This issue will bring light to the latest thoughts and clinical recommendations for delivery during the periviable period. Top thought leaders and clinicians have submitted articles in the following areas: Consequences of Birth at Periviable Gestations on Organ Systems; Medical and Surgical Interventions Before Birth; NICU Care: Nutrition/NEC; Pulmonary Care and Circulatory Support; NICU Stay and Microbiome; and Ethical Considerations and Counseling, to name a few. Readers will come away with the most current content written on this topic and details that can be incorporated into clinical care.

**Tidal Flat Estuaries** Job Baretta,Piet Ruardij,2012-12-06 In view of the increasing problems of waste disposal in the Netherlands, plans were made to pipeline the waste to the Ems-Dollard estuary. To evaluate the practicability a project was started with the aim to implement a simulation model of an estuary ecosystem. This model was based on the knowledge of the hydrology, geochemistry and biology of the Ems estuary. For this approach data of the abiotic and biotic environment were collected in studies of the Ems estuary and are presented in this report. With its comprehensive information of biological processes as food webs, biomass production and nutrient supply, as well as of sedimentological and flux parameters, this book can be considered as a general model of an estuary ecosystem.
