**Addiction by Design** Natasha Dow Schüll,2014-05-11 Recent decades have seen a dramatic shift away from social forms of gambling played around roulette wheels and card tables to solitary gambling at electronic terminals. Slot machines, revamped by ever more compelling digital and video technology, have unseated traditional casino games as the gambling industry's revenue mainstay. *Addiction by Design* takes readers into the

intriguing world of machine gambling, an increasingly popular and absorbing form of play that blurs the line between human and machine, compulsion and control, risk and reward. Drawing on fifteen years of field research in Las Vegas, anthropologist Natasha Dow Schüll shows how the mechanical rhythm of electronic gambling pulls players into a trancelike state they call the machine zone, in which daily worries, social demands, and even bodily awareness fade away. Once in the zone, gambling addicts play not to win but simply to keep playing, for as long as possible--even at the cost of physical and economic exhaustion. In continuous machine play, gamblers seek to lose themselves while the gambling industry seeks profit. Schüll describes the strategic calculations behind game algorithms and machine ergonomics, casino architecture and ambience management, player tracking and cash access systems--all designed to meet the market's desire for maximum time on device. Her account moves from casino floors into gamblers' everyday lives, from gambling industry conventions and Gamblers Anonymous meetings to regulatory debates over whether addiction to gambling machines stems from the consumer, the product, or the interplay between the two. *Addiction by Design* is a compelling inquiry into the intensifying traffic between people and machines of chance, offering clues to some of the broader anxieties and predicaments of contemporary life. At stake in Schüll's account of the intensifying traffic between people and machines of chance is a blurring of the line between design and experience, profit and loss, control and compulsion.

**Positively Fifth Street** James McManus,2007-04-01 Rough sex, black magic, murder, and the science-and eros-of gambling meet in the ultimate book about Las Vegas James McManus was sent to Las Vegas by Harper's to cover the World Series of Poker in 2000, especially the mushrooming progress of women in the \$23 million event, and the murder of Ted Binion, the tournament's prodigal host, purportedly done in by a stripper and her boyfriend with a technique so outré it took a Manhattan pathologist to identify it. Whether

a jury would convict the attractive young couple was another story altogether. McManus risks his entire Harper's advance in a long-shot attempt to play in the tournament himself. Only with actual table experience, he tells his skeptical wife, can he capture the hair-raising brand of poker that determines the world champion. The heart of the book is his deliciously suspenseful account of the tournament itself-the players, the hand-to-hand combat, and his own unlikely progress in it. Written in the tradition of *The Gambler* and *The Biggest Game in Town*, *Positively Fifth Street* is a high-stakes adventure, a penetrating study of America's card game, and a terrifying but often hilarious account of one man's effort to understand what Edward O. Wilson has called Pleistocene exigencies-the eros and logistics of our primary competitive instincts.

*Bet the House* Richard Roeper, 2010 During the course of 30 days in early 2009, Richard Roeper risked more than a quarter million dollars on practically every method of gambling in America.
