Imaginary Languages Marina Yaguello,2023-09-19 An exploration of the practice of inventing languages, from speaking in tongues to utopian schemes of universality to the discoveries of modern linguistics. In *Imaginary Languages*, Marina Yaguello explores the history and practice of inventing languages, from religious speaking in tongues to politically utopian schemes of universality to the discoveries of modern linguistics. She looks for imagined languages that are autonomous systems, complete unto themselves and meant for communal use; imaginary, and therefore unlike both natural languages and historically attested languages; and products of an individual effort to lay hold of language. Inventors of languages, Yaguello writes, are madly in love: they love an object that belongs to them only to the extent that they also share it with a community. Yaguello investigates the sources of imaginary languages, in myths, dreams, and utopias. She takes readers on a tour of languages invented in literature from the sixteenth to the twentieth century, including that in More's *Utopia*, Leibniz's "algebra of thought," and Bulwer-Lytton's linguistic fiction. She examines the linguistic fantasies (or madness) of Georgian linguist Nikolai Marr and Swiss medium Hélène Smith; and

considers the quest for the true philosophical language. Yaguello finds two abiding (and somewhat contradictory) forces: the diversity of linguistic experience, which stands opposed to unifying endeavors, and, on the other hand, features shared by all languages (natural or not) and their users, which justifies the universalist hypothesis. Recent years have seen something of a boom in invented languages, whether artificial languages meant to facilitate international communication or imagined languages constructed as part of science fiction worlds. In *Imaginary Languages* (an updated and expanded version of the earlier *Les Fous du langage*, published in English as *Lunatic Lovers of Language*), Yaguello shows that the invention of language is above all a passionate, dizzying labor of love.

Language and Concept Acquisition from Infancy Through Childhood Jane B. Childers, 2020-02-03 This book examines the role of experience-based learning on children's acquisition of language and concepts. It reviews, compares, and contrasts accounts of how the opportunity to recognize and generalize patterns influences learning. The book offers the first systematic integration of three highly influential research traditions in the domains of language and concept acquisition: Statistical Learning, Structural Alignment, and the Bayesian learning perspective. Chapters examine the parameters that constrain learning, address conditions that optimize learning, and offer explanations for cases in which implicit exemplar-based learning fails to occur. By exploring both the benefits and challenges children face as they

learn from multiple examples, the book offers insight on how to better able to understand children's early unsupervised learning about language and concepts. Topics featured in this book include: Competing models of statistical learning and how learning might be constrained by infants' developing cognitive abilities. How experience with multiple exemplars helps infants understand space and other relations. The emergence of category-based inductive reasoning during infancy and early childhood. How children learn individual verbs and the verb system over time. How statistical learning leads to aggregation and abstraction in word learning. Mechanisms for evaluating others' reliability as sources of knowledge when learning new words. The Search for Invariance (SI) hypothesis and its role in facilitating causal learning. Language and Concept Acquisition from Infancy Through Childhood is an essential resource for researchers, clinicians and related professionals, and graduate students in infancy and early child development, applied linguistics, language education, child, school, and developmental psychology and related mental health and education services.

What's That Sound? Kristi Nielsen, 2020-11-16 What's that Sound? Animal Sounds Every child quickly learns to associate sounds with things they are familiar with as they start to learn language. A two-year-old may frequently ask What's that Sound? when they hear something they do not recognize. They are also excited about learning to mimic the sounds of things they are familiar with. Repetition and mimicking is an important part of learning

language. A child copies the sound a kitten makes, or the sound of a dog. Knowing how beneficial this process is for toddlers is the impetus for writing this book. The author's 23 month old grandson, asked What's that sound? so many times every day, a grandmother did what a grandmother does. She wrote and illustrated What's that Sound? Animal Sounds and What's that Sound? Transportation Sounds in response to his love for learning sounds. He quickly learned to make the sounds that correspond to various animals and transportation and construction equipment. His environment was filled with new sounds. His grandmother moved to a condo on a busy street and next door to his home a house was demolished and a new house was under construction. He, like most children at that stage of learning language, enjoyed learning the names the thing making the sound. Many times he could not see what was making the noise. For this reason a book supplies an opportunity to learn the vocabulary and phonetic expressions to match.

Serving Teen Parents Ellin Klor, Sarah Nordhausen, 2011-09-12 A comprehensive guide to working with teen parents and their children that provides practical program ideas for successful school and public library program development, implementation, and evaluation. Teen parents and their children represent an underserved, high-need population in many communities. Libraries have the potential to significantly influence the quality of life for teen parent families by providing free access to information and resources, developing specific programs, and serving as a safe, public learning environment.

Serving Teen Parents: From Literacy to Life Skills helps library staff support teen parents as their children's first teachers, positively affecting two generations at once. The authors explain how to successfully communicate with this group and build upon their competencies and strengths. They offer best practices, professional anecdotes, and step-by-step direction on connecting with teen parents, collaborating with community partners, locating funding options, and implementing successful programs. This invaluable guide is the most comprehensive resource currently available that directly addresses the needs of librarians serving the teen-parent demographic.

