The Ancient Language of Sacred Sound David Elkington, 2021-04-06 • Details how sacred sites resonate at the same frequencies as both the Earth and the alpha waves of the human brain • Shows how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites • Explains how ancient hero myths from around the world relate to divine acoustic science and formed the source of religion The Earth resonates at an extremely low frequency. Known as “the Schumann Resonance,” this natural rhythm of the Earth precisely corresponds with the human brain’s alpha wave frequencies--the frequency at which we enter into and come out of sleep as well as the frequency of deep meditation, inspiration, and problem solving. Sound experiments reveal that sacred sites and structures like stupas, pyramids, and cathedrals also resonate at these special frequencies when activated by chanting and singing. Did our ancestors build their sacred sites according to the rhythms of the Earth? Exploring the acoustic connections between the Earth, the human brain, and sacred spaces, David Elkington shows how humanity maintained a direct line of communication with Mother Earth and the Divine through the construction of sacred sites, such as Stonehenge, Newgrange, Machu Picchu, Chartres Cathedral, and the pyramids of both Egypt and Mexico. He reveals how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites, showing how, for example, recognizable hieroglyphs appear in sand patterns when the sacred frequencies of the Great Pyramid are activated. Looking at ancient hero legends--those about the bringers of important knowledge or language--Elkington explains how these myths form the source of ancient religion and have a unique mythological resonance, as do the sites associated with them. The author then reveals how religion, including Christianity, is an ancient language of acoustic science given expression by the world’s sacred sites and shows that power places played a profound role in the development of human civilization.

Sound and the Ancient Senses Shane Butler, Sarah Nooter, 2018-10-03 Sound leaves no ruins and no residues, even though it is experienced constantly. It is ubiquitous but fleeting. Even silence has sound, even absence resonates. Sound and the Ancient Senses aims to hear the lost sounds of antiquity, from the sounds of the human body to those of the gods, from the bathhouse to the Forum, from the chirp of a cicada to the music of the spheres. Sound plays so great a role in shaping our environments as to make it a crucial sounding board for thinking about space and ecology, emotions and experience, mortality and the divine, orality and textuality, and the self and its connection to others. From antiquity to the present day, poets and philosophers have strained to hear the ways that sounds structure our world and identities. This volume looks at theories and practices of hearing and producing sounds in ritual contexts, medicine, mourning, music, poetry, drama, erotics, philosophy, rhetoric, linguistics, vocality, and on the page, and shows how ancient ideas of sound still shape how and what we hear today. As the first comprehensive introduction to the soundscapes of antiquity, this volume makes a significant contribution to the burgeoning fields of sound and voice studies and is the final volume of the series, The Senses in Antiquity.

**Ancient Sounds for a New Age** Diane Mandle, 2019-09 Ancient Sounds for a New Age is an introduction to and overview of sound healing with Himalayan instruments. It offers a clear idea of what is needed to learn and practice for anyone who decides to enter the field, and serves as an instructional tool to that end. Diáne has combined techniques from other fields that have proven very effective for her clients and describe these in the book. As an extra bonus, exclusive access to a digital one-hour instructional video is included to demonstrate Diáne's methods as a practitioner. The book is organized in five parts. The first, Part I: Fundamentals of Sound Healing, offers an orientation to the work. Part II: The Sacred Sound Family, teaches about the sound healing instruments--the tingshas, the ganta and dorje, and the Himalayan bowls--and the author takes you through some basic configurations for working with multiple instruments. Part III: Sound Healing and the Chakras, offers a breakdown of techniques and principles for working with the body's main energy centers, the chakras. Part IV: Working with Challenging Emotions, offers brief orientations to working with anxiety and depression, dedicating one chapter to each. The last main section of the book, Part V: Enhancing Your Practice, concerns ways to include other modalities in a sound healing session, and the author shares some that have worked well in her own practice. Diane explores colors and toning, power language, and visualization, reminding the reader, In learning to practice sound healing, we are aspiring to become more than technicians who can play the instruments--we are developing into healers. Additionally, several Appendices include: thumbnail profiles of some sound healing pioneers, an interesting case study, some client testimonials, and further resources, including information about Diane's school and some of the classes and products offered. Diáne Mandle is the preeminent voice in the field of Tibetan bowl sound healing. Her book, Ancient Sounds for the New Age, offers a platform of deep understanding on which a practical skill set can be easily built upon. This is what the emerging field of sound healing has been waiting for. There is no doubt that it will soon be recognized as the go-to resource for serious vibrational practitioners.--Richard Rudis (Karma Sonam Dorje) Diane Mandle's Tibetan Bowls were part of the Integrative Medical Care offered at the San Diego Cancer and Research Institute. Our patients found her sounds magical, therapeutic, meditative and leading to an inner sense of peace and well-being. --Paul Brenner M.D, PhD In Ancient Sounds for a New Age, Diane reveals how to use the Tibetan bowls, tingshas, ganta, and dorgje to transform problems into doorways of light. *Sonorous Relics Theory (SRT) Extracting Ancient Voices from Artifacts* Karim Mokhtar,2022-01-19 Sonorous Relics Theory (SRT) is a theory that seeks to explore and extract ancient sounds and human voices embedded within archaeological artifacts. Traditional archaeology has focused primarily on studying visual aspects, such as objects, structures, and inscriptions, to understand past civilizations. However, this theory proposes that artifacts, including musical instruments, pottery, and even everyday objects, may contain hidden sonic information waiting to be deciphered.

