Internal Conversion Processes Joseph Hamilton, 2012-12-02 Internal Conversion Processes
documents the proceedings of the International Conference on the Internal Conversion Process held
at Vanderbilt University, Nashville, Tennessee on May 10-13, 1965. This compilation discusses the
internal conversion theory; experimental methods for the determination of internal conversion

application of the internal-external conversion (IEC) method to the lens-type spectrometer;
anomalies of E2 conversion coefficients in the deformed-nucleus region; and conversion coefficients
of mixed E2-M1 rotational transitions. The anomalous E1 conversion; internal conversion electrons
from primary fission fragments; particle parameters measured in pure transitions; and survey of E1
transitions in the rare earth region are also discussed in this book. This publication is a good
reference for nuclear physicists and researchers conducting work on the various types of
measurements that involve internal conversion electrons.
