Animals ,2010 Electronic Time for Learning: Animals is an interactive sound book that examines some of the most captivating animals in the world through fascinating text, color photographs, and more than 120 authentic sounds and audio facts. Aimed at readers ages seven to ten, this hardcover book provides interesting statistics like habitat, life span, and conservation status for each animal, along with striking color photos from the San Diego Zoo. To hear animal sounds, readers enter three-digit codes found on the book's pages into the attached keypad. The variety of animal noises ranges from the familiar bellow of an elephant and howl of a wolf to the unique sounds of a kookaburra, bonobo, Tasmanian devil, flamingo, and camel. The book contains more than 15 total minutes of audio. Readers can also use the codes in Electronic Time for Learning: Animals to hear and answer dozens of animal-related trivia questions. For example: • Why do camels have a split upper lip? • What is a group of pelicans called? • What does the shell of the leatherback turtle allow it to do? • What is unique about the fur of a sea otter? Readers are certain to enjoy listening to the howls, hoots, and hisses of the natural world's wildest residents. The animals featured in Electronic Time for Learning: Animals include: • Mammals, including camels, antelope, giraffes, hippos, sheep, wolves, cheetahs, leopards, and mountain lions • Reptiles and amphibians, including frogs and toads, turtles and crocodiles, snakes, boas, pythons, cobras, and rattlesnakes • Birds, including hummingbirds, storks, hornbills, eagles, California condors, pelicans, toucans, and owls

Literacy Development in Early Childhood Beverly Otto,2019-02-14 Widely recognized as a leading text in its field, this popular guide explores literacy development beginning in infancy and through fourth grade. The latest edition continues to prepare teachers to create and implement literacy-rich curricula in early childhood classrooms, while providing updates to federal legislation and highlighting the impact of state standards on educational settings. Recent technology is integrated into activities used to enhance literacy competencies. Throughout the book, the author's approach to reflective teaching empowers teachers to become effective decision makers and thoughtful mediators in children's transactions with literacy. A conceptual and theoretical foundation for describing reading and writing processes is followed by research-based descriptions of the signs of emergent literacy and developmentally appropriate instructional strategies. The emphasis on linguistic and cultural diversity includes an array of approaches for supporting English language learners. Chapter extension activities challenge readers to apply concepts through observation, research, curriculum development, and discussion. Sample observation and assessment forms assist in determining children's progress in developing literacy.

Cases on Immersive Virtual Reality Techniques Yang, Kenneth C.C.,2019-04-12 As virtual reality approaches mainstream consumer use, new research and innovations in the field have impacted how we view and can use this technology across a wide range of industries. Advancements in this technology have led to recent breakthroughs in sound, perception, and visual processing that take virtual reality to new dimensions. As such, research is needed to support the adoption of these new methods and applications. Cases on Immersive Virtual Reality Techniques is an essential reference source that discusses new applications of virtual reality and how they can be integrated with immersive techniques and computer resources. Featuring research on topics such as 3D modeling, cognitive load, and motion cueing, this book is ideally designed for educators, academicians, researchers, and students seeking coverage on the applications of collaborative virtual environments.

Mobile Multimedia in Action Ilpo Koskinen,2011-12-31 Mobile Multimedia in Action displays a revealing picture of how people communicate using camera phones and other mobile multimedia devices. With such devices spreading faster than practically any other new technology, questions about how these devices are being used (and abused) to capture and distribute embarrassing or raunchy images and content, and what should be done about it, are surfacing. This volume presents the first detailed study of the use of these devices. Using a variant of social science research known as ethnomethodology, Koskinen explores the kinds of images people take with camera phones and how they use sound to enhance these images. The book asks two main questions. First, what kinds of methods of expression, such as visuals or sound, do people use when they design multimedia messages? Second, how do people interact with and respond to each other through mobile multimedia devices? Koskinen has a broader objective centering on the impact of these devices on human relationships and society at large. He asks, what do people do with these devices? Is mobile telephony moving toward a more practical direction, or will it simply become a visual chatty channel fit for gossip but not for real news or other practical purposes? What kind of social activities and organizations does it best serve—peer-to-peer networks or institutional ones? Koskinen examines these questions from three unique perspectives: the design elements of mobile multimedia, which considers methods of expression people use in designing multimedia messages; mobile multimedia as interaction, which looks into how people interact with each other using this technology and makes a case for studying multimedia as a naturally occurring activity; and mobile multimedia in society, which searches for answers as to the societal consequences of mobile multimedia usage. A groundbreaking work, Mobile Multimedia in Action will be a fascinating read for both multimedia device professionals and everyday users alike. Providing a glimpse into the future, Koskinen asks where mobile multimedia technology is taking mankind and society.
