📖 **SOUNDIES AND THE CHANGING IMAGE OF BLACK AMERICANS ON SCREEN** SUSAN DELSON,2021-12-07 In the 1940s, folks at bars and restaurants would gather around a Panoram movie machine to watch three-minute films called Soundies, precursors to today's music videos. This history was all but forgotten until the digital era brought Soundies to phones and computer screens—including a YouTube clip starring a 102-year-old Harlem dancer watching her younger self perform in Soundies. In *Soundies and the Changing Image of Black Americans on Screen: One Dime at a Time*, Susan Delson takes a deeper look at these fascinating films by focusing on the role of Black performers in this little-known genre. She highlights the women performers, like Dorothy Dandridge, who helped shape Soundies, while offering an intimate look at icons of the age, such as Duke Ellington and Nat King Cole. Using previously unknown archival materials—including letters, corporate memos, and courtroom testimony—to trace the precarious path of Soundies, Delson presents an incisive pop-culture snapshot of race relations during and just after World War II. Perfect for readers interested in film, American history, the World War II era, and Black entertainment history, *Soundies and the Changing Image of Black Americans on Screen* and its companion video website (susandelson.com) bring the important contributions of these Black artists into the spotlight once again.

📖 **THIS NEW OCEAN** WILLIAM E. BURROWS,1999-11-05 It was all part of man's greatest adventure--landing men on the Moon and sending a rover to Mars, finally seeing the edge of the universe and the birth of stars, and launching planetary explorers across the solar system to Neptune and beyond. The ancient dream of breaking gravity's hold and taking to space became a reality only because of the intense cold-war rivalry between the superpowers, with towering geniuses like Wernher von Braun and Sergei Korolyov shelving dreams of space travel and instead developing rockets for ballistic missiles and space spectaculars. Now that Russian archives are open and thousands of formerly top-secret U.S. documents are declassified, an often startling new picture of the space age emerges: the frantic effort by the Soviet Union to beat the United States to the Moon was doomed from the beginning by gross inefficiency and by infighting so treacherous that Winston Churchill likened it to dogs fighting under a carpet; there was more than science behind the United States' suggestion that satellites be launched during the International Geophysical Year, and in one crucial respect, Sputnik was a godsend to Washington; the hundred-odd German V-2s that provided the vital start to the U.S. missile and space programs legally belonged to the Soviet Union and were spirited to the United States in a derring-do operation worthy of a spy thriller; despite NASA's claim that it was a civilian agency, it had an intimate relationship with the military at the outset and still does--a distinction the Soviet Union never pretended to make; constant efforts to portray astronauts and cosmonauts as Boy Scouts were often contradicted by reality; the Apollo missions to the Moon may have been an unexcelled political triumph and feat of exploration, but they also created a headache for the space agency that lingers to this day. This *New Ocean* is based on 175 interviews with Russian and American scientists and engineers; on archival documents, including formerly top-secret National Intelligence Estimates and spy satellite pictures; and on nearly three decades of reporting. The impressive result is this fascinating story--the first comprehensive account--of the space age. Here are the strategists and war planners; engineers and scientists; politicians and industrialists; astronauts and cosmonauts; science fiction writers and journalists; and plain, ordinary, unabashed dreamers who wanted to transcend gravity's shackles for the ultimate ride. The story is written from the perspective of a witness who was present at the
