Magic as Metaphor in Anime Dani Cavallaro, 2010-03-08 Since its inception as an art form, anime has engaged with themes, symbols and narrative strategies drawn from the realm of magic. In recent years, the medium has increasingly turned to magic specifically as a metaphor for a wide range of cultural, philosophical and psychological concerns. This book first examines a range of Eastern and Western approaches to magic in anime, addressing magical thinking as an overarching concept which unites numerous titles despite their generic and tonal diversity. It then explores the collusion of anime and magic with reference to specific topics. A close study of cardinal titles is complemented by allusions to ancillary productions in order to situate the medium's fascination with magic within an appropriately broad historical context.

Out of the Inkwell Richard Fleischer, 2005-06-24 Max Fleischer (1883–1972) was for years considered Walt Disney's only real rival in the world of cartoon animation. The man behind the creation of such legendary characters as Betty Boop and the animation of Popeye the Sailor and Superman, Fleischer asserted himself as a major player in the development of Hollywood entertainment. *Out of the Inkwell: Max Fleischer and the Animation Revolution* is a vivid portrait of the life and world of a man who shaped the look of cartoon animation. Also interested in technical innovation, Fleischer invented the rotoscope—a device that helped track live action and allowed his cartoons to revolutionize the way animated characters appeared and moved on-screen. In the 1920s, Fleischer created a series of “*Out of the Inkwell*” films, which led to a deal with Paramount. Their character Koko the Clown introduced new animation effects by growing out of Fleischer's pen on-screen. As the sound revolution hit film, the studio produced shorts featuring the characters interacting with songs and with the now-famous bouncing ball that dances across lyrics projected on the screen. Max Fleischer's story is also one of a creative genius struggling to fit in with the changing culture of golden age cinema. *Out of the Inkwell* captures the twists and turns, the triumphs and disappointments, and most of all the breathless energy of a life vibrantly lived in the world of animation magic.

The Magic Behind the Voices Tim Lawson, Alisa Persons, 2004-12-09 *The Magic Behind the Voices* is a fascinating package of biographies, anecdotes, credit listings, and photographs of the actors who have created the unmistakable voices for some of the most popular and enduring animated characters of all time. Drawn from dozens of personal interviews, the book features a unique look at thirty-nine of the hidden artists of show business. Often as amusing as the characters they portray, voice actors are charming, resilient people—many from humble

beginnings-who have led colorful lives in pursuit of success. Beavis and Butthead and King of the Hill's Mike Judge was an engineer for a weapons contractor turned self-taught animator and voice actor. Nancy Cartwright (the voice of Bart Simpson) was a small town Ohio girl who became the star protégé of Daws Butler-most famous for Yogi Bear, Huckleberry Hound, and Quick Draw McGraw. Mickey Mouse (Wayne Allwine) and Minnie Mouse (Russi Taylor) are a real-life husband-and-wife team. Spanning many studios and production companies, this book captures the spirit of fun that bubbles from those who create the voices of favorite animated characters. In the earliest days of cartoons, voice actors were seldom credited for their work. A little more than a decade ago, even the Screen Actors Guild did not consider voice actors to be real actors, and the only voice actor known to the general public was Mel Blanc. Now, Oscar-winning celebrities clamor to guest star on animated television shows and features. Despite the crushing turnouts at signings for shows such as Animaniacs, The Simpsons, and SpongeBob Squarepants, most voice actors continue to work in relative anonymity. The Magic Behind the Voices features personal interviews and concise biographical details, parting the curtain to reveal creators of many of the most beloved cartoon voices. Tim Lawson is a freelance writer and filmmaker who lives in Galesburg, Illinois. Alisa Persons is a freelance writer, artist, animator, and filmmaker, who lives in Superior, Wisconsin.

Animation between Magic, Miracles and Mechanics Hans Henrik Lohfert Jørgensen,Laura Katrine Skinnebach,Henning Laugerud,2023-08-18 When it comes to images, we are all animists. Deep down, we all know that images can – at least potentially – be alive or come to life. Nowadays, we may tend to rationalize our ingrained animism and explain it away as a mere projection only happening in the space between image and viewer. In the Middle Ages, however, imagery made enthusiastic use of magical, miraculous and mechanical means of animation, empowered and ensouled by both natural and supernatural principles of life. This animist book investigates magic, miracles and mechanics as motors of animation and seeks to understand the living image in solidarity with medieval experience rather than dismissive alienation of it. Effigies did bleed, weep or lactate, either through divine intervention or through hydraulic machinery. Statues did move or speak, either as demonic oracles or as talking heads with implanted speaking tubes. Marvels made by magic or by miracles were real, as real as the wonders of physical mechanics moving bodily matter. We just need to look and listen more carefully to comprehend these fluid realities, even when – especially when – they challenge our received worldview. Animation was by no means uncontested or uncontradicted, but even its stiffest critics knew that gods and demons could intervene in inanimate matter to set it in motion, to speak in tongues and exude the liquids of life.
