*The Encyclopedia of Ancient Civilizations* Arthur Cotterell, 1988 With contributions from experts in the field, this is an encyclopedia of ancient civilizations.

*Ancient Civilizations* Dr. Brian Fagan, Chris Scarre, 2015-08-13 Drawing on many avenues of inquiry: archaeological excavations, surveys, laboratory work, highly specialized scientific investigations, and on both historical and ethnohistorical records; *Ancient Civilizations*, 3/e provides a comprehensive and straightforward account of the world's first civilizations and a brief summary of the way in which they were discovered.

*Ancient Civilizations of the World* Denny Rose & Rowan Allen, 2018-05-08 About 5,000 years ago the first urban societies developed laying the foundations for the first civilizations. Nearly all civilizations share the same few features- they have abundant food surpluses, contained cities, political bureaucracies, armies, defined religious and social hierarchies and long distance trading. Ancient Egyptian culture flourished between c. 5500 BCE with the rise of technology (as evidenced in the glass-work of faience) and 30 BCE with the death of Cleopatra VII, the last Ptolemaic ruler of Egypt. It is famous today for the great monuments which celebrated the triumphs of the rulers and honored the gods of the land. The culture is often misunderstood as having been obsessed with death but, had this been so, it is unlikely it would have made the significant impression it did on other ancient cultures such as Greece and Rome. Neolithic means e;new stonee;, even though agriculture was the crowning achievement of the period. Civilizations started out small. Agriculture at first tended to tie only small groups together. These groups also all settled along rivers, important as a reliable and predictable source of water. As time passed, families usually

worked the same plot of land over successive generations, leading to the concept of ownership. Ancient mortars and grinding tools unearthed in a large mound in the Zagros Mountains of Iran reveal that people were grinding wheat and barley about 11,000 years ago. Grass pea, wild wheat, wild barley, and lentils were found throughout the site, including some of the earliest known samples. This was much further east than most sites known for early agriculture. This book furnishes with utmost facility to all classes of readers, the needed information on ancient civilization. The unusual variety of the subject makes this a work of endless fascination.

*Ancient Civilizations* Chris Scarre, Brian Fagan, Charles Golden, 2021-04-07 Ancient Civilizations offers a comprehensive and straightforward account of the world's first civilizations and how they were discovered, drawing on many avenues of inquiry including archaeological excavations, surveys, laboratory work, highly specialized scientific investigations, and both historical and ethnohistorical records. This book covers the earliest civilizations in Eurasia and the Americas, from Egypt and the Sumerians to the Indus Valley, Shang China, and the Maya. It also addresses subsequent developments in Southwest Asia, moving on to the first Aegean civilizations, Greece and Rome, the first states of sub-Saharan Africa, divine kings and empires in East and Southeast Asia, and the Aztec and Inka empires of Mesoamerica and the Andes. It includes a number of features to support student learning: a wealth of images, including several new illustrations; feature boxes which expand on key sites, finds, and written sources; and an extensive guide to further reading. With new perceptions of the origin and collapse of states, including a review of the issue of sustainability, this fifth edition has been extensively updated in the light of

spectacular new discoveries and the latest theoretical advances. Examining the world's pre-industrial civilizations from a multidisciplinary perspective and offering a comparative analysis of the field which explores the connections between all civilizations around the world, this volume provides a unique introduction to pre-industrial civilizations in all their brilliant diversity. It will prove invaluable to students of Archaeology.

*Early Civilizations* Bruce G. Trigger, 1993 An important scholarly contribution not only to the study of early civilizations, but also to archaeological theory. . . . It should be required reading for any course on ancient civilization. --Kathryn A. Bard, *Journal of Field Archaeology*

**In Search Of The First Civilizations** Michael Wood, 2013-04-30 Five thousand years ago there began the most momentous revolution in human history. Starting in Mesopotamia, city civilization emerged for the first time on earth, to be followed in Egypt, India, China and the Americas. The ideals of these ancient civilizations still shape the lives of the majority of mankind. In Search of the First Civilizations (previously published as Legacy) asks the intriguing question: what is civilization? Did it mean the same to the Chinese, the Indians and the Greeks? What can the values of the ancient cultures teach us

today? And do the ideals of the West - a latecomer to civilization - really have universal validity? In this fascinating historical search, Michael Wood explores these ancient cultures, looking for their essential character and their continuing legacy. A brilliant exploration. Sunday Times Well-written, gorgeous and guaranteed to induce thought... Wood takes great care to put everything in a large historical perspective, which is actually more disturbing than comforting. New York Post

*Ancient Worlds* Richard Miles, 2011-09-29 Across the Middle East, the Mediterranean and the Nile Delta, awe-inspiring, monstrous ruins are scattered across the landscape - vast palaces, temples, fortresses, shattered statues of ancient gods, carvings praising the eternal power of long-forgotten dynasties. These ruins - the remainder of thousands of years of human civilization - are both inspirational in their grandeur, and terrible in that their once teeming centres of population were all ultimately destroyed and abandoned. In this major book, Richard Miles recreates these extraordinary cities, ranging from the Euphrates to the Roman Empire, to understand the roots of human civilization. His challenge is to make us understand that the cities which define culture, religion and economic success and which are humanity's greatest invention, have always had a cruel edge to them, building systems that have provided both amazing opportunities and back-breaking hardship. This exhilarating book is both a pleasure to read and a challenge to us all to think about our past - and about the present.

*Why Did Ancient Civilizations Fail?* Scott A J Johnson, 2016-09-19 Ideas abound as to why certain complex societies collapsed in the past, including environmental change, subsistence failure, fluctuating social structure and lack of adaptability. Why Did Ancient

Civilizations Fail? evaluates the current theories in this important topic and discusses why they offer only partial explanations of the failure of past civilizations. This engaging book offers a new theory of collapse, that of social hubris. Through an examination of Mesopotamian, Egyptian, Roman, Maya, Inca, and Aztec societies, Johnson persuasively argues that hubris blinded many ancient peoples to evidence that would have allowed them to adapt, and he further considers how this has implications for contemporary societies. Comprehensive and well-written, this volume serves as an ideal text for undergraduate courses on ancient complex societies, as well as appealing to the scholar interested in societal collapse.

What Makes Civilization? David Wengrow,2018-01-25 In 'What Makes Civilization?', archaeologist David Wengrow provides a vivid account of the 'birth of civilization' in ancient Egypt and Mesopotamia (today's Iraq). These two regions, where many foundations of modern life were laid, are usually treated in isolation. Now, they are brought together within a unified history.
