In contrast, recent research with behavioral and neuroimaging methodologies emphasizes language embodiment, which claims for the central role of the body and brain in shaping language acquisition, learning, comprehension, and production. The embodiment view of language is supported by a body of empirical research covering the principles and mechanism of body-mind integration from interdisciplinary perspectives, including cognitive linguistics, educational psychology, artificial intelligence, and physiological neuroscience.

Language Disorders in Speakers of Chinese Sam-po Law,Brendan Weekes,Anita M-Y. Wong,2009 Research interest in Chinese language impairments can be traced back to the 1930s. Despite the significant advances made in this field over the past two decades, this body of work has not received the attention it deserves. This book fills a gap in the field and represents the latest research in Chinese language disorders in children and adults. The work presented in this volume addresses theoretical and clinical issues relevant to specific language impairment in children, developmental dyslexia, phonological impairment in children and adults, and acquired dyslexia and dysgraphia. The book will appeal to interdisciplinary researchers from cognitive psychology, linguistics, and neurology with interests in the Chinese language, speech-language therapists working with Chinese-speaking clients, educationists, in particular language teachers of children learning to read and write Chinese, as well as neuroscientists. It will serve as a good reference book for advanced level undergraduate courses or graduate courses in speech/language pathologies and psycholinguistics.--Jacket.

Max's Words Kate Banks,2006-08-08 When Max cuts out words from magazines and newspapers, collecting them the way his brothers collect stamps and coins, they all learn about words, sentences, and storytelling.

Winter's Rain Wynters Reign,2010-10-19 Winters Rain tells the story of a time when life remained an unfair spiritual war game. It was a time when there were uncertainties and untold mysteriesand for some, fame. It was a cold day in hell, where no one could tell what it was like living in a jail cell. It was

a time when challenges spread their way across the sky and when great torrential downpours and blocks of ice astounded more than the pounded dough of the American pie. It was when heavy winds ruled over rough terrains pooled in the distillation of predatory fears. It was a time when the merchant of death ruled like a plague with no breath, but not without the pain of knowing persistent suffering once again. Winters Rain uniquely portrays hidden sadness and loneliness. Of the many that embarked upon this sad and lonely journey, far too many lay in waste due to unattended gurneys. All have been consumed by the bombardment of fear. All have fallen prey to its savage rival steer, for not even hell can resist the stall of innocent pain when nighttime falls upon the dream of life during a writer's Winter's Rain.

Reading Sounds Sean Zdenek,2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue, as one might assume at first, but consists largely of making rhetorical choices. For Sean Zdenek, when captioners describe a sound they are interpreting and creating contexts, they are assigning significance, they are creating meaning that doesn't necessarily exist in the soundtrack or the script. And in nine chapters he analyzes the numerous complex rhetorical choices captioners make, from abbreviating dialogue so it will fit on the screen and keep pace with the editing, to whether and how to describe background sounds, accents, or slurred speech, to nonlinguistic forms of sound communication such as sighing, screaming, or laughing, to describing music, captioned silences (as when a continuous noise suddenly stops), and sarcasm, surprise, and other forms of meaning associated with vocal tone. Throughout, he also looks at closed captioning style manuals and draws on interviews with professional captioners and hearing-impaired viewers. Threading through all this is the novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning, thereby better serve the needs of hearing-impaired viewers. The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the Internet, where captioning can take on additional functions such as enhancing searchability. While scholarly work has been done on captioning from a legal perspective, from a historical perspective, and from a technical perspective, no one has ever done what Zdenek does here, and the original analytical models he offers are richly interdisciplinary, drawing on work from the fields of technical communication, rhetoric, media studies, and disability studies.

Verb Concepts in Child Language Richard Weist,1982

Things to Do Elaine Magliaro,2017-02-07 With playful prose and vivid art, Things to Do brings to life the small moments and secret joys of a child's day. There are wonders everywhere. In the sky and on the ground—blooming in a flower bed, dangling from a silken thread, buzzing through the summer air—waiting ...waiting to be found. In this thoughtful and ingenious collection of poems, Elaine Magliaro, an elementary school teacher for more than three decades and a school librarian for three years, and illustrator Catia Chien provide a luminous glimpse of the ordinary wonders all around us. Plus, this is the fixed format version, which looks almost identical to the print edition.

Routes to Language Virginia C. Mueller Gathercole,2008-12-19 This volume contains contributions from leaders in the field of child language in honor of one of the preeminent scholars in the field of child language acquisition, Melissa Bowerman. Melissa Bowerman has had a profound, widespread, and enduring influence on research conducted in the field for nearly 40 years. In addition to being a tribute to Professor Bowerman and her work, the chapters provide the most up-to-date statement of key positions by several leaders in the field of child language development. Fundamental questions in the field are explored in depth, and there are rich analyses of progress in the field in a number of areas, including learning words; crosslinguistic patterning and acquisition of lexical semantics; crosslinguistic patterning and events, paths, and causes; and influences on development. The volume is essential reading for researchers in child language and development, linguistics, psychology, education, and speech pathology, as well as researchers and practitioners specializing in the many specific languages discussed in the book.
