*Producing Independent 2D Character Animation* Mark A. Simon, 2013-02-11 PRODUCING INDEPENDENT 2D CHARACTER ANIMATION takes an in-depth look at the artistry and production process of cel animation in a friendly, how-to manner that makes the sometimes tedious process of animation enjoyable and easy to understand. This book guides animators through every step of planning and production; includes examples of actual production forms, organization tips, screen shots, and sketches from the pre- to post-production processes; and contains detailed information on the hardware and software used to complete each step. By mapping out the course of how his small studio brainstormed, created, then produced its award-winning animation, TIMMY'S LESSONS IN NATURE, Mark Simon explains to animators what it takes-both creatively and resource-wise-to get their animations to market. Includes exclusive interviews with Oscar-nominated independent animator Bill Plimpton, Craig McCracken, creator of the POWER PUFF GIRLS, Craig Spike Decker of SPIKE & MIKE'S SICK AND TWISTED FESTIVAL OF ANIMATION, David Fine & Alison Snowden who are the Academy Award-Winning producers of BOB AND MARGARET, Cartoon Network's Senior Vice President of Original Animation, Linda Simensky, and Tom Sito, Co-Director of OSMOSIS JONES...as well as others.

Learning by Design and Second Language Teaching Gabriela C. Zapata, 2022-04-20 Learning by Design and Second Language Teaching establishes theoretical, research, and practice connections between the multiliteracies framework Learning by Design and L2 teaching and learning. A comprehensive introductory chapter presents the theoretical tenets of the approach and is followed by four chapters devoted to the establishment of connections between the framework and L2 instruction, information on evidence-based pedagogical practices and suggestions for their implementation, and task examples that can be adapted for use in a variety of educational contexts. Each

chapter links theory and research to practical steps instructors can take to select authentic materials and create tasks in each of the framework's knowledge processes with the objective of developing L2 students' performance in the interpersonal (speaking), interpretive (reading and listening), and presentational (writing) modes of communication. A selection of guidance charts, figures, templates, and extra digital resources are included within the text to support learning and teaching. The book will be of interest to graduate students and in-service and future L2 teachers in all levels of instruction. Chapter 1, Chapter 2 and Chapter 3 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <http://www.taylorfrancis.com>.

The Guerrilla Guide to Animation Walter Santucci, 2009-03  
The Guerrilla Guide to Animation: Making Animated Films Outside the Mainstream seeks to teach those not able to afford animation training or who seek to find an alternate path. It's meant to provide the outsider, the anarchist, the rebel, guidance into the world of 2D animation. Provocatively written, the author's experience in directing and teaching makes him the perfect source for all of those would-be animators out there.

**Entertainment Science** Thorsten Hennig-Thurau,Mark B. Houston,2018-08-01 The entertainment industry has long been dominated by legendary screenwriter William Goldman’s “Nobody-Knows-Anything” mantra, which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage – the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney’s recent success. Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new entertainment product succeed. The book thus offers a timely alternative to “Nobody-Knows” decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of

success in the entertainment industry. Entertainment Science is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Hennig-Thurau and Mark B. Houston – two of our finest scholars in the area of entertainment marketing – have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard Professor Emeritus of Marketing, Columbia University Entertainment Science is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can't be ignored anymore. Hennig-Thurau and Houston are the scientific frontrunners of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig Entertainment Science's winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists.
