We are also very worried about the thinning ozone layer, because it is definitely going to have a bad after effect on our climate, and then correspondingly on our health. This is the reason why, we are looking towards the use of natural elements, to keep us healthy and fit. That is because we have understood the fact that chemical-based drugs are efficacious on a short-term basis, but they do not heal us long-term. Besides, there is always the chance of dangerous side effects. And so our health is ruined, because we could not prevent ourselves from popping that pill. Ancient remedies, on the other hand, have been passed down through centuries. Many of us consider these remedies to be quack remedies, because many of them have not been subjected to scientific research, and a stamp of experienced researchers telling you, all right, it is useful to add a lot of cinnamon to your diet, because that has been scientifically proven to cure 99% of bacterial and viral infections. Nevertheless, there are a lot of infections, which have been proven down the millenniums to be cured only by practical and natural remedies. Many of these practical remedies have been in use for thousands of years and are still in use because they have proved their time tested efficacy over and over again in solving your health problems and curing you. Best, you are going to be cured from the root, and the effects are going to be long-term. No matter what ailment you suffer from, you can always do something with a little bit of knowledge, and a little bit of help from nature to enhance your well-being and good health. Many of us living in the cities are terrified of picking up any useful herbal plant material growing wild and which we encounter when we are on open-air ambles, because we know that they have been contaminated from lead from vehicle exhausts, and also could have been sprayed with agri-chemicals. Also, we do not have the herbal lore, which was taught to our ancestors, by their ancestors. There was a time when every proud housewife worth her salt knew all about herbs, spices and natural remedies and had a stillroom in which she used to brew herbal remedies to keep our family healthy and happy, and natural ointments to keep them youthful looking. Gathering herbs from the wild can only be done by those botanists and herbalists will have extensive knowledge of the beneficial points of plants. So that is the reason why a large number of the plants which I am going to describe to you in this book can be easily found in your local market.

The Earthwise Herbal, Volume II Matthew Wood,2009-04-28 In this companion volume to The Earthwise Herbal: A Complete Guide to Old World Medicinal Plants, Matthew Wood, an expert herbalist who has used medicinal herbs with tens of thousands of patients over a twenty-five-year career, provides detailed descriptions of New World (North American) herbs and their uses. Organized as a materia medica (names and descriptions of herbs/plants are listed alphabetically), the book explains the use of the whole plant (not just “active ingredients”) in the treatment of the whole person and describes symptoms and conditions that the plants have been successful in treating—from digestive ailments, headaches, and high blood pressure to asthma, skin rashes, and allergies, to name a few. Wood, who has systematically studied ancient and traditional herbal literature, takes a historical view and presents information in a thoughtful, engaging, nontechnical style.