Does Your Dog Speak Hebrew? Ellen Bari, 2020-09-01 Kar-Ben Read-Aloud eBooks with Audio combine professional narration and text highlighting to bring eBooks to life! A dog says "bow, wow" in English and "hav, hav" in Hebrew. Whimsical animals in American and Israeli settings compare their varied noises and sounds. Readers can explore which sounds are the same and which are different in droll depictions of animals in Israel and the United States. Basic Hebrew vocabulary, including animal names and sounds, are introduced. Iconic locations like Capitol Hill and Central Park in the United States, and the Dome of the Rock and the Sea of Galilee in Israel are featured in illustrations.

Animal Sounds Aurelius Battaglia, 2013-10-30 What does the crow say? Caw! Caw! The donkey says hee-haw, hee-haw! The cow says moo-o-o-o-o! What do the owls say? Whoo-o-o-o-o! Children will love imitating the sounds each of the

animals, birds, and insects make in this colorfully illustrated sturdy board book.

Animal Soundscapes in Anglo-Norman Texts Liam Lewis, 2022 A redefinition of the animal's relationship to sound and language in French texts from medieval England. The barks, hoots and howls of animals and birds pierce through the experience of medieval texts. In captivating episodes of communication between species, a mandrake shrieks when uprooted from the ground, a saint preaches to the animals, and a cuckoo causes turmoil at the parliament of birds with his familiar call. This book considers a range of such episodes in Old French verse texts, including bestiaries, treatises on language, the Life of Saint Francis of Assisi and the Fables by Marie de France, aiming to reconceptualize and reinterpret animal soundscapes. It argues that they draw on sound to produce competing perspectives, forms of life, and linguistic subjectivities, suggesting that humans owe more to animal sounds than we are disposed to believe. Texts inviting readers to listen and learn animal noises, to seek spiritual consolation in the jargon of birds, or to identify with the speaking wolf, create the conditions for an assertion of human exceptionalism even as they simultaneously invite readers to question such forms of control. By asking what it means for an animal to cry, make noise, or speak in French, this book provides an important resource for theorizing sound and animality in multilingual medieval contexts, and for understanding the animal's role in the interpretation of the natural world.

Multilingual Aspects of Speech Sound Disorders in Children Sharynne McLeod, Brian Goldstein, 2012-02-20 Multilingual Aspects of Speech Sound Disorders in Children explores both multilingual and multicultural aspects of children with speech sound disorders. The 30 chapters have been written by 44 authors from 16 different countries about 112 languages and dialects. The book is designed to translate research into clinical practice. It is divided into three sections: (1) Foundations, (2) Multilingual speech acquisition, (3) Speech-language pathology practice. An introductory chapter discusses cross-linguistic and multilingual aspects of speech sound disorders in children. Subsequent chapters address speech sound acquisition, how the disorder manifests in different languages, cultural contexts, and speakers, and addresses diagnosis, assessment and intervention. The research chapters synthesize available research across a wide range of languages. A unique feature of this book are the chapters that translate research into clinical practice. These chapters provide real-life vignettes for specific geographical or linguistic contexts.

Animal Noises Thomas Flintham, 2015-01-01 The chickens are clucking and the cows are mooing, in this fun rhyming picture e-book... it's a very noisy day on this farm, until bedtime comes and the farmyard is quiet. With a simple, engaging story, this is the perfect animal sounds book for toddlers.

Creature Sounds , 2014-09-09 In this ten-page board book, young readers learn animal sounds. The up-close-and-personal images of everyone's favorite

animals makes this a perfect gift for any child learning his or her colors as well as mini works of art that can be enjoyed by animal lovers of all ages.--

Reading Sounds Sean Zdenek, 2015-12-23 Imagine a common movie scene: a hero confronts a villain. Captioning such a moment would at first glance seem as basic as transcribing the dialogue. But consider the choices involved: How do you convey the sarcasm in a comeback? Do you include a henchman's muttering in the background? Does the villain emit a scream, a grunt, or a howl as he goes down? And how do you note a gunshot without spoiling the scene? These are the choices closed captioners face every day. Captioners must decide whether and how to describe background noises, accents, laughter, musical cues, and even silences. When captioners describe a sound—or choose to ignore it—they are applying their own subjective interpretations to otherwise objective noises, creating meaning that does not necessarily exist in the soundtrack or the script. Reading Sounds looks at closed-captioning as a potent source of meaning in rhetorical analysis. Through nine engrossing chapters, Sean Zdenek demonstrates how the choices captioners make affect the way deaf and hard of hearing viewers experience media. He draws on hundreds of real-life examples, as well as interviews with both professional captioners and regular viewers of closed captioning. Zdenek's analysis is an engrossing look at how we make the audible visible, one that proves that better standards for closed captioning create a better entertainment experience for all viewers.

Everyday Physics: Waves - From Sounds And Light To Tsunamis And Gravitation Michel A Van Hove, 2024-01-10 This book aims to popularize physics by emphasizing conceptual ideas of physics and their interconnections, while avoiding mathematics entirely. The approach is to explore intriguing topics of daily relevance by asking and discussing questions: thereby the reader can participate in developing answers, which enables a deeper understanding than is achievable with memorization. The topic of this book – waves – is chosen because we experience waves in many forms every minute of our lives, from sound waves and light waves to quantum waves and brain waves. The target readership of this book is very broad: all those with a curious mind about nature and with a desire to understand how nature works, especially laymen, youngsters, secondary-school children and their teachers.
