Linguistics and the Study of Comics Frank Bramlett,2012-05-09 Do Irish superheroes actually sound Irish? Why are Gary Larson's Far Side cartoons funny? How do political cartoonists in India, Turkey, and the US get their point across? What is the impact of English on comics written in other languages? These questions and many more are answered in this volume, which brings together the two fields of comics research and linguistics to produce groundbreaking scholarship. With an international cast of contributors, the book offers novel insights into the role of language in comics, graphic novels, and single-panel cartoons, analyzing the intersections between the visual and the verbal. Contributions examine the relationship between cognitive linguistics and visual elements as well as interrogate the controversial claim about the status of comics as a language. The book argues that comics tell us a great deal about the sociocultural realities of language, exploring what code switching, language contact, dialect, and linguistic variation can tell us about identity – from the imagined and stereotyped to the political and real.

Multiple Translation Communities in Contemporary Japan Beverley Curran,Nana Sato-Rossberg,Kikuko Tanabe,2015-04-17 Multiple Translation Communities in Contemporary Japan offers a collection of essays that (1) deepens the understanding of the cultural and linguistic diversity of communities in contemporary Japan and how translation operates in this shifting context and circulates globally by looking at some of the ways it is theorized and approached as a significant social, cultural, or political practice, and harnessed by its multiple agents; (2) draws attention to the multi-platform translations of cultural productions such as manga, which are both particular to and popular in Japan but also culturally influential and widely circulated transnationally; (3) poses questions about the range of roles translation has in the construction, performance, and control of gender roles in Japan, and (4) enriches Translation Studies by offering essays that problematize critical notions related to translation. In short, the essays in this book highlight the diversity and ubiquity of translation in Japan as well as the range of methods being used to understand how it is being theorized, positioned, and practiced.

Stereotypes and Language Learning Motivation Larisa Nikitina,2020-04-28 This book explores stereotypes that learners of six Asian languages— Japanese, Mandarin, Korean, Myanmar, Thai and Vietnamese—hold about the target language country, its cultures and people. Some of the findings, such as the language learners’ mental images of Myanmar, Thailand and Vietnam, are presented here for the first time. Recognizing that stereotypes, and attitudes embedded in them, have an impact on people’s actions and behavioural intentions, this book examines whether and how the country stereotypes held by the students influenced their motivation to learn the target language. Besides providing worthwhile insights into the content and structure of the country stereotypes and their relationship with language learning motivation, this book offers methodological and theoretical advancements. Drawing on intellectual heritage of Russian psychologist Lev Vygotsky (1896-1934) the book highlights how the concepts of word meaning (znachenie slova) and word sense (smysl) could be fruitfully employed in studies on stereotypes that people learning a foreign language hold about a target language country. This book will appeal to all readers interested in stereotypes that people have about foreign countries and also to educators and researchers who study language learning motivation.

Cinema of Actuality Yuriko Furuhashi,2013-07-26 During the 1960s and early 1970s, Japanese avant-garde filmmakers intensely explored the shifting role of the image in political activism and media events. Known as the season of politics, the era was filled with widely covered dramatic events from hijackings and hostage crises to student protests. This season of politics was, Yuriko Furuhashi argues, the season of image politics. Well-known directors, including Oshima Nagisa, Matsumoto Toshio, Wakamatsu Kōji, and Adachi Masao, appropriated the sensationalized media coverage of current events, turning news stories into material for timely critique and intermedial experimentation. Cinema of Actuality analyzes Japanese avant-garde filmmakers' struggle to radicalize cinema in light of the intensifying politics of spectacle and a rapidly changing media environment, one that was increasingly dominated by television. Furuhashi demonstrates how avant-garde filmmaking intersected with media history, and how sophisticated debates about film theory emerged out of dialogues with photography, television, and other visual arts.

The Gendered Motorcycle Esperanza Miyake,2018-06-14 What happens to gender at 120mph? Are Harley-Davidsons more masculine than Yamahas? The Gendered Motorcycle answers such questions through a critical examination of motorcycles in film, advertising and television. Whilst bikers and biker cultures have been explored previously, the motorcycle itself has remained largely under-theorised, especially in relation to gender. Esperanza Miyake reveals how representations of motorcycles can produce different gendered bodies, identities, spaces and practices. This interdisciplinary book offers new and critical ways to think about gender and motorcycles, and will interest scholars and students of gender, technology and visual cultures, as well as motorcycle industry practitioners and motorcycle enthusiasts.

The Rise of Transtexts Benjamin W.L. Derhy Kurtz,Mélanie Bourdaa,2016-08-25 This volume builds on previous notions of transmedia practices to develop the concept of transtexts, in order to account for both the industrial and user-generated contributions to the cross-media expansion of a story universe. On the one hand exists industrial transmedia texts, produced by supposedly authoritative authors or entities and directed to active audiences in the aim of fostering engagement. On the other hand are fan-produced transmedia texts, primarily intended for fellow members of the fan communities, with the Internet allowing for connections and collaboration between fans. Through both case studies and more general analyses of audience participation and reception, employing the artistic, marketing, textual, industrial, cultural, social, geographical, technological, historical, financial and legal perspectives, this multidisciplinary collection aims to expand our understanding of both transmedia storytelling and fan-produced transmedia texts.
