The Beer Monopoly Ina Verstl, Ernst Faltermeier, 2016-11-09 How could a small Belgian brewer become the world's largest brewing group within two decades? Interbrew's transformation into InBev and then into Anheuser-Busch InBev (AB-InBev) is emblematic of the race for unchallenged market domination between the world's four biggest brewing companies. The Beer Monopoly explores how this happened and examines the economic drivers behind globalisation. AB-InBev's takeover of SABMiller - the world's number one and two brewers respectively - closes an amazing epoch in beer history. This book charts the fascinating rise of these two brewing giants as they showed that dealmaking provided a faster path to profit growth than any sales hike could ever accomplish. The importance of deals - those made and those missed - is also visible in the track record of Heineken and Carlsberg, the brewers on the next two rungs of the global ladder. While all of these brewers pursued the goal of building empires, each had different reasons and faced a variety of obstacles along the way. Sharing a keen interest in the brewing industry - not to mention a passion beer - two economists, Ina Verstl and Ernst Faltermeier, have provided a timely out-of-the-box analysis of globalisation.

Global Collaboration: Intercultural Experiences and Learning Martine Cardel Gertsen, 2012-05-15 Offers qualitative studies of collaboration processes conducted in globalising companies based in Denmark and with subsidiaries in Asia. It addresses the specific contexts of collaboration and studies how people with different cultural backgrounds work together, both face-to-face and in the virtual workplace.

Viral Language Luke C. Collins, Veronika Koller, 2023-09-29 Viral Language considers a range of

different types of public communication and their discussion of the Covid-19 pandemic as a way to investigate health communication. The authors introduce and apply a range of approaches informed by linguistic theory to investigate experiences of the pandemic across a variety of public contexts. In doing so, they demonstrate how experiences of health and illness can be shaped by political messaging, scientific research, news articles and advertising. Through a series of case studies of Covid-related texts, the authors consider aspects of language instruction, information and innovation, showcasing the breadth of topics that can be studied as part of health communication. Furthermore, each case study provides practical guidance on how to carry out investigations using social media texts, how to analyse metaphor, how to track language innovation and how to work with text and images. *Viral Language* is critical reading for postgraduate and upper undergraduate students of applied linguistics and health communication.

Strategic Risk Leadership Torben Juul Andersen, Peter C. Young, 2020-02-24 Modern risk management as practiced today faces significant obstacles—we argue—primarily due to the fundamental premise of the concept itself. It asserts that we are mainly dealing with measurable, quantifiable risks and that we can manage the uncontrollable by relying on formal control-based systems, which has produced a general view that (enterprise) risk management is a technical-scientific discipline. *Strategic Risk Leadership* offers a critique of the status quo, and encourages leaders, executives, and chief risk officers to find fresh approaches that can help them deal more proactively with what the future may hold. The book provides an overview of the history of risk management and current risk governance approaches as prescribed by leading risk management standards, such as COSO and ISO31000. This enables practitioners to challenge the frameworks

and improve their adoption in practice introducing sustainable resilience as a (more) meaningful response to uncertain and unknowable conditions. The book shows how traditional thinking downplays the significance of human behavior and judgmental biases as key elements of major organizational exposures illustrated and explained through numerous case examples and studies. This book is essential reading for strategic risk managers to understand the requirements for effective risk governance practices in the contemporary and rapidly changing global risk landscape. Indeed, it is a valuable resource for all risk executives, leaders, and chief risk officers, as well as advanced students of risk management.

Relationship Economics David Nour, 2023-02-14 Fuel your growth through some of your most valuable and strategic contacts Building sustainable relationships, both professionally and personally, is the biggest competitive advantage in a world where automation, artificial intelligence, and machine learning are eliminating the human experience, which is what creates emotional connections. Currency® and Relationship Capital® Deep discussion of the fundamental measures of business relationships Impactful strategies for turning your contacts into better executions, performance, and results A must-read for executives, managers, and other business leaders, the third edition of Relationship Economics will also earn a place in the libraries of professionals seeking to improve their ability to attract, retain, and convert clients.

Resilient Organizations Guia Beatrice Pirotti, Markus Venzin, 2016-12-22 This book studies the development of organizational resilience in the wake of a crisis.

