Motorcycle Road & Racing Chassis Keith Noakes,2015-10-14 This book is an account of the companies and individuals, who have played a major part in the design and advancement of motorcycle frame (chassis) performance. These independent companies began to spring up in the early postwar years, when motorcycle racing began to take place again. Due to the lack of available factory machines and the urge to improve performance of the now aged equipment, riders began to build their own frames around whatever engines were available. Success brought recognition, and people were soon wanting to buy winning machines, so fledgling companies began to spring up to satisfy the growing demand for custom chassis. Some of these companies soon began to grow, and others appeared in various European countries over the next few years. The state-of-the-art hand built frames were becoming a must for the discerning road bike rider, and so the independent motorcycle frame makers were beginning to put some designs into production, and a thriving business was beginning to emerge. In later years, with such a large choice of factory engines from around the world, the successful independent chassis manufacturers went from strength to strength and some are now producing highly prized road bikes, whilst building one-off machines as required. As the years have passed, one or two of the independent companies have disappeared, but in many cases their machines have become very collectable classics. The companies still thriving today, as well as producing modern machines with a wide range of engine options, are finding considerable business rebuilding and maintaining machines built in the earlier years. Some of the pioneer builders have become household names to the motorcycle fraternity, and those written about in this book include: Nico Bakker (The Netherlands), Bimota (Italy), Dresda Autos (United Kingdom), Egli (Switzerland), Harris Performance Products (United Kingdom), Hejira racing (United Kingdom), Magni (Italy), Maxton

Engineering (United Kingdom), P&M Motorcycles (United Kingdom), Quasar (United Kingdom), Rickman UK (United Kingdom), Colin Seeley Racing (United Kingdom), Segale (Italy) and Spondon Engineering (United Kingdom). This book charts the history of these innovative companies with full specifications for many chassis, and is extensively illustrated throughout. A must for any motorcycle enthusiast, and a valuable reference for the trade.

How to Build a Pro Streetbike Mike Seate, Whether it's a big-bore, high-end custom sportbike you're after, or a naked, bare knuckles streetfighting drag racer, this book has the goods for getting you there. In three different scenarios, the nation's top builders give blow-by-blow instructions for completely rebuilding three popular streetbikes -- from performance modifications and exhaust systems to flawless finishes and detail work. Focusing on highly customized Hayabusa drag bikes, including a slammed and lowered Suzuki GSX1300R Hayabusa, John Dantzler of the Charlotte, North Carolina, shop Two Wheel Customs outlines the suspension and engine modifications that the serious street and quarter-mile racer can make. He takes a salvaged, late-model four-cylinder street machine and transforms it into the kind of machine that both professional stunt riders and corner-carving enthusiasts favor. Next, author Mike Seate covers the details on constructing and installing popular modifications -- everything from engine crash guards and wheelie bars to motocross-style handlebars and bikini fairings -- while stunt riders and streetfighter builders from the United States and Europe weigh in with tips and advice. Last but not least, the builders at Wisconsin's Patrick's Performance and South Carolina's Coastal Motorcycles provide a step-by-step account of the construction of two high-end custom sportbikes -- transforming a Yamaha YZF R-1 and a Suzuki GSX-R 1000 into the kind of machines that are eye-popping everywhere-on the streets or on the motorcycle show circuit.

Cafe Racer: Beginner Guide of Racing Bike Building (Custom Bike, Bike Touring, Bike Riding, Cafe Racer Bike, Cafe Racer Motorcycle Perry Anderson, 2019-03 Cafe Racer A café racer is a bike that has been modified to race from a café to some different predetermined place. The maximum famous café (stated caff) became the Ace Café in London. Legend has it that motorcycle riders would race from the café, after choosing a sure record at the duke box, and go back before the record finished. This feat frequently necessitated achieving 'the ton' or a hundred mph. In England all through the 60s, low-cost motorcycles that would achieve the ton, were few and a ways among. For the common worker and motorbike owner, the most effective choice of getting the desired performance became to track the motorcycle with diverse racing options. effectively available tuning elements made the task simpler. Riders would upload extra elements as their budgets allowed. As riders delivered more and more elements, a popular look started to materialize - the café racer look. The standard specification of an early café racer might be: Swept-lower back pipes Clip-on's or 'Ace' bars everse cone Mega's (quick for megaphone mufflers - very a great deal a misnomer). Later motorcycles used Dunstall's, which have been silencers produced via tuning legend Paul Dunstall TT100 Dunlop tires Large carburetors Rear sets For many riders, having the café racer appearance turned into sufficient. but while the market for tuning parts absolutely started out to take off inside the mid '60s, the list of available and suitable components grew. except engine tuning parts, some of companies began to provide substitute seats and tanks. those replacements resembled the current trends in motorbike racing: seats with humps, and fiberglass tanks with indentations to clean clip-ons and the rider's knees. more high priced aluminum versions have been additionally available. Paul shocked the racing community by winning the first AMA pro Superbike race he entered. Pete Hill--A Legend on Two Wheels: World's Fastest Knucklehead Jackie Hill,2018-11-26 Thousands of drag race fans remember Pete Hill--the humble and very successful racer from Greenville, South Carolina. Without a big sponsor and riding a blown, fuel-burning Knucklehead, Pete Hill not only beat the other Harleys but he also beat the Kawasakis. And all with an obsolete V-Twin design that went out of production in 1948. Written by his one-person pit crew, his wife Jackie Hill, this book follows Pete's career from his first Knucklehead-powered four-wheel dragster to his ascension to motorcycle Top Fuel. Jackie tells the story like it was. The joy of winning and the hard lumps that came before the wins. The long nights on the road, the struggle to find pushrods that don't bend (make your own), and risk of learning how to mix Nitromethane. Pete Hill was and is the real deal who had no big sponsors. Pete built his own bikes and won with an outdated engine design: the Knucklehead. Jackie walks the reader through each setback and each win. She puts you right in the middle of the action. Reading Jackie's book is like going back in time with a pit pass for hundreds of drag races.
