The Language of Letting Go Melody Beattie, 2009-12-12

Written for those of us who struggle with codependency, these daily meditations offer growth and renewal, and remind us that the best thing we can do is take responsibility for our own self-care. Melody Beattie integrates her own life experiences and fundamental recovery reflections in this unique daily meditation book written especially for those of us who struggle with the issue of codependency. Problems are made to be solved, Melody reminds us, and the best thing we can do is take responsibility for our own pain and self-care. In this daily inspirational book, Melody provides us with a thought to guide us through the day and she encourages us to remember that each day is an opportunity for growth and renewal.

The App Generation Howard Gardner, Katie Davis, 2013-10-22

No one has failed to notice that the current generation of youth is deeply--some would say totally--involved with digital media. Professors Howard Gardner and Katie Davis name today's young people The App Generation, and in this spellbinding book they explore what it means to be app-dependent versus app-enabled and how life for this generation differs from life before the digital era. Gardner and Davis are concerned with three vital areas of adolescent life: identity, intimacy, and imagination. Through innovative research, including interviews of young people, focus groups of those who work with them, and a unique comparison of youthful artistic productions before and after the digital revolution, the authors uncover the drawbacks of apps: they may foreclose a sense of identity, encourage superficial relations with others, and stunt creative imagination. On the other hand, the benefits of apps are equally striking: they can promote a strong sense of identity, allow deep relationships, and stimulate creativity. The challenge is to venture beyond the ways that apps

are designed to be used, Gardner and Davis conclude, and they suggest how the power of apps can be a springboard to greater creativity and higher aspirations.

Why We Get Mad Dr. Ryan Martin,2021-01-12 This is THE book on anger, the first book to explain exactly why we get mad, what anger really is - and how to cope with and use it. Often confused with hostility and violence, anger is fundamentally different from these aggressive behaviours and in fact can be a healthy and powerful force in our lives. What is anger? Who is allowed to be angry? How can we manage our anger? How can we use it? It might seem like a day doesn't go by without some troubling explosion of anger, whether we're shouting at the kids, or the TV, or the driver ahead who's slowing us down. In this book, the first of its kind, Dr. Ryan Martin draws on 20 years plus of research, as well as his own childhood experience of an angry parent, to take an all-round view on this often-challenging emotion. It explains exactly what anger is, why we get angry, how our anger hurts us as well as those around us, and how we can manage our anger and even channel it into positive change. It also explores how race and gender shape society's perceptions of who is allowed to get angry. Dr. Martin offers questionnaires, emotion logs, control techniques and many other tools to help readers understand better what pushes their buttons and what to do with angry feelings when they arise. It shows how to

differentiate good anger from bad anger, and reframe anger from being a necessarily problematic experience in our lives to being a fuel that energizes us to solve problems, release our creativity and confront injustice.

The Max Planck Handbooks in European Public Law Armin von Bogdandy, 2023-05-04 The Max Planck Handbooks in European Public Law series describes and analyzes the public law of the European legal space, an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and, importantly, the domestic public laws of European states. Recognizing that the ongoing vertical and horizontal processes of European integration render legal comparison the task of our time for both scholars and practitioners, the project aims to foster a better understanding of the specific European legal pluralism and, ultimately, to contribute to the legitimacy and efficiency of European public law. The first volume of the series began this endeavour with an appraisal of the evolution of the state and its administration, offering both cross-cutting contributions and specific country reports. The third volume (the second in chronological terms) continues this approach with an in-depth appraisal of constitutional adjudication in various and diverse European countries. Fourteen country reports and two cross-cutting contributions investigate the antecedents, foundations, organization, procedure, and specific approach to constitutional

issues throughout the Continent. The fourth volume now compares European constitutional jurisdiction in the European legal space. It examines the structures of the organization, the appointment of judges, the procedures and the methods of argumentation and interpretation, their impact on state and society, their legitimacy as well as their role in the division of powers, and thus completes the picture following the country reports in Volume III. This comparative perspective is supplemented by an examination that illustrates the relationship with the ECJ, the ECtHR, and the Venice Commission as well as their (constitutional) function. Finally, Constitutional Adjudication: Common Themes and Challenges is devoted to the challenges constitutional jurisdiction in the European judicial area is currently facing. The historical, political, and theoretical foundations as well as the basic dogmatic features of constitutional jurisdiction are presented in such a way that the discussion about its role and further development in this legal space is sustainably stimulated.

