Interpreting Technologies – Current and Future Trends Gloria Corpas Pastor,Bart Defrancq,2023-10-09 While interpreting long remained unaffected by the technological progress that transformed the translation industry, recent years have witnessed a paradigm shift, such that interpreters increasingly interact with technological tools, that the delivery of interpreting services becomes increasingly dependent on technologies, and, finally, that technologies start to emerge that might some day compete with interpreters. This volume brings together a series of contributions on interpreting technologies focusing on each of these aspects. Its goal is to inform and to empower interpreters, as well as to spark new reflections on the future of technology in the interpreting industry. With this volume, we want to encourage interpreters to participate in that reflection and to become partners of technology rather than its victims. The next generation of technologies will need a next generation of interpreters!

The SAGE Encyclopedia of Educational Research, Measurement, and Evaluation Bruce B. Frey,2018-01-29 In an era of curricular changes and experiments and high-stakes testing, educational measurement and evaluation is more important than ever. In addition to expected entries covering the basics of traditional theories and methods, other entries discuss important sociopolitical issues and trends influencing the future of that research and practice. Textbooks, handbooks, monographs and other publications focus on various aspects of educational research, measurement and evaluation, but to date, there exists no major reference guide for students new to the field. This comprehensive work fills that gap, covering traditional areas while pointing the way to future developments. Features: Nearly 700 signed entries are contained in an authoritative work spanning four volumes and available in choice of electronic and/or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of education research, measurement, and evaluation to more easily locate directly related entries. (For instance, sample themes include Data, Evaluation, Measurement Concepts & Issues, Research, Sociopolitical Issues, Standards.) Back matter includes a Chronology of the development of the field; a Resource Guide to classic books, journals, and associations; and a detailed Index. Entries conclude with References/Further Readings and Cross References to related entries. The Index, Reader's Guide themes, and Cross References will combine to provide robust search-and-browse in the e-version.
