Academic Flying and the Means of Communication Kristian Bjørkdahl,Adrian Santiago Franco Duharte,2022-01-01 This open access book shines a light on how and why academic work became entwined with air travel, and what can be done to change academia's flying habit. The starting point of the book is that flying is only one means of scholarly communication among many, and that the state of the planet now obliges us to shift to other means. How can the academic-as-globetrotter become a thing of the past? The chapters in this book respond to this call in three steps. It documents the consequences of academic flying, it investigates the issue of why academics fly, and it begins an effort to think through what can replace flying, and how. Finally, it confronts scholars and scientists, students, activists, research funders, university administrators, and others, with a call to translate this research into action.

The Digital University Reza Hazemi,Stephen Hailes,Steve Wilbur,2012-12-06 Computer supported collaboration in academia is becoming increasingly important for two reasons. Firstly, there is a drive to make the most effective use of the resources available to universities, and secondly, there is a growing belief in the pedagogical benefits of using computer support in teaching. In this volume, an international collection of authors from both academia and industry examines ways in which universities can make effective use of asynchronous collaboration. All aspects of academic life are covered, from teaching and research through to support and management. The Digital University contains a range of material, from research-oriented chapters through to the experiences of senior university management in attempting to make their institutions as efficient as they need to be to survive in the 21st century.

The New SocioTech Elayne Coakes,Dianne Willis,Raymond Lloyd-Jones,2012-12-06 Sociotechnical principles are now widely used around the world in both information systems and organisational design. First established in the 1940s to examine the effect of mechanised, mass-production systems on workers in the coal mining industry, they are now an important tool for ensuring that people and technology work together to optimal effect within an organisation. One of their main aims is the development of organisations where small groups work independently, handling sets of varied tasks, and managing their own activities. The main features of this book include: Practical experiences of applying sociotechnical approaches from around the world; Focus on future directions for the topic and modern applications of existing principles; Contributions from leading figures such as Enid Mumford; A Foreword by Frank Land.

Indentured and Post-Indentured Experiences of Women in the Indian Diaspora Amba Pande,2020-01-03 This book describes the processes of migration and settlement of indentured Indian women and tries to map their struggles, challenges and agencies. It highlights the fact that even though indentured women faced various kinds of violence and abuse owing to the authoritarian and patriarchal setup of the plantations, over a period of time, they managed to turn the adverse circumstances to their advantage. They struggled to emerge as productive workforces and empowered themselves through acquiring education and skill, and negotiating new spaces and identities for themselves. At the same time, they also raised families in often inhospitable circumstances, passing on to their descendants, a strong foundation to build successful lives for themselves. The book discusses indentured women from a multidisciplinary perspective and adopts multiple methodologies, including primary and secondary sources, personal narrations, pictorial representations and theoretical discussions. It also provides an overview of the current discourses and the changing paradigms of the studies on Indian indentured women. Further, it presents a detailed, region-wise description of indentured women migrants. The regions covered in this book are Asia- Pacific (countries covered are Fiji, Burma and Nepal); Africa (countries covered are South Africa, Mauritius and Reunion Island); and the Caribbean (countries covered are Suriname, Trinidad and Tobago). In addition, one full section of the book is devoted to the theoretical frameworks that touch upon gender performativity, normative misogyny, Bahadur's Coolie Women, literary representations and resistance movements. It is intended for academics and researches in the field of diaspora/migration/transnational studies, history, sociology, literature, women/gender studies, as well as policymakers and general readers interested in the personal experiences of women and migrants.

Italians to America: March 1903-April 1903 Ira A. Glazier,Percy William Filby,1992 Italians to America is the first indexed reference work devoted to Italian immigrants to the United States. This series contains passenger list information in chronological order on the first major wave of Italian migration during the last two decades of the nineteenth century, as well as the beginning of the twentieth century. As with the highly regarded companion series on German immigrants, Italians to America presents the passenger lists in chronological order, including information on each person's age, sex, occupation, village of origin, and destination, plus the name of the ship, the port of embarkation, and the date of arrival. Each volume also contains an introduction on the history of Italian migration to the U.S. and a full name index, greatly simplifying the researcher's job.

Aeromobilities Saulo Cwerner,Sven Kesselring,John Urry,2009-01-13 Aeromobilities is a collection of essays that tackle in many different ways the growing importance of aviation and air travel in our hypermobile, globalized world. Providing a multidisciplinary focus on issues ranging from global airports to the production of airspace, from airline work to helicopters, and from movement in airports to software systems, Aeromobilities seeks to enhance our understanding of space, time and mobility in the age of mass air travel. From Sao Paulo to Sydney, Aeromobilities draws on local experiences of airspaces to generate theory and research that are global in scope. It is the first book of its kind, bringing together a wide range of theoretical and methodological approaches to aviation and air travel in the social sciences and humanities, while emphasizing the central role of aeromobilities in contemporary social relations. In a world where virtually every aspect of social life is touched upon, in one way or another, by the complex global network of airline flows, with its large passenger aircraft and iconic international airports, Aeromobilities provides innovative analyses of some of the most fundamental and influential mobility networks of our time.

From Teams to Knots Yrjö Engeström,2008-04-14 Teams are commonly celebrated as efficient and humane ways of organizing work and learning.

By means of a series of in-depth case studies of teams in the United States and Finland over a time span of more than 10 years, this book shows that teams are not a universal and ahistorical form of collaboration. Teams are best understood in their specific activity contexts and embedded in historical development of work. Today, static teams are increasingly replaced by forms of fluid knotworking around runaway objects that require and generate new forms of expansive learning and distributed agency. This book develops a set of conceptual tools for analysis and design of transformations in collaborative work and learning.
