's best experiences and secret spots, handily categorised to suit your mood and needs. Whether you're a restless Berliner on the hunt for a new hangout or a visitor keen to discover a side you won't find in traditional guidebooks, *Berlin Like A Local* will give you all the inspiration you need.

Walter Pieterse Multatuli, 1904

Smart Card Scott B. Guthery, Timothy M. Jurgensen, 1998 Smart Card Developer's Kit is designed to provide the practical information you need to design and build applications that incorporate smart cards. Using a combination of detailed exposition, technical reference summaries, and extended examples, this book familiarizes you with the unique strengths and capabilities of this emerging computer technology. Increase your security from a one-factor security-a password-to a two-factor security-a smart card and its PIN. Use the smart card as a portable place to carry your personal preference information and your identity-establishing private signing key. In marketing applications, a smart card offers a much wider and more flexible set of customer benefits than a magnetic-strip card or a paper record card. A smart card can also carry secured information-such as medical records, licenses, subscriptions, and accreditations-that must be guarded against tampering.

Service-Dominant Business Design Egon Lüftenegger, This dissertation presents tool-supported process for designing Work by Following a Service-Dominant Logic. The tools supported by the design process are the following: The Service-Dominant Strategy Canvas, The Service-Dominant Business Model Radar, the Business Service Composition Blueprint and the Business Services Catalogue.

The Freud Scenario Jean-Paul Sartre, 2013-03-12 In 1958, the US director John Huston asked Jean-Paul Sartre to

write a scenario for a film about Sigmund Freud. Huston wanted Sartre to concentrate on the conflict-ridden period of Freud's life when he abandoned hypnosis and invented psychoanalysis. The Freud Scenario, discovered in Sartre's papers after his death, is the result—a deft portrait of a man engaged in a personal and intellectual struggle that would prove a turning point in twentieth-century thought. Sartre did not regard this script as a diversion from his larger intellectual project. Freud's preoccupations with female hysteria and the father relationship touched on major themes in his own work, and *Loser Wins*, *The Family Idiot* and *Words*, some of Sartre's most celebrated publications, are all in some way derived from his work for Huston. Written for a Hollywood audience, *The Freud Scenario* demonstrates that, in addition to a towering intellect, Sartre enjoyed a genuine popular touch. Already widely acclaimed in France, *The Freud Scenario* stands as a valuable testament to two of the most influential minds in modern history.

The Routledge International Handbook on Fear of Crime Murray Lee, Gabe Mythen, 2017-12-01 The Routledge International Handbook on Fear of Crime brings together original and international state of the art contributions of theoretical, empirical, policy-related scholarship on the intersection of perceptions of crime, victimisation, vulnerability and risk. This is timely as fear of crime has now been a focus of scholarly and policy interest for some fifty years and shows little sign of abating. Research on fear of crime is demonstrative of the inter-disciplinarity of criminology, drawing in the disciplines of sociology, psychology, political science, history, cultural studies, gender studies, planning and architecture, philosophy and human geography. This collection draws in many of these interdisciplinary themes. This collection also extends the boundaries of fear of crime research. It does this both methodologically and conceptually, but perhaps more importantly it moves us beyond some of the often repeated debates in this field to focus on novel topics from unique perspectives. The book begins by plotting the history of fear of crime's development, then moves on to investigate the methodological and theoretical debates that have ensued and the policy transfer that occurred across jurisdictions. Key elements in debates and research on fear of crime concerning gender, race and ethnicity are covered, as are contemporary themes in fear of crime research, such as regulation, security, risk and the fear of terrorism, the mapping of fear of crime and fear of crime beyond urban landscapes. The final sections of the book explore geographies of fear and future and unique directions for this research.

