The United States and the Transatlantic Slave Trade to the Americas, 1776-1867 Leonardo Marques,2016-10-25 An investigation of US participation in the transatlantic slave trade to the Americas, from the American Revolution to the Civil War While much of modern scholarship has focused on the American slave trade's impact within the United States, considerably less has addressed its effects in other parts of the Americas. A rich analysis of a complex subject, this study draws on Portuguese, Brazilian, and Spanish primary documents—as well as English-language material—to shed new light on the changing behavior of slave traders and their networks, particularly in Brazil and Cuba. Slavery in these nations, as Marques shows, contributed to the mounting tensions that would ultimately lead to the U.S. Civil War. Taking a truly Atlantic perspective, Marques outlines the multiple forms of U.S. involvement in this traffic amid various legislation and shifting international relations, exploring the global processes that shaped the history of this participation.

Oncofertility Manual Dr. Snehal Dhobale Kohale, Sangeetha Kumar,2021-11-09 Advances in cancer diagnosis and the introduction of new cancer treatments have dramatically improved survival rates. So currently it's the need of the hour to think well beyond the cure to the future quality of life of these cancer survivors. A cancer diagnosis is a devastating situation for young cancer patients and their families. Cancer and its therapy have a detrimental effect on fertility. Fertility preservation has now become a new paradigm in survivorship. It has been well documented that cancer and cancer treatment resulting in infertility is psychologically distressing for many patients, but those who have undergone fertility preservation have coped better with cancer therapies. This book is our effort to give an overview of fertility preservation in detail which will help to bridge the gap between the Oncology and Fertility Team and to develop well-coordinated, easily accessible referral pathways for cancer patients of reproductive age group.
