APEC has 21 members - referred to as member economies - which account for approximately 40 percent of the world's population, approximately 55 percent of world GDP and about 44 percent of world trade. Urban Atmospheric Aerosols Regina M. B. O. Duarte,Armando da Costa Duarte,2021-02-24 The challenges faced by the atmospheric research community today are vast, complex, and multi-faceted. The book *Urban Atmospheric Aerosols: Sources, Analysis, and Effects* highlights important aspects concerning the chemical and optical properties, size distribution, sources, and potential health effects of fine urban air particles (PM_{2.5}). The physical and chemical characterization of PM_{2.5}, its source assignment, and the assessment of the magnitude and distribution of its emissions are crucial for establishing effective fine air particle regulations and assessing the associated risks to human health. This book brings together eight papers covering the main topics of the field and will be of interest to researchers who are interested in air quality in outdoor and indoor environments, air particle toxicity, and atmospheric chemistry, as well as global climate modelers.

Researching Higher Education in Asia Jisun Jung,Hugo Horta,Akiyoshi Yonezawa,2017-09-05 This book discusses higher education research as a field of study in Asia. It traces the evolution of research in the field of higher education in several Asian countries, and shares ideas about the evolving higher education research communities in Asia. It also identifies common and dissimilar challenges across national communities, providing researchers and policymakers essential new insights into the relevance of a greater regional articulation of national higher education research communities, and their further integration into and contribution to the international higher education research community as a whole.

Trade Regionalism in the Asia-Pacific Sanchita Basu Das,2017-03-09 Asia has witnessed a proliferation of free trade agreements (FTAs) since the turn of the millennium. The first regional agreement - the ASEAN FTA - was transformed into the ASEAN Economic Community at the end of 2015. In the meantime, ASEAN forged five ASEAN+1 FTAs and began to negotiate a sixteen-member Regional Comprehensive Economic Partnership (RCEP) Agreement. In parallel, the U.S.-led Trans-Pacific Partnership (TPP), supporting U.S. foreign policy of e;Pivot to Asiae;, was broadly agreed in October 2015. The RCEP and the TPP are accompanied by other mega-regional integration processes developing elsewhere in the world, including the Transatlantic Trade and Investment Partnership for the European Union and the United States, and the Pacific Alliance among four Latin American member states. Meanwhile, APEC is also striving to meet its Bogor Goal targets and create a Free Trade Area of the Asia-Pacific. Each of these mega-regionals aims to achieve greater trade and investment liberalization and facilitation and more harmonized trade and investment rules so that all

member economies can participate in the global value chain of production. Instead of undermining, these regional exercises can be building blocks for a more liberal global trading system supported by the World Trade Organization. This book ruminates on these regional agreements, their economic and strategic rationales and challenges during negotiations and afterwards. The book brings together eminent scholars and experts to deepen our understanding of the complex nature of the mega-regional trade agreements and their implications. It is useful both for the academic and research community and for policymakers who focus on trade and economic cooperation issues.

Wide Bandgap Semiconductor Power Devices B. Jayant Baliga, 2018-10-17 Wide Bandgap Semiconductor Power Devices: Materials, Physics, Design and Applications provides readers with a single resource on why these devices are superior to existing silicon devices. Authored by the Founder of the Power Semiconductor Research Center at North Carolina State University (and creator of the IGBT device), Dr. B. Jayant Baliga is one of the highest regarded experts in the field. He thus leads this team who comprehensively review the materials, device physics, design considerations and relevant applications discussed. Comprehensively covers power electronic devices, including materials (both gallium nitride and silicon carbide), physics, design considerations, and the most promising applications Addresses the key challenges towards the realization of wide bandgap power electronic devices, including materials defects, performance and reliability Provides the benefits of wide bandgap semiconductors, including opportunities for cost reduction and social impact

Reinventing Mutual Recognition Arrangements Dovelyn Rannveig Mendoza, Demetrios Papademetriou, Maria Vincenza Desiderio, Brian Salant, Kate Hooper, Taylor Elwood, 2017-02-01 Governments and nonstate actors around the world have signed mutual recognition arrangements (MRAs), but while most of them share the goals of streamlining the recognition of foreign workers' qualifications and boosting labor mobility, the MRAs vary considerably. Implementation challenges faced in the Americas, Asia and the Pacific, and Europe offer lessons for Asian policymakers seeking to operationalize the MRAs of the Association of Southeast Asian Nations (ASEAN). This report is the latest in a project by the Asian Development Bank and the Migration Policy Institute to improve understanding of the barriers to the free movement of professionals within ASEAN and to support the development of strategies to overcome these hurdles. The report draws on insights of nearly 400 ASEAN and member state officials, private sector employers, training directors, and others who participated in focus group discussions, meetings, and surveys.