The Global Brewery Industry Jens Gammelgaard, Christoph Dörrenbächer, 2013-01-01 This book describes a number of different empirical studies and evaluations of the international brewery industry. This industry has recently undergone two climactic changes within a ten to fifteen year time period. These are a significant industry-wide consolidation of firms and market shares accompanied by the internationalization of what was previously a largely local industry. Understanding the drivers and implications of such abrupt and massive change in the competitive environment of an industry is of great interest to international and strategic management scholars. Most of the book's chapters address this issue, some at the global industry level, some at a regional level, and some at the level of a specific country. Taken together, they comprise an insightful case study of an interesting industry at its most interesting point in time. William G. Egelhoff, Fordham University, US The individual contributions in this volume paint a varied and rich picture of strategies and rivalries, the role of environments and institutions, leadership and also customer approaches in both global and local brewery industry. Some of the analysed

phenomena are more standard to an IB audience, like consolidation, technological development, and shifts in global markets, but they get a specific flavor and color through this industry focus, while other topics definitely seem more specific (like ÒBierstrasseÓ on Mallorca). For readers with good taste.Õ Ð Rian Drogendijk, Uppsala University, Sweden This unique book explores some of the key topics of international business through the context of a global industry, focusing on the challenges brewery companies face as they operate in globalized markets. It examines the strategies of individual firms to develop markets and explores new insights into recent company rivalries, both globally and locally. In addition, it offers detailed analysis of some of the major players in the industry through longitudinal studies. Drawing on a range of perspectives, the contributing authors explore six overarching themes: international market developments and firm performance; host country institutional effects; multi-point competition and rivalries; cross-border M&A integration and subsidiary development; leadership and internationalization; and boundless customer interfaces through such elements as social media and tourism. The Global Brewery Industry will prove insightful for scholars across international business, as well as providing an appealing case study for advanced students. It will be invaluable to those investigating the brewery sector specifically, or working with brewing firms.

Informal Workers and Collective Action Adrienne E. Eaton, Susan J. Schurman, Martha A. Chen, 2017-04-03 Informal Workers and Collective Action features nine cases of collective action to improve the status and working conditions of informal workers. Adrienne E. Eaton, Susan J. Schurman, and Martha A. Chen set the stage by defining informal work and describing the types of organizations that represent

the interests of informal workers and the lessons that may be learned from the examples presented in the book. Cases from a diverse set of countries—Brazil, Cambodia, Colombia, the Dominican Republic, Georgia, Liberia, South Africa, Tunisia, and Uruguay—focus on two broad types of informal workers: waged workers, including port workers, beer promoters, hospitality and retail workers, domestic workers, low-skilled public sector workers, and construction workers; and self-employed workers, including street vendors, waste recyclers, and minibus drivers. These cases demonstrate that workers and labor organizations around the world are rediscovering the lessons of early labor organizers on how to aggregate individuals' sense of injustice into forms of collective action that achieve a level of power that can yield important changes in their work and lives. *Informal Workers and Collective Action* makes a strong argument that informal workers, their organizations, and their campaigns represent the leading edge of the most significant change in the global labor movement in more than a century.

Sustainable Governance in Hybrid Organizations Linne Marie Lauesen, 2016-03-03 In Sustainable Governance in Hybrid Organizations the author Linne Marie Lauesen explores how businesses that have succeeded in conducting sustainable governance, manage and govern their sustainable performance: in other words, how they manage to be economically, socially, and environmentally sustainable. In this respect, hybrid organizations that are formed as businesses with a mission to be sustainable and to provide services for society - such as water companies - are a good point of departure. Water companies are highly regulated whilst working primarily for the betterment of society and on behalf of generations to come, for whom clean and plentiful water and the preservation of nature is a must. Linne Marie has dug deep into these types of hybrid organizations in order to reveal which mechanisms of organizational governance for sustainability are at play, and how these organizations manage to balance their triple bottom lines in order to survive financially, socially, and environmentally and make a business out of their conduct. Balancing these three bottom lines in a sustainable way is explained in a clear and accessible way and the juxtaposition between non-profit and for-profit water companies will show how this model can be transferred to other business spheres.

Beer in East Asia Paul Chambers, Nithi Nuangjamnong, 2023-03-17 Chambers, Nuangjamnong, and their contributors look at how the development of the beer industry in East Asia presents a unique opportunity

for understanding the region's political economy. Asia is both the world's largest beer-consuming and beer-producing region, and the fastest growing beer market. Per-capita consumption is lower than Europe, but catching up fast. Beer consumption is also widely understood to correlate closely with economic growth and urbanization, much more so than other alcoholic beverages like spirits. With ten country case studies from both Northeast and Southeast Asia, the contributors to this volume look at the history of beer production and consumption across East Asia through a lens of historical institutionalism and political economy. In doing so they not only examine the development of the beer industry in the region but also what it tells us about the countries themselves. They ask questions such as: To what extent have state versus societal actors influenced the path of beer production? How has beer production changed? Was there a critical juncture at which beer production abruptly changed course? A valuable resource for students and scholars of modern East Asian History, and particularly those with a focus on colonial history, industrial history, and state-society relations.

