**Brainchild** Shen-Li Lee,2019-10-02 The 21st century is a challenging era and the competition is unyielding. As parents, we feel an urgency to prepare our children to face this world. We are constantly seeking the best schools, activities, and programs in the hope that they will give our children that extra leg-up in life. We believe that if we want our children to thrive in this world, we must prepare them with every resource available to us. In our eagerness to provide everything our children might need, we have lost sight of the basic fundamentals that they require to flourish. Like planning a house to weather the storm, we must ensure that our children's foundations are strong. However, in our haste to cover every avenue that promises an advantage, we have unwittingly compromised that foundation. It's time to review what is working and what isn't. Supported by case studies and scientific research findings, Brainchild provides keen insights on how to nurture children to reach their full potential.

**Motherland** Fern Schumer Chapman,2001-04-01 A moving account of a mother and daughter who visit Germany to face the Holocaust tragedy that has caused their family decades of intergenerational trauma, from the author of *Brothers, Sisters, Strangers* Finalist for the National Jewish Book Award In 1938, when Edith Westerfeld was twelve, her parents sent her from Germany to America to escape the Nazis. Edith survived, but most of her family perished in the death camps. Unable to cope with the loss of her family and homeland, Edith closed the door on her past, refusing to discuss even the smallest details. Fifty-four years later, when the void of her childhood was consuming both her and her family, she returned to Stockstadt with her grown daughter Fern. For Edith the trip was a chance to reconnect and reconcile with her past; for Fern it was a chance to learn what lay behind her mother's silent grief. Together, they found a town that had dramatically changed on the surface, but which hid guilty secrets and lived in enduring denial. On their journey, Fern and her mother shared many extraordinary encounters with the townspeople and—more importantly—with one another, closing the divide that had long stood between them. *Motherland* is a story of learning to face the past, of remembering and honoring while looking forward and letting go. It is an account of the Holocaust's lingering grip on its witnesses; it is also a loving story of mothers and daughters, roots, understanding, and, ultimately, healing.

Stress R Us Greeley Miklashek,2018-04-20 This book is a compilation of what a neuropsychiatrist learned about the causes and cures of human diseases in his 41 year medical practice. I treated 25,000 of my fellows and wrote 1,000,000 Rx in the process. The book is divided into 51 Topics (chapters) and contains over 100 references. It serves as an historical review of the field of stress research as well as animal crowding research, as the two morphed together in my theory of population density stress. Human overpopulation is a fact, as we have far exceeded the earth's carrying capacity for our species and mother nature is attempting to cull our numbers through our multitude of diseases of civilization. Our hunter-gatherer contemporaries, living in their traditional manner in their clan social groups widely distributed in their ecosystem, have none of our diseases. As our extreme gene based altruism has brought us tremendous compassion and technological advances in caring for the diseases of our fellows, it has also brought us tremendous overpopulation and brought us near to ecological collapse. We must face our need to restrict our reproduction or mother nature will do it for us. A case in point: infertility in America has increased 100% in just 34 years, from 1982 to 2016. During the same period, our sperm counts have fallen 60%. No-one is willing to look at the obvious cause: neuro-endocrine inhibition of human reproduction resulting from population density stress. If any of this touches a nerve, please find the time in your busy, stressful day to stop for an hour and read this ground-breaking book. You may never have heard any of this information from any of your healthcare providers or the mass media. Big Pharma rules the minds of your healthcare providers and the mass media. At the end of my career as a practicing psychiatrist, I had become little more than a prescription writing machine and was actually instructed to stop wasting time talking to your patients and just write their prescriptions. So, I retired and spent the next 5 years writing this book. I hope you find it as illuminating as I did doing the research on our epidemic of stress diseases. No wonder that we are ever more anxious and depressed, in spite of taking our 4,300,000,000 Rx every year! The real cure for our diseases of civilization must be a worldwide reduction in family size and a concerted effort to increase the opportunities for women to access education and work, as well as birth control. The alternative is increasing human disease and infertility from population density stress. Please read this book and tell me if you don't agree with my surprising conclusions. Good luck and God bless us one and all!

**The Participatory Museum** Nina Simon,2010 Visitor participation is a hot topic in the contemporary world of museums, art galleries, science centers, libraries and cultural organizations. How can your institution do it and do it well? The Participatory Museum is a practical guide to working with community members and visitors to make cultural institutions more dynamic, relevant, essential places. Museum consultant and exhibit designer Nina Simon weaves together innovative design techniques and case studies to make a powerful case for participatory practice. Nina Simon's new book is essential for museum directors interested in experimenting with audience participation on the one hand and cautious about upending the tradition museum model on the other. In concentrating on the practical, this book makes implementation possible in most museums. More importantly, in describing the philosophy and rationale behind participatory activity, it makes clear that action does not always require new technology or machinery. Museums need to change, are changing, and will change further in the future. This book is a helpful and thoughtful road map for speeding such transformation. -Elaine Heumann Gurian, international museum consultant and author of *Civilizing the Museum* This book is an extraordinary resource. Nina has assembled the collective wisdom of the field, and has given it her own brilliant spin. She shows us all how to walk the talk. Her book will make you want to go right out and start experimenting with participatory projects. -Kathleen McLean, participatory museum designer and author of *Planning for People in Museum Exhibitions* I predict that in the future this book will be a classic work of museology. --Elizabeth Merritt, founding director of the Center for the Future of Museums
