**The Complete Rugby Union Compendium** Keith Young, 2015-09-01 The 2015 Rugby World Cup in England is set to be the biggest, brightest and most successful tournament to date, as the world's top teams compete for the coveted Webb Ellis Cup and inspire new participants and fans worldwide across 44 days and 48 matches. With over three million tickets set to be sold for the matches, the Rugby World Cup will be viewed in over 207 territories worldwide. However, for all the fanfare of the third biggest sporting event in the world (after the Olympics and FIFA World Cup), it is astonishing that, until now, there has been no single reference book in the marketplace that contains all the rugby internationals, in chronological order, played by the world's major rugby nations since the game's inception. Keith Young has spent six years compiling such a compendium to fill this gap in the market and has undertaken a colossal amount of research in the process. The Complete Rugby Union Compendium contains over 5,200 entries, organized in such a way that details of all matches can be easily accessed by the reader. It is laid out in a visually engaging and informative format and will be invaluable to every dedicated rugby enthusiast.

**Events and Urban Regeneration** Andrew Smith, 2012-03-15 In recent years, major sporting and cultural events such as the Olympic Games have emerged as significant elements of public policy, particularly in efforts to achieve urban regeneration. As well as opportunities arising from new venues, these events are viewed as a way of stimulating investment, gaining civic engagement and publicizing progress to assist the urban regeneration process more generally. However, the pursuit of regeneration involving events is a practice that is poorly understood, controversial and risky. *Events and Urban Regeneration* is the first book dedicated to the use of events in regeneration. It explores the relationship between events and regeneration by analyzing a range of cities and a range of sporting and cultural events projects. It considers various theoretical perspectives to provide insight into why major events are important to contemporary cities. It examines the different ways that events can assist regeneration, as well as problems and issues associated with this unconventional form of public policy. It identifies key issues faced by those tasked with using events to assist regeneration and suggests how practices could be improved in the future. The book adopts a multi-disciplinary perspective, drawing together ideas from the geography, urban planning and tourism literatures, as well as from the emerging events and regeneration fields. It illustrates arguments with a range of international case studies placed within and at the end of chapters to show positive outcomes that have been achieved and examples of high profile failures. This timely book is essential reading for students and practitioners who are interested in events, urban planning, urban geography and tourism.