Institutional Logics in Action Michael Lounsbury, Eva Boxenbaum, 2013-07-09 The Institutional Logics Perspective is one of the fastest growing new theoretical areas in organization studies (Thornton, Ocasio & Lounsbury, 2012). Building on early efforts by Friedland & Alford (1991) to bring society back in to the study of organizational dynamics, this new scholarly domain has revived institutional analysis by embracing a

Investing in carbon neutrality: Utopia or the new green wave? Santos, N., Monzini Taccone di Sitizano, J., Pedersen, E., Borgomeo, E., 2022-06-17 The world's agrifood systems are on the frontlines of climate

change, both as a cause and a victim. The agrifood sector is increasingly being targeted and curbing emissions is becoming a key global investment and policy theme. 'Investing in carbon neutrality: utopia or the new green wave?' presents a comprehensive assessment of the key challenges and opportunities of carbon neutrality, and scopes out the road ahead for agrifood systems. It provides strategic insights on the actions needed to move the carbon neutrality agenda forward in terms of investment opportunities and public policy priorities, with important recommendations for development partners. This publication is part of the Directions in Investment series under the FAO Investment Centre's Knowledge for Investment (K4I) programme.

International Business Strategy Peter J Buckley, Pervez Ghauri, 2015-02-20 With stagnated demand in many home economies, the need to internationalize and exploit foreign market opportunities has never been more paramount for businesses to succeed at a global level. However, this process raises a number of questions, such as: can firms use their knowledge of one market in the next? Can firms pursue internationalization on several fronts at the same time? How should firms handle cultural and institutional differences between markets? This textbook provides students with the core research in international business and strategy, including organization, efficiency, external relationships and the challenges found in an increasingly multicultural world. Each part begins with a presentation of the issues and controversies faced in that particular area, followed by a synthesis of the research which provides avenues for future research. To facilitate and encourage further debate and learning, each part also includes at least one original case study. Compiled by two of the World's leading scholars of international business, and supplemented

with critical commentaries and a range of integrative case studies, this comprehensive textbook provides advanced students of international business and strategy with a resource that will be invaluable in their studies and beyond.

How China Loses Luke Patey,2020-12-18 A critical look at how the world is responding to China's rise, and what this means for America and the world. China is advancing its own interests with increasing aggression. From its Belt and Road Initiative linking Asia and Europe, to its Made in China 2025 strategy to dominate high-tech industries, to its significant economic reach into Africa and Latin America, the regime is rapidly expanding its influence around the globe. Many fear that China's economic clout, tech innovations, and military power will allow it to remake the world in its own authoritarian image. But despite all these strengths, a future with China in charge is far from certain. Rich and poor, big and small, countries around the world are recognizing that engaging China produces new strategic vulnerabilities to their independence and competitiveness. *How China Loses* tells the story of China's struggles to overcome new risks and endure the global backlash against its assertive reach. Combining on-the-ground reportage with incisive analysis, Luke Patey argues that China's predatory economic agenda, headstrong diplomacy, and military expansion undermine its global ambitions to dominate the global economy and world affairs. In travels to Africa, Latin America, East Asia and Europe, his encounters with activists, business managers, diplomats, and thinkers reveal the challenges threatening to ground China's rising power. At a time when views are fixated on the strategic competition between China and the United States, Patey's work shows

how the rest of the world will shape the twenty-first century in pushing back against China's overreach and domineering behavior. Even before the COVID-19 pandemic, many countries began to confront their political differences and economic and security challenges with China and realize the diversity and possibility for cooperation in the world today.

Strategies in Emerging Markets Michael W. Hansen, 2010 This book presents seven case studies of large Danish investment companies in India and China. The case studies provide intriguing perspectives on the strategic and managerial challenges and opportunities facing Western multinational corporations operating in these two Asian giants. The case studies encourage readers to adopt a decision maker's perspective, targeting students and managers interested in multinational corporation strategy in emerging markets.

The Integrated Reporting Movement Robert G. Eccles, Michael P. Krzus, 2014-10-20 An in-depth, enlightening look at the integrated reporting movement The Integrated Reporting Movement explores the meaning of the concept, explains the forces that provide momentum to the associated movement, and examines the motives of the actors involved. The book posits integrated reporting as a key mechanism by which companies can ensure their own long-term sustainability by contributing to a sustainable society. Although integrated reporting has seen substantial development due to the support of companies, investors, and the initiatives of a number of NGOs, widespread regulatory intervention has yet to materialize. Outside of South Africa, adoption remains voluntary, accomplished via social movement abetted, to varying degrees, by market forces. In considering integrated reporting's current state of play, the authors provide guidance to ensure wider adoption of the practice and success of the movement, starting with how companies can improve their own reporting processes. But the support of investors, regulators, and NGOs is also important. All will benefit, as will society as a whole. Readers will learn how integrated reporting has evolved over the years, where frameworks and standards are today, and the practices that help ensure effective implementation—including, but not limited to an extensive discussion of information technology's role in reporting and the importance of corporate reporting websites. The authors introduce the concepts of an annual board of directors' "Statement of Significant Audiences and Materiality" and a "Sustainable Value

Matrix” tool that translates the statement into management decisions. The book argues that the appropriate combination of market and regulatory forces to speed adoption will vary by country, concluding with four specific recommendations about what must be done to accelerate high quality adoption of integrated reporting around the world.