Regional Infrastructure Systems Colin Turner, 2018-09-28 As the international economy globalises, there is a need for national infrastructure systems to adapt to form a global infrastructure system. This network of networks aids mobility between national systems as a means of supporting their territorial needs and preferences. This reflects a strategic approach to state infrastructuring as nations seek to utilise these physical systems to support and enhance their territoriality. Providing a thorough examination through the lens of economic infrastructure, the book addresses the forces of integration and fragmentation in global networks. This book explores the trend towards the development of regional infrastructure systems within the context of territorial strategy. Regional systems emerge out of states seeking to position themselves within the international system. Colin Turner identifies the diverse processes that are driving regional infrastructures, as well as examining the formal and informal patterns of integration that are shaping developments. This book is ideal for international political economy and regional development scholars who seek an advanced understanding of current regional infrastructure systems. It will also serve as a vital tool for practitioners who need to understand the implications for policy-making.

Routledge Handbook of Southeast Asian Development Andrew McGregor, Lisa Law, Fiona Miller, 2017-11-06 Southeast Asia is one of the most diverse regions in the world – hosting a wide range of languages, ethnicities, religions, economies, ecosystems and political systems. Amidst this diversity, however, has been a common desire to develop. This provides a uniting theme across landscapes of difference. This Handbook traces the uneven experiences that have accompanied development in Southeast Asia. The region is often considered to be a development success story; however, it is increasingly recognized that growth underpinning this development has been accompanied by patterns of inequality, violence, environmental degradation and cultural loss. In 30 chapters, written by established and emerging experts of the region, the Handbook examines development encounters through four thematic sections: • Approaching Southeast Asian development, • Institutions and economies of development, • People and development and • Environment and development. The authors draw from national or sub-national case studies to consider regional scale processes of development – tracing the uneven distribution of costs, risks and benefits. Core themes include the ongoing neoliberalization of development, issues of social and environmental justice and questions of agency and empowerment. This important reference work provides rich insights into the diverse impacts of current patterns of development and in doing so raises questions and challenges for realizing more equitable alternatives. It will be of value to students and scholars of Asian Studies, Development Studies, Human Geography, Political Ecology and Asian Politics.

New Directions in Asia-Pacific Economic Integration Guoqiang Tang, Peter a. Petri, 2014-06-30 In 2014, the Asia Pacific Economic Cooperation (APEC) forum celebrates its 25th anniversary in a vastly changed region and world. In Bogor, Indonesia, 20 years earlier, APEC committed to achieve free trade and investment in the region by 2020. In Beijing in 2014, China will again make regional economic integration an APEC priority. These papers draw on two conferences organized by the China National Committee for Pacific Economic Cooperation and are published jointly with the United States Asia Pacific Council. As one contributor put it, APEC earns an A for its vision of regional economic integration, but its grade on execution remains incomplete. Yet pathways to the Bogor Goals are coming into focus. This book examines the Trans-Pacific Partnership and Regional Comprehensive Economic Partnership negotiations from various perspectives, and considers possibilities for their consolidation into a Free Trade Area of the Asia-Pacific (FTAAP). It also explores regional connectivity and the proposed Asian Infrastructure Investment Bank. Experts from nearly every APEC economy explore the benefits and challenges of regional economic integration. Their perspectives differ, but also reveal striking common ground. They offer practical recommendations for the Asian and trans-Pacific pathways--for ensuring their compatibility, and for promoting their convergence into an FTAAP.

International Order at Sea Jo Inge Bekkevold, Geoffrey Till, 2016-10-15 This book examines how international order at sea is challenged, changed and maintained. The book surveys challenges to the international order at sea in the Asia-Pacific, the Indian Ocean Region, the Atlantic Ocean and the Arctic Ocean. It explores the interaction between and cooperation among leading, emerging and smaller naval powers, both naval and coastguard responses, required for the maintenance of good order at sea. Six broad and interlinked issues are identified that will influence the future international order at sea: the balance between the maritime and the continental domains; the balance between great power rivalry and cooperation; the contest between access and denial; the operational balance between preparing; building and training for warfighting as opposed to operations other than war; how to manage 'disorder' security challenges that very often transcends territorial waters and national boundaries, and finally, the balance between safeguarding national interests and contributing to collective efforts preserving the international order at sea.

