Do You Look Like Your Dog? the Book Gerrard Gethings,2020-10-12 Why DO people look like their dogs? Is it shared personality traits, an expression of self-love, or do they grow together over time like old married couples? This book explores the intense bonds we develop with our dogs, which are far from only skin, or even fur, deep. 50 photos by renowned animal photographer Gerrard Gethings present insightful and fun depictions of dogs and their humans, and humorous texts are included in the booklet to provide clues about these 25 people and their furry best friends. The book also includes behind the scenes photos and an interview with the photographer.

Handbook of CLIL in Pre-primary Education Ana Otto,Beatriz Cortina-Pérez,2023-05-16 This book provides an in-depth look on Content and Language Integrated Learning (CLIL) and Early Childhood Education (ECE), two domains where major joint research is needed. By taking stock on theoretical underpinnings, it explores the ideal conditions for early additional language acquisition in preschool contexts through CLIL with a learner-centered approach grounded in developmentally appropriate practices (DEP) and an emphasis on the importance of play, cognition, holistic content adaptation and social-emotional learning. The book also offers a comprehensive view of how this methodological approach has already set a clear path on Pre-primary education internationally. Finally, it offers insights into CLIL pedagogies as related and adapted to Pre-primary education, resources and materials for very young learners and practical implementation from the classroom. By providing a solid empirical background on Pre-primary CLIL, along with appropriate methodological issues and practices, this book serves as a key resource to students, practitioners, academics as well as teacher educators and policy-makers in international contexts.

Discovering the Brain National Academy of Sciences,Institute of Medicine,Sandra Ackerman,1992-01-01 The brain ... There is no other part of the human anatomy that is so intriguing. How does it develop and function and why does it sometimes, tragically, degenerate? The answers are complex. In Discovering the Brain, science writer Sandra Ackerman cuts through the complexity to bring this vital topic to the public. The 1990s were declared the Decade of the Brain by former President Bush, and the neuroscience community responded with a host of new investigations and conferences. Discovering the Brain is based on the Institute of Medicine conference, Decade of the Brain: Frontiers in Neuroscience and Brain Research. Discovering the Brain is a field guide to the brain—an easy-to-read discussion of the brain's physical structure and where functions such as language and music appreciation lie. Ackerman examines: How electrical and chemical signals are conveyed in the brain. The mechanisms by which we see, hear, think, and pay attention—and how a gut feeling actually originates in the brain. Learning and memory retention, including parallels to computer memory and what they might tell us about our own mental capacity. Development of the brain throughout the life span, with a look at the aging brain. Ackerman

provides an enlightening chapter on the connection between the brain's physical condition and various mental disorders and notes what progress can realistically be made toward the prevention and treatment of stroke and other ailments. Finally, she explores the potential for major advances during the Decade of the Brain, with a look at medical imaging techniques—what various technologies can and cannot tell us—and how the public and private sectors can contribute to continued advances in neuroscience. This highly readable volume will provide the public and policymakers—and many scientists as well—with a helpful guide to understanding the many discoveries that are sure to be announced throughout the Decade of the Brain.
