Calvin Smith

Big Cats, Small Cats Calvin Smith, 2004-12 This work has three major sub-goals: first, to give a history of cats in general from earliest recorded times to the present. Second, to cover 26 different cats (or cat species) in alphabetical order, so the reader has a representative feline for each of the alphabet's 26 letters. Third, to accomplish these ends through poetry. The poetic mode was chosen to give reader a little different slant on each covered cat's special qualities and temperament. An additional prose portion gives the reader a straightforward description of each cat's natural territory and a brief coverage of its special talents and challenges. The overall goal was to make learning about cats both fun and educational and make us more fully appreciate our feline friends.

Cat Wars Peter P. Marra, Chris Santella, 2016-09-20 Why our cats are a danger to species diversity and human health In 1894, a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles. In just over a year, the Stephens Island Wren, a rare bird endemic to the island, was rendered extinct. Mounting scientific evidence confirms what many conservationists have suspected for some time—that in the United States alone, free-ranging cats are killing birds and other animals by the billions. Equally alarming are the little-known but potentially devastating public health consequences of rabies and parasitic *Toxoplasma* passing from cats to humans at rising rates. *Cat Wars* tells the story of the threats free-ranging cats pose to biodiversity and public health throughout the world, and sheds new light on the controversies surrounding the management of the explosion of these cat populations. This compelling book traces the historical and cultural ties between humans and cats from early domestication to the current boom in pet ownership, along the way accessibly explaining the science of extinction, population modeling, and feline diseases. It charts the developments that have led to our present impasse—from Stan Temple's breakthrough studies on cat predation in Wisconsin to cat-eradication programs underway in Australia today. It describes how a small but vocal minority of cat advocates has campaigned successfully for no action in much the same way that special interest groups have stymied attempts to curtail smoking and climate change. *Cat Wars* paints a revealing picture of a complex global problem—and proposes solutions that foresee a time when wildlife and humans are no longer vulnerable to the impacts of free-ranging cats.

Was the Cat in the Hat Black? Philip Nel, 2017-07-06 Racism is resilient, duplicitous, and endlessly adaptable, so it is no surprise that America is again in a period of civil rights activism. A significant reason racism endures is because it is structural: it's embedded in culture and in institutions. One of the places that racism hides—and thus perhaps the best place to oppose it—is books for young people. *Was the Cat in the Hat Black?* presents five serious critiques of the history and current state of children's literature tempestuous relationship with both implicit and explicit forms of racism. The book fearlessly examines topics both vivid—such as *The Cat in the Hat's* roots in blackface minstrelsy—and more opaque, like how the children's book industry can perpetuate structural racism via whitewashed covers even while making efforts to increase diversity. Rooted in research yet written with a lively, crackling touch, Nel delves into years of literary criticism and recent sociological data in order to show a better way forward. Though much of what is proposed here could be endlessly argued, the knowledge that what we learn in childhood imparts both subtle and explicit lessons about whose lives matter is not debatable. The text concludes with a short and stark proposal of actions everyone—reader, author, publisher, scholar, citizen—can take to fight the biases and prejudices that infect children's literature. While *Was the Cat in the Hat Black?* does not assume it has all the answers to such a deeply systemic problem, its audacity should stimulate discussion and activism.

Cat Culture Janet Alger, Steven Alger, 2011-02-07 Even people who live with cats and have good reason to know better insist that cats are aloof and uninterested in relating to humans. Janet and Steven Alger contend that the anti-social cat is a myth; cats form close bonds with humans and with each other. In the potentially chaotic environment of a shelter that houses dozens of uncaged cats, they reveal a sense of

self and build a culture—a shared set of rules, roles, and expectations that organizes their world and assimilates newcomers. As volunteers in a local cat shelter for eleven years, the Algers came to realize that despite the frequency of new arrivals and adoptions, the social world of the shelter remained quite stable and pacific. They saw even feral cats adapt to interaction with humans and develop friendships with other cats. They saw established residents take roles as welcomers and rules enforcers. That is, they saw cats taking an active interest in maintaining a community in which they could live together and satisfy their individual needs. Cat Culture's intimate portrait of life in the shelter, its engaging stories, and its interpretations of behavior, will appeal to general readers as well as academics interested in human and animal interaction.

Total Cat Mojo Jackson Galaxy, 2017-10-31 This comprehensive cat care guide from the star of the hit Animal Planet show *My Cat from Hell*, Jackson Galaxy, shows us how to eliminate feline behavioral problems by understanding cats' instinctive behavior. Cat Mojo is the confidence that cats exhibit when they are at ease in their environment and in touch with their natural instincts—to hunt, catch, kill, eat, groom, and sleep. Problems such as litter box avoidance and aggression arise when cats lack this confidence. Jackson Galaxy's number one piece of advice to his clients is to help their cats harness their mojo. This book is his most comprehensive guide yet to cat behavior and basic cat care, rooted in understanding cats better. From getting kittens off to the right start socially, to taking care of cats in their senior years, and everything in between, this book addresses the head-to-toe physical and emotional needs of cats—whether related to grooming, nutrition, play, or stress-free trips to the vet.

Innate Immunity Jonathan Ewbank, Eric Vivier, 2008 Immunologists today are interested in all of the diverse cell-types involved in host defense and have a deeper appreciation of the importance of innate

immune mechanisms as a first line of protection against pathogens. This volume thus discusses the isolation and functional characterization of cells involved in innate immunity in mouse and man, including mast cells and eosinophils. Other focuses include natural killer cells, methods in statistics, in vivo imaging, genome engineering, and mutagenesis and culture that are adapted to the study of innate immunity in these hosts. These are complemented with a series of chapters dealing with alternative models: plants, worms, mosquitoes, flies, and fish. Together, these approaches and models are being used to dissect the complex interplay between hosts and pathogens and contribute to developing strategies to help fight infection. With chapters written by experts on the cutting-edge of this technology, *Innate Immunity* is an essential reference for immunologists, histologists, geneticists, and molecular biologists.
