In this book, we'll discuss what attracts mosquitoes, natural mosquito repellents (including mosquito spray recipes), plants that repel mosquitoes, mosquito control tips for your yard, and ways to avoid getting bit. What's the most dangerous creature on earth? Without question the answer is: the mosquito. Mosquitoes and the diseases they spread have been responsible for killing more people than all the wars in history. Even today, mosquitoes transmitting malaria kill 2 million to 3 million people and infect another 200 million or more every year. Tens of millions more are killed and debilitated by a host of other mosquito-borne diseases, including filariasis, yellow fever, dengue and encephalitis. In the United States Encephalitis, meningitis and other diseases can develop from the bites of mosquitoes infected with certain viruses. These include the viruses of West Nile, St. Louis encephalitis, LaCrosse (California) encephalitis, and Eastern equine and Western equine encephalitis. Keeping mosquitoes permanently off your premises is a difficult job although; you can surely implement ways to repel mosquitoes off your property forever. The best part of utilizing natural ways to make bug and mosquito repellent is the security of health as well as economic profit that you make by squishing some garlic rather than buying a 500 ml HIT mosquito spray! You can also make scented candles based on the bug or insect that you want to repel. This is the most efficient way to keep mosquitoes off. As it requires no direct contact with the skin and does not fume up the house! Another effective way to repel mosquitoes is by attracting bats.