Stone Age Soundtracks Paul Devereux,2001 Our Stone Age ancestors sang and played instruments, and ascribed magical qualities to many sounds. Exciting research-known as acoustic archaeology-has reconstructed this vanished aspect, and this new knowledge exposes both the origins of music and a lost world where echoes were considered spirit voices. Travel from chambered mounds in Ireland to French paleolithic caves, and listen to the past once more.

Leeya Thompson is a scholar and a visionary, bringing impeccable research and fierce intellectual discipline to her work. She follows the trail of the ancient art of gematria back to its earliest roots in Middle Eastern culture and creates a remarkable tool for understanding and change. William Moore, Educator and Reader of the Tree of Life and Tarot I recently had the privilege of experiencing a sound and numerology reading from Leeya Thompson. I was grateful, not only for her insight, but for her ability to express what was revealed in my numbers and name sounds in ways that were both accessible and deeply meaningful. Leeya uses a delightful economy of words, communicating the essences that combine to create my unique portrait. I found the progression of themes for each life phase especially helpful. It is rare to have a reading that takes in the sweep of a life while giving precise indications as well. I came away with a sense of focused hope fueling personal momentum- a rare commodity in today's circumstances. And a testament to Leeya's skill and wisdom. Anne Oliver, Counselor of Mediation

*Sonorous Desert* Kim Haines-Eitzen,2024-04-16 Enduring lessons from the desert soundscapes that shaped the Christian monastic tradition For the hermits and communal monks of antiquity, the desert was a place to flee the cacophony of ordinary life in order to hear and contemplate the voice of God. But these monks discovered something surprising in their harsh desert surroundings: far from empty and silent, the desert is richly reverberant. Sonorous Desert shares the stories and sayings of these ancient spiritual seekers, tracing how the ambient sounds of wind, thunder, water, and animals shaped the emergence and development of early Christian monasticism. Kim Haines-Eitzen draws on ancient monastic texts from Egypt, Sinai, and Palestine to explore how noise offered desert

monks an opportunity to cultivate inner quietude, and shows how the desert quests of ancient monastics offer profound lessons for us about what it means to search for silence. Drawing on her own experiences making field recordings in the deserts of North America and Israel, she reveals how mountains, canyons, caves, rocky escarpments, and lush oases are deeply resonant places. Haines-Eitzen discusses how the desert is a place of paradoxes, both silent and noisy, pulling us toward contemplative isolation yet giving rise to vibrant collectives of fellow seekers. Accompanied by Haines-Eitzen's evocative audio recordings of desert environments, Sonorous Desert reveals how desert sounds taught ancient monks about solitude, silence, and the life of community, and how they can help us understand ourselves if we slow down and listen.
