Jason R. Rich

Vine in 10 Minutes, Sams Teach Yourself Michael Miller,2013 Launched in January of 2013, Vine is a new mobile app and video-sharing service from Twitter. Vine enables users to shoot short (six-second max) looping videos on their mobile phones and then share those videos with online friends. Vine videos (called vines) can be viewed from a user's Vine or Twitter feed, shared via Facebook, or embedded in web pages and blogs. This makes Vine like a video version of Instagram, enabling users to 'share life in motion' via social networking. This has made Vine enormously popular, especially among the same younger users who made Instagram a hit. Just three months after its release, Vine has become the #1 free app in Apple's U.S. App Store, and is used on 2.66% of all iOS devices - more than any other video app. In addition, 2.8% of Twitter users are also Vine users. These numbers puts Vine's userbase at somewhere between 4 to 6 million users, who upload more than 2,000 new videos each hour. There is no user manual for Vine, nor much in the way of online help files. Anyone wanting to get on the Vine bandwagon can use some help not just learning the basic shooting and sharing features, but also figuring out how to create more sophisticated types of vines. Sams Teach Yourself Vine in 10 Minutes is a one-stop shop for everything associated with Vine, from shooting basic videos to sharing those videos socially to creating more sophisticated and artistic videos. In short, it is a source of inspiration to aspiring Vine users in an easy step-by-step format. It is accompanied by a series of Vine videos, available for viewing from Que's website and YouTube channel, as well as the author Michael Miller's Vine feed. These videos demonstrate the various video techniques discussed in the book to make you an expert!

Sams Teach Yourself Vine in 10 Minutes Michael Miller,2013 Offers guidance for creating and uploading videos to Vine, including information on how to share them with friends and family.

Vine Stories Jennifer Dent,Yolanda Baker,2015-02-21 In 2013, Twitter launched Vine, a looping six-second video app, originally meant to be Twitter in video form. At first, it seemed as though the six second limit would be too much of a hurdle to keep peoples' interest, but it quickly became something of an underground phenomenon. Get to know some of the most talented people on Vine, read about how the app has changed their lives, for better or worse. Explore stories of inspiration, struggle, comedy, and romance. From some legitimately Vine famous people, to those with modest follower counts, this book explores their stories, and what they have to say.

Extremely Online Taylor Lorenz,2023-10-03 NATIONAL BESTSELLER Acclaimed Washington Post reporter Taylor Lorenz presents a groundbreaking social history of the internet, revealing how online influence and the creators who amass it have reshaped our world, online and off–“terrific,” as the New York Times calls it, “Lorenz...is a knowledgeable, opinionated guide to the ways internet fame has become fame, full stop.” For over a decade, Taylor Lorenz has been the authority on internet culture, documenting its far-reaching effects on all corners of our lives. Her reporting is serious yet entertaining and illuminates deep truths about ourselves and the lives we create online. In her debut book, Extremely Online, she reveals how online influence came to upend the world, demolishing traditional barriers and creating whole new sectors of the economy. Lorenz shows this phenomenon to be one of the most disruptive changes in modern capitalism. By tracing how the internet has changed what we want and how we go about getting it, Lorenz unearths how social platforms’ power users radically altered our expectations of content, connection, purchasing, and power. In this “deeply reported, behind-the-scenes chronicle of how everyday people built careers and empires from their sheer talent and algorithmic luck” (Sarah Frier, author of No Filter), Lorenz documents how moms who started blogging were among the first to monetize their personal brands online, how bored teens who began posting selfie videos reinvented fame as we know it, and how young creators on TikTok are leveraging opportunities to opt out of the traditional career pipeline. It’s the real social history of the internet. Emerging seemingly out of nowhere, these shifts in how we use the internet seem easy to dismiss as fads. However, these social and economic transformations have resulted in a digital dynamic so unappreciated and insurgent that it ultimately created new approaches to work, entertainment, fame, and ambition in the 21st century. “Extremely Online aims to tell a sociological story, not a psychological one, and in its breadth it demonstrates a new cultural logic emerging out of 21st-century media chaos” (The New York Times). Lorenz reveals the inside, untold story of what we have done to the internet, and what it has done to us.

Apps Gerard Goggin,2021-05-20 Since the rise of the smartphone, apps have become entrenched in billions of users' daily lives. Accessible across phones and tablets, watches and wearables, connected cars, sensors, and cities, they are an inescapable feature of our current culture. In this book, Gerard Goggin provides a comprehensive and authoritative guide to the development of apps as a digital media technology. Covering the technological, social, cultural, and policy dynamics of apps, Goggin ultimately considers what a post-app world might look like. He argues that apps represent a pivotal moment in the development of digital media, acting as a hinge between the visions and realities of the “mobile,” “cyber,” and “online” societies envisaged since the late 1980s and the imaginaries and materialities of the digital societies that emerged from 2010. Apps offer frames, construct tools, and constitute “small worlds” for users to reorient themselves in digital media settings. This fascinating book will reframe the conversation about the software that underwrites our digital worlds. It is essential reading for students and scholars of media and communication, as well as for anyone interested in this ubiquitous technology.
