**Cardiology Explained** Euan A. Ashley,Euan Ashley,Josef Niebauer,2004 One of the most time-consuming tasks in clinical medicine is seeking the opinions of specialist colleagues. There is a pressure not only to make referrals appropriate but also to summarize the case in the language of the specialist. This book explains basic physiologic and pathophysiologic mechanisms of cardiovascular disease in a straightforward manner, gives guidelines as to when referral is appropriate, and, uniquely, explains what the specialist is likely to do. It is ideal for any hospital doctor, generalist, or even senior medical student who may need a cardiology opinion, or for that ma.

*Engineering the Space Age* Robert V. Brulle,2009-05 Few people have experienced as much aerospace history as Bob Brulle (Lt. Col. Robert V. Brulle, USAF, Ret.), and fewer still possess his meticulous recall and research skills. The P-47 fighter pilot turned engineer, inventor, educator, and author found himself immersed in the Cold War race to the moon, developing cutting-edge technology, instructing future astronauts in aerodynamics and orbital mechanics, perfecting high-performance fighter aircraft to meet the Soviet challenge, overseeing the procurement of new weapon systems, and exploring alternative energy sources. In this book, he shares his unique personal insights into the triumphs and tragedies of one of the most exciting eras in American history.

**Acronyms Abbreviations & Terms - A Capability Assurance Job Aid** ,2005 The FAAT List is not designed to be an authoritative source, merely a handy reference. Das Heil Gottes Hans Jörg Sellner,2007-01-01 For Luke the Evangelist, God's encounter with Man is a salutary event. But what exactly does he mean when he speaks of "Salvation", and how does this salutary encounter come about? Luke thinks differently from Paul here, but his position can only be deduced indirectly from his accounts (St. Luke's Gospel and The Acts of the Apostles). The present study is the first to succeed in reconstructing in an overall framework the content of the ideas of "salvation" which Luke presupposes as an author and to demonstrate their consistency.

**Dressing for Altitude** Dennis R. Jenkins,2012-08-27 Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space.--NTRS Web site.

**Gameful Habits** Victoria Ichizli-Bartels,2021-06-26 Turn your daily practices into fun and exciting games. Many people struggle to motivate

themselves to start the day, work on a project, or maintain a healthy or otherwise beneficial habit. They consider many of their daily routines to be a necessary chore that they will never enjoy. The pioneer of Self-Gamification - a unique approach to turning life into fun games - Victoria Ichizli-Bartels, has discovered another way for herself, and offers this possibility to others by sharing her experiences. In this unconventional book on habits, Victoria shares the Super Sleeper game she created to ensure she got enough sleep, and how this success was extrapolated to the other habits and daily practices she wanted to develop. Read *Gameful Habits*, and you will learn the three skill sets required to succeed in your self-motivational games, i.e. any habits, projects, challenges, tasks, or other activities turned into fun games. These skill sets are: Seeing yourself, the world around you, and your thought processes non-judgmentally, as an anthropologist would do; Identifying your dreams and goals, and taking action, one small and effortless step at a time, the kaizen way; Applying gamification; that is, seeing and treating whatever you are up to like a game, and learning to appreciate every step on the way with gameful rewards. These skill sets, which you can easily put into practice immediately - along with the awareness that when you turn your life into fun games, you are both the player and the designer of these games - will help you turn happiness into a lifestyle, and health and other beneficial practices into exciting games that you can't wait to design, play, and continue developing.

After briefly describing the developments in QSAR research, this 12-chapter volume goes on discussing the contributions of QSAR methodology in elucidating drug action and rational development of drugs against bacterial, fungal, viral, and other parasitic infections of man. Other chapters explore the mode of action and

QSAR of antitumor, cardiovascular, antiallergic, antiulcer, antiarthritic, and nonsteroidal antiinflammatory drugs (NSAID) agents. The discussion then shifts to the pharmacologic effects and QSAR analysis of central nervous system agents, steroids, and other hormones. A chapter examines the major chemicals affecting insects and mites, with particular emphasis on the parameters of binding correlation and reactivity for insect and mite enzymes. The concluding chapters cover the limitations of the QSAR approach in the quantitative treatment of drug absorption, distribution, and metabolism.
