Fool Me Twice Lilliana Anderson,2018-02-20 'Some husbands bought their wives flowers, others bought jewellery. Mine? He returned the things he stole.'I should have known better. Hot guys didn't hit on big girls without an agenda. They didn't approach them in bars and talk their way into your bed. They also didn't make you feel beautiful and proud of your curves. But I was going through a dry spell--actually, I'd kind of been going through a dry spell all my life--and dry spells sucked. Of course I slept with him.I was such a fool. I believed his lines. Fell for his easy smile; the man swept me off my feet, rocked my world, then robbed me blind. I really needed a three date rule.Angry and embarrassed, I engaged the help of my best friend to track the thief down and make him return what he took. But when I found him, he wasn't alone....What does a girl do when she finds not one thief, but an entire family? She marries into it, of course.

Dangerous Curves Isabel Molina-Guzmán,2010-02 With images of Jennifer Lopez’s butt and America Ferrera’s smile saturating national and global culture, Latina bodies have become an ubiquitous presence. Dangerous Curves traces the visibility of the Latina body in the media and popular culture by analyzing a broad range of popular media including news, media gossip, movies, television news, and online audience discussions. Isabel Molina-Guzmán maps the ways in which the Latina body is gendered, sexualized, and racialized within the United States media using a series of fascinating case studies. The book examines tabloid headlines about Jennifer Lopez’s indomitable sexuality, the contested authenticity of Salma Hayek’s portrayal of Frida Kahlo in the movie Frida, and America Ferrera’s universally appealing yet racially sublimated Ugly Betty character. Dangerous Curves carves out a mediated terrain where these racially ambiguous but ethnically marked feminine bodies sell everything from haute couture to tabloids. Through a careful examination of the cultural tensions embedded in the visibility of Latina bodies in United States media culture, Molina-Guzmán paints a nuanced portrait of the media’s role in shaping public knowledge about Latina identity and Latinidad, and the ways political and social forces shape media representations.

The Science of Being Angry Nicole Melleby,2022-05-10 From the acclaimed author of Hurricane Season, an unforgettable story about what makes a family, for fans of Hazel’s Theory of Evolution and Ivy Aberdeen’s Letter to the World. Eleven-year-old Joey is angry. All the time. And she doesn’t understand why. She has two loving moms, a supportive older half brother, and, as a triplet, she’s never without company. Her life is good. But sometimes she loses her temper and lashes out, like the time she threw a soccer ball—hard—at a boy in gym class and bruised his collarbone. Or when jealousy made her push her (former) best friend (and crush), Layla, a little bit too roughly. After a meltdown at Joey’s apartment building leads to her family’s eviction, Joey is desperate to figure out why she’s so mad. A new unit in science class makes her wonder if the reason is genetics. Does she lose control because of something she inherited from the donor her mothers chose? The Science of Being Angry is a heartwarming story about what makes a family and what makes us who we are.

The Curves of Life Norbert Jana Nongbet,2021-12-30 How intriguing life is, with its many curves. We dream and aspire, yet it is not as simple as it seems. This book is an exploration of a man’s journey in pursuit of what love is and whether he will find love? Life is a matter of choices and taking chances that determine what the road lies ahead for us. Take a chance and this shall be an enjoyable and memorable read.

Gentlemen Prefer Curves Sugar Jamison,2014-09-30 When her ex-husband, Carter Lancaster, aka Her Biggest Mistake, walks back into her life, shaking up her entire world by trying to win her back, curvaceous beauty Belinda Gordon must decide whether or not to give him a second chance. Original.

Climate Change Policy Catrinus J. Jepma,Mohan Munasinghe,1997-11-28 There is increasing scientific evidence to suggest that humans are gradually but certainly changing the Earth's climate. In an effort to prevent further damage to the fragile atmosphere, and with the belief that action is required now, the scientific community has been prolific in its dissemination of information on climate change. Inspired by the results of the Intergovernmental Panel on Climate Change's Second Assessment Report, Jepma and Munasinghe set out to create a concise, practical and compelling approach to climate change issues. They deftly explain the implications of global warming, and the risks involved in attempting to mitigate climate change. They look at how and where to start action, and what organization is needed to be able to implement the changes. This book represents a much needed synopsis of climate change and its real impacts on society. It will be an essential text for climate change researchers, policy analysts, university students studying the environment, and anyone with an interest in climate change issues.

The Second Curve Charles Handy,2015-03-12 Britain's leading guru looks to the future. Charles Handy is one of the giants of contemporary thought. His books on management - including Understanding Organizations and Gods of Management - have changed the way we view business. His work on broader issues and trends - such as Beyond Certainty - has changed the way we view society. In The Second Curve, Handy builds on a life's work to glimpse into the future and see what challenges and opportunities lie ahead. He looks at current trends in capitalism and asks whether it is a sustainable system. He explores the dangers of a society built on credit. He

challenges the myth that remorseless growth is essential. He even asks whether we should rethink our roles in life – as students, parents, workers and voters – and what the aims of an ideal society of the future should be. Provocative and thoughtful as ever, he sets out the questions we all need to ask ourselves – and points us in the direction of some of the answers.