Asia's New Battlefield Richard Javad Heydarian, 2015-11-15 This compact, insightful book offers an up-to-the-minute guide to understanding the evolution of maritime territorial disputes in East Asia,

exploring their legal, political-security and economic dimensions against the backdrop of a brewing Sino-American rivalry for hegemony in the Asia-Pacific region. It traces the decades-long evolution of Sino-American relations in Asia, and how this pivotal relationship has been central to prosperity and stability in one of the most dynamics regions of the world. It also looks at how middle powers – from Japan and Australia to India and South Korea – have joined the fray, trying to shape the trajectory of the territorial disputes in the Western Pacific, which can, in turn, alter the future of Asia – and ignite an international war that could re-configure the global order. The book examines how the maritime disputes have become a litmus test of China's rise, whether it has and will be peaceful or not, and how smaller powers such as Vietnam and the Philippines have been resisting Beijing's territorial ambitions. Drawing on extensive discussions and interviews with experts and policy-makers across the Asia-Pacific region, the book highlights the growing geopolitical significance of the East and South China Sea disputes to the future of Asia – providing insights into how the so-called Pacific century will shape up.

Regional Economic Integration and Dispute Settlement in East Asia Anna G Tevini, 2018-06-28 The accession of the People's Republic of China to the World Trade Organization (WTO) in 2001 significantly transformed the global economy both de facto and de jure. At the regional level, China's WTO accession served as an important catalyst for the establishment of Regional Trade Agreements (RTAs) in East Asia. This was a novel development for the region, since East Asian States had previously followed a largely informal, market-driven approach to regional economic integration. By contrast, rules-based economic integration involving East Asian States was traditionally limited to multilateral integration under the GATT/WTO framework. This book systematically analyses and explains the development, nature and challenges of rules-based regional economic integration in East Asia with particular attention to the region's first four RTAs. While also addressing the socio-economic, historical and political factors influencing the development of RTAs in East Asia, the book focuses on the legal institutions governing economic integration in the Association of Southeast Asian Nations (ASEAN), as well as under the ASEAN-China Comprehensive Economic Co-Operation Agreement (ACFTA), the Japan-Singapore New Age Economic Partnership Agreement (JSEPA), and the Mainland China-Hong Kong Closer Economic Partnership Arrangement (CEPA). The book provides a systematic, comparative account of the scope, depth and (hard law versus soft law) quality of rules-based economic integration achieved under these four RTAs in the areas of trade in goods and services, investment liberalisation and protection, labour mobility, and dispute settlement.

Integrating SMEs into Global Value Chains ADBI, ADB, 2016-03-08 Globalized production networks, or global value chains, provide an opportunity for SMEs to upscale their business models and to grow across borders. This process can enhance SME competitiveness, create more jobs, and promote inclusive growth in developing Asia. The Asian Development Bank (ADB) and the ADB Institute (ADBI) recognize the importance of integrating SMEs into global value chains. To provide pathways for such integration, this study examines ways of encouraging participation in value chains, and explores policy solutions to address the financial and nonfinancial barriers faced by these enterprises.

China and Japan in the Global Economy Tomoo Kikuchi, Masaya Sakuragawa, 2018-04-09 This book discusses the necessity for cooperation between China and Japan to provide international public goods to Asia. It provides insight into how China and Japan can redesign the process of economic integration and security architecture to ensure peace and prosperity in Asia, and how China and Japan can cooperate to correct the capital misallocation and channel savings more effectively to investments in Asia. It also suggests how China and Japan can promote free trade to help Asian economies upgrade their industries in the global supply chain. The book is an invaluable contribution

to the existing discussion on China-Japan relations and how their cooperation is beneficial not only for them but also for Asia, and even the world.

Elms,Arian Hassani,Patrick Low,2017-07-04 The Intangible Economy: How Services Shape Global Production and Consumption studies aspects of the role of services in development as well as on particular sectoral issues, always with policy considerations lurking not far from the analysis.
