Affordances and Constraints of Mobile Phone Use in English Language Arts Classrooms Moran, Clarice M., 2020-12-25 The use of phones in the classroom is a controversial topic that receives a variety of reactions and can have political ramifications. In various school districts across different states, as well as in some countries, cell phone usage has been banned in the classroom to combat what administrators say is a distracted student population. However, research demonstrates that cell phones can have a positive effect on learning and engagement. Instead of banning cell phones, some teachers have found ways to incorporate educational apps, gaming apps, and social media into course materials. Although much research has emerged involving the integration of technology and digital literacies in English language arts (ELA) classrooms, mobile phone use as a discrete construct has not been explored widely. Affordances and Constraints of Mobile Phone Use in English Language Arts Classrooms aims to shine a light on the controversial topic of mobile phones in the English language arts classroom, focusing on comparing the

opportunities that they afford students, as well as the negative effects they can have on learning. The chapters within this book examine learning outcomes, best practices, and practical applications for using mobile phones in ELA and adds to the body of literature on mobile phone use in secondary classrooms in general, standing as a unique resource on mobile phones in the language arts curriculum. While highlighting topics that include gaming applications, online learning, student engagement, and classroom management, this book is ideally designed for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students who are interested in learning more about the pluses and minuses of mobile phone use in ELA.

The book provides an up-to-date survey of how mobile technologies are affecting library use, library services, library systems, librarians, and library users at various types of libraries. The authors cover core topics related to mobile libraries, including mobile reference, eBooks, mobile websites, and QR codes, and address aspects of the mobile revolution less frequently covered in the literature, such as mobile health information services, the use of mobile technologies on archival work, the impact of the mobile revolution on physical libraries, and the ways in which new mobile technologies are creating professional development opportunities within the profession. While this resource is specifically targeted toward librarians who plan and provide services using mobile technologies, academic, public, and other librarians will also find the ideas and information within useful.

Start a Revolution: Stop Acting Like a Library Ben Bizzle, Maria Flora, 2014-12-19 "But this is how we've always done it!" Objections to taking a fresh tack are about as common as budget shortfalls, and the two are more closely related than you might think. At the Craighead County Jonesboro Public Library in Arkansas, Bizzle and his colleagues defied common practices by using creative risk-taking in marketing and outreach to transform their library into a dynamic institution that continues to grow and thrive. Here they recount their story, sharing techniques for success alongside a provocative marketing philosophy that will spur libraries to move beyond their comfort zone. Focusing on creative ways to pull patrons in rather than just push the library out, this book steers libraries towards defining their brand, explaining why it is crucial to meeting the needs of their users and potential users. Offers strategies for getting stakeholders on board and engaged, including how to address budgeting concerns. Demonstrates the importance of the library's website as the digital "main branch" of the library, with guidance for creating and promoting it. Details the systematic marketing campaign undertaken at the Craighead County Jonesboro Public Library, encompassing both traditional and new media channels such as billboards, posters, newspapers, TV and radio, and mobile technology. Takes the mystery out of how to use social media platforms as public awareness tools, complete with detailed strategies and step-by-step instructions. Shows how to pull it all together into a manageable campaign through strong leadership and teamwork. By the time readers have finished this book, they'll have a roadmap for revolution at their own institution.