Clinical Health Psychology in Military and Veteran Settings Larry C. James, William O'Donohue, Jeanne Wendel, 2022-11-24 This book will fill an important gap in literature covering the clinical health psychology applications affecting the military and veteran health care systems. The authors draw on a wealth of experience related to treatment of service members and veterans, implementation of innovative research programs within military settings, and analysis of health economics issues. Section I examines key economic challenges facing civilian, military and Veteran healthcare providers. Section II discusses innovative clinical health psychology applications in military hospitals and clinics from around the country, including comprehensive literature reviews and presenting novel clinical applications in military hospitals. This book is relevant for clinicians, policymakers and administrators working with military and veteran patients.

Anger Danger Michelle Garcia Andersen,2019-08-11 Have you
ever been so angry that you felt out of control? It's difficult to
remain calm and think rationally when you are really mad! In this
book, readers in grades 4-9 will learn helpful techniques for
controlling anger so it doesn't control them. This series is
designed to help upper-elementary and middle school readers
navigate common social/emotional issues they may face at home
and in school, promoting positive relationship building, empathy,
appreciation for diversity, bully resistance, informed decision-
making, and emotion management. Each book includes short
fictional stories that exemplify an issue, followed by a nonfiction
analysis of the issue and age-appropriate best practices for
handling it.

Evaluation of a Mobile Phone App for Patients with Pollen-related Allergic Rhinitis: Prospective Longitudinal Field Study Manuela Glattacker, Martin Boeker, Robin Anger, Frank Sebastian Reichenbach, Adrian Tassoni, Rainer Bredenkamp, Jürgen M. Giesler, 2020 Abstract: Background: Mobile health apps have great potential to support the self-management of chronic conditions such as allergic diseases, which constitute significant challenges in health care. However, the health app market is confusing for users, as it is vast, dynamic, and lacks scientific evidence regarding the effectiveness of the apps on offer. To our knowledge, no health app for pollen-related allergic rhinitis has been evaluated. Objective: The aim of our study was to evaluate the Husteblume mobile phone health app, developed in Germany to facilitate the self-management of pollen-related allergic rhinitis. Methods: We evaluated usability and changes in quality of life, health literacy, and self-efficacy for managing one's chronic disease. We conducted 2 online surveys of registered users of the app, 1 before and 1 after the 2017 pollen season, allowing for the analysis of both cross-sectional and longitudinal data in a field setting. Results: The sample comprised 661 app users at the first measurement point and 143 users at follow-up. The subgroup of study participants at follow-up rated the usability of the app as good or very good. There were no significant changes in patient-reported outcomes such as quality of life, health literacy, and self-efficacy between the 2 measurement points ($P > .05$). However, those reached at follow-up perceived subjective improvements due to the app: 55.9%

(80/143) reported being subjectively better informed about their allergy, 27.3% (39/143) noted improved quality of life, 33.6% (48/143) reported subjectively better coping with their allergy, and 28.0% (40/143) felt better prepared for the consultation with their physician. Finally, 90.9% (130/143) users did not identify any adverse effects of the app. Conclusions: Despite some methodological caveats, the results of the evaluation of the Husteblume app are encouraging for the subgroup using the app in the long term. However, further studies evaluating the effectiveness of the app are needed. Trial Registration: German Clinical Trials Register DRKS00011897; <https://tinyurl.com/yxxrg9av>

Cloud Empires Vili Lehdonvirta, 2024-02-06 The rise of the platform economy into statelike dominance over the lives of entrepreneurs, users, and workers. The early Internet was a lawless place, populated by scam artists who made buying or selling anything online risky business. Then Amazon, eBay, Upwork, and Apple established secure digital platforms for selling physical goods, crowdsourcing labor, and downloading apps. These tech giants have gone on to rule the Internet like autocrats. How did this happen? How did users and workers become the hapless subjects of online economic empires? The Internet was supposed to liberate us from powerful institutions. In *Cloud Empires*, digital economy expert Vili Lehdonvirta explores the rise of the platform economy into statelike dominance over our lives and proposes a new way forward. Digital platforms create new marketplaces and prosperity on the Internet, Lehdonvirta explains, but they are ruled by Silicon Valley despots with little or no accountability. Neither workers nor users can “vote with their feet” and find another platform because in most cases there isn’t one. And yet using antitrust law and decentralization to rein in the big tech companies has proven difficult. Lehdonvirta tells the stories of pioneers who helped create—or resist—the new social order established by digital platform companies. The protagonists

include the usual suspects—Amazon founder Jeff Bezos, Travis Kalanick of Uber, and Bitcoin’s inventor Satoshi Nakamoto—as well as Kristy Milland, labor organizer of Amazon’s Mechanical Turk, and GoFundMe, a crowdfunding platform that has emerged as an ersatz stand-in for the welfare state. Only if we understand digital platforms for what they are—institutions as powerful as the state—can we begin the work of democratizing them.
