Polarized Light in Animal Vision Gábor

Horváth, Dezső Varju, 2013-06-29 The subject of this volume is two-fold. First, it gathers typical polarization patterns occurring in nature. Second, it surveys the polarization-sensitive animals, the physiological mechanisms and biological functions of polarization sensitivity as well as the polarization-guided behaviour in animals. The monograph is prepared for biologists, physicists and meteorologists, especially for experts of atmospheric optics and animal vision, who wish to understand and reveal the message hidden in polarization patterns of the optical environment not directly accessible to the human visual system, but measurable by polarimetry and perceived by many animals. Our volume is an attempt to build a bridge between these two

physical and biological fields. In Part I we introduce the reader to the elements of imaging polarimetry. This technique can be efficiently used, e. g. in atmospheric optics, remote sensing and biology. In Part II we deal with typical polarization patterns of the natural optical environment. Sunrise/sunset, clear skies, cloudy skies, moonshine and total solar eclipses all mean quite different illumination conditions, which also affect the spatial distribution and strength of celestial polarization. We present the polarization patterns of the sky and its unpolarized (neutral) points under sunlit, moonlit, clear, cloudy and eclipsed conditions as a function of solar elevation. The polarization pattern of a rainbow is also shown. That part of the spectrum in which perception of skylight polarization is optimal under partly cloudy skies.

poisonous, its venom can kill up to sixty human adults? Can you believe that the silk moth caterpillar's appetite is so enormous that it can eat more than 1,000 times its weight each day? That's the equivalent of a human being able to eat 65,000 pounds of food a day! Filled with fascinating facts and tons of detailed photographs, 101 Animal Records is sure to be an instant favorite for kids, parents, and teachers alike!

Animal Talk 101 Lauren Bode,John Bell,2005-12-01 The turbulent times of the sixties, unrequited love, a lack of parental understanding, and a dream of musical success influence the author as an innocent youth to set out on a hitchhiking journey around the country carrying only a guitar and a change of clothes with a stranger from Colorado. Reality clashes with naivete as a small town midwestern boy sees firsthand the real world. Turned on by sex, drugs, and rock n roll he finds the streets to be psychedelic.

Emerging Voices for Animals in Tourism Jes Hooper, Carol Kline, 2024-02-14 While the study of animal-human interactions within the context of tourism has been explored in a greater number and diversity of ways within the last decade, the discourse remains divided between traditional tourism academia and outside disciplines 'looking in'. Tourism academia has borrowed philosophical, ethical, gender studies, sociological, ecological conservation, and economic lenses to explore animals in tourism, however collaboration with authors external to tourism studies remains few. This edited volume strengthens the bridge between

tourism academia and other disciplines by highlighting the fresh perspectives, emerging methodologies and innovative interdisciplinary conventions at the forefront of animals in tourism research, whilst critically working towards more ethical human-animal interactions within the tourism and leisure space. Split into four parts 'emerging motivations', 'emerging cultures', 'emerging narratives', and 'emerging reflections', this unique text will be widely applicable to scholars working towards equitable human-animal interactions within tourism.
