Complex Sciences Jie Zhou, 2009-06-29 I was invited to join the Organizing Committee of the First International Conference on Complex Sciences: Theory and Applications (Complex 2009) as its ninth member. At that moment, eight distinguished colleagues, General Co-chairs Eugene Stanley and Gaoxi Xiao, Technical Co-chairs János Kertész and Bing-Hong Wang, Local Co-chairs Hengshan Wang and Hong-An Che, Publicity Team Shi Xiao and Yubo Wang, had spent hundreds of hours pushing the conference half way to its birth. Ever since then, I have been amazed to see hundreds of papers flooding in, reviewed and commented on by the TPC members. Finally, more than 200 contributions were - lected for the proceedings currently in your hands. They include about 200 papers from the main conference (selected from more than 320 submissions) and about 33 papers from the five collated workshops: Complexity Theory of Art and Music (COART) Causality in Complex Systems (ComplexCCS) Complex Engineering Networks (ComplexEN) Modeling and Analysis of Human Dynamics (MANDYN) Social Physics and its Applications (SPA) Complex sciences are expanding their colonies at such a dazzling speed that it - comes literally impossible for any conference to cover all the frontiers.

Insect Chronobiology Hideharu Numata, Kenji

Tomioka, 2023-04-17 This book reviews the physiological

mechanisms of diverse insect clocks, including circadian clock,

lunar clock, tidal clock, photoperiodism, circannual rhythms and

others. It explains the commonality and diversity of insect clocks,

focusing on the recent advances in their molecular and neural

mechanisms. In the history of chronobiology, insects provided important examples of diverse clocks. The first report of animal photoperiodism was in an aphid, and the time-compensated celestial navigation was first shown in the honeybee. The circadian clock was first localized in the brain of a cockroach. These diverse insect clocks also have some common features which deserve to be reviewed in a single book. The central molecular mechanism of the circadian clock, i.e., the negative feedback loop of clock genes, was proposed in *Drosophila melanogaster* in the 1990s and later became the subject of the Nobel Prize in Physiology or Medicine in 2017. Thereafter, researches on the molecular and neural mechanisms in diverse insect clocks other than the *Drosophila* circadian clock also advanced appreciably. Various new methods including RNAi, NGS, and genome editing with CRISPR-Cas9 have become applicable in these researches. This book comprehensively reviews the physiological mechanisms in diverse insect clocks in the last two decades, which have received less attention than the *Drosophila* circadian clock. The book is intended for researchers, graduate students, and highly motivated undergraduate students in biological sciences, especially in entomology and chronobiology.

The Sleepy Ant Audrey Rumamby, 2019-08-03 Tobi Ant lives with Mother Ant under a messy dining table. It belongs to a lazy family. So, every day, there is always food to store by Mother Ant and Tobi Ant. However, Tobi Ant likes to sleep all day long. From loud alarm clock to water drops. Nothing can wake Tobi Ant. One day, a loud sound from outside of the house wakes Tobi Ant, suddenly. The time is nearly 11 o'clock. The usual time for Mother Ant to sweep the floor outside of the house. Oh dear! Is Mother Ant all right?

The Ants Wilhelm Goetsch, 1957 Excerpt from *The Ants*: From time immemorial, ant communities have aroused interest and admiration. Herodotus reports that ants dragged grains of gold from deep in the earth (and Solomon says in his Proverbs. Go to

the ant, thou sluggard, consider her ways and be wise. Which having no gurde, overseer or ruler, provideth her meat in the summer, and gathereth her food in the harvest.

The Basketball Love Story of Choc'Lit and Max John Morris Wright, 2018-12-18 This is a semi-fiction, true fantasy of the saga of two basketball players, a boy and a girl named Shelton and Maxwell. The book is based on the visual exploits of a fantastic player called Chuckie, whom I had the pleasure of watching play for five years. He was placed on the varsity squad in the eighth grade because of his ability to jump and shoot. I don't remember if he was first string in the eighth grade or not. Chuckie is actually Choc in the book.

The Fire Ant Wars Joshua Blu Buhs, 2010-11-15 Sometime in the first half of the twentieth century, a coterie of fire ants came ashore from South American ships docked in Mobile, Alabama. Fanning out across the region, the fire ants invaded the South, damaging crops, harassing game animals, and hindering harvesting methods. Responding to a collective call from southerners to eliminate these invasive pests, the U.S. Department of Agriculture developed a campaign that not only failed to eradicate the fire ants but left a wake of dead wildlife, sickened cattle, and public protest. With political intrigue, environmental tragedy, and such figures as Rachel Carson and E. O. Wilson, *The Fire Ant Wars* is a grippingly perceptive tale of changing social attitudes and scientific practices. Tracing the political and scientific eradication campaigns, Joshua Buhs's bracing study uses the saga as a means to consider twentieth-century American concepts of nature and environmental stewardship. In telling the story, Buhs explores how human concepts of nature evolve and how these ideas affect the natural and social worlds. Spotlighting a particular issue to discuss larger questions of science, public perceptions, and public policy—from pre-environmental awareness to the activist years of the early environmental movement—*The Fire Ant Wars* will appeal to

historians of science, environmentalists, and biologists alike.