De Wallen ,2015-09-01 De Wallen: Amsterdam's Red Light District A limited edition hand-printed artists' book by social documentary photographer Daniel D. Teoli Jr. De Wallen: Amsterdam's Red Light District is 8 1/2 inch square format, spiral bound and hand printed with Epson inkjet printers using archival pigment ink sets on acid free DUO paper. OGT Writing Andrea J. Lapey,2005

Milgram at 50 S. Alexander Haslam,Arthur G. Miller,Stephen Reicher,Ann Bettencourt,2014-09-29 To mark the 50th anniversary of Milgram's first major publication—Behavioral study of obedience (1963)—this issue contains fourteen papers from leading Milgram scholars examining the contemporary relevance of the famous Yale studies. The issue offers a critical appraisal of the impact of Milgram's work, as well as its moral dangers and analytic weaknesses. Several important new perspectives obtained from archival analysis and innovative methodologies are also presented. The relevance of Milgram's experiments for an understanding of the Holocaust is given particular emphasis. The issue presents a range of fresh material that provides the basis for a significant updating of our appreciation of Milgram's legacy, and that will inform forthcoming scholarship and debate.

Speech and Language Technologies Ivo Ipsic,2011-06-21 This book addresses state-of-the-art systems and achievements in various topics in the research field of speech and language technologies. Book chapters are organized in different sections covering diverse problems, which have to be solved in speech recognition and language understanding systems. In the first section machine translation systems based on large parallel corpora using rule-based and statistical-based translation methods are presented. The third chapter presents work on real time two way speech-to-speech translation systems. In the second section two papers explore the use of speech technologies in language learning. The third section presents a work on language modeling used for speech recognition. The chapters in section Text-to-speech systems and emotional speech describe corpus-based speech synthesis and highlight the importance of speech prosody in speech recognition. In the fifth section the problem of speaker diarization is addressed. The last section presents various topics in speech technology applications like audio-visual speech recognition and lip reading systems.

Smart Card Handbook Wolfgang Rankl,Wolfgang Effing,2004-04-02 Building on previous editions, this third edition of the Smart Card Handbook offers a completely updated overview of the state of the art in smart card technology. Everything you need to know about smart cards and their applications is covered! Fully revised, this handbook describes the advantages and disadvantages of smart cards when compared with other systems, such as optical cards and magnetic stripe cards and explains the basic technologies to the reader. This book also considers the actual status of appropriate European and international standards. Features include: New sections on: smart card applications (PKCS #15, USIM, Tachosmart). smart card terminals: M.U.S.C.L.E., OCF, MKT, PC/SC. contactless card data transmission with smart cards. Revised and updated chapters on: smart cards in the telecommunications industry (GSM, UMTS, (U)SIM application toolkit, decoding of the files of a GSM card). smart card security (new attacks, new protection methods against attacks). A detailed description of the physical and technical properties and the fundamental principles of information processing techniques. Explanations of the architecture of smart card operating systems, data transfer to and from the smart card, command set and implementation of the security mechanisms and the function of the smart card terminals. Current applications of the technology on mobile telephones, telephone cards, the electronic purse and credit cards. Discussions on future developments of smart

cards: USB, MMU on microcontroller, system on card, flash memory and their usage. Practical guidance on the future applications of smart cards, including health insurance cards, e-ticketing, wireless security, digital signatures and advanced electronic payment methods. "The book is filled with information that students, enthusiasts, managers, experts, developers, researchers and programmers will find useful. The book is well structured and provides a good account of smart card state-of-the-art technology... There is a lot of useful information in this book and as a practicing engineer I found it fascinating, and extremely useful." Review of second edition in Measurement and Control. 'The standard has got a lot higher, if you work with smart cards then buy it! Highly recommended.' Review of second edition in Journal of the Association of C and C++ Programmers. Visit the Smart Card Handbook online at www.wiley.co.uk/commstech/

The Neuroscience of Creativity Anna Abraham, 2018-10-25 What happens in our brains when we compose a melody, write a poem, paint a picture, or choreograph a dance sequence? How is this different from what occurs in the brain when we generate a new theory or a scientific hypothesis? In this book, Anna Abraham reveals how the tools of neuroscience can be employed to uncover the answers to these and other vital questions. She explores the intricate workings of our creative minds to explain what happens in our brains when we operate in a creative mode versus an uncreative mode. The vast and complex field that is the neuroscience of creativity is disentangled and described in an accessible manner, balancing what is known so far with critical issues that are as yet unresolved. Clear guidelines are also provided for researchers who pursue the big questions in their bid to discover the creative mind.
